GENERAL REGULATIONS

I. GENERAL

A. The regulations specified herein are in addition to the regulations contained in other sections of this Schedule of Rates and Charges and govern the furnishing of telephone service to customers generally.

II. APPLICATION OF TARIFF

A. Regulations and rates in this Tariff apply to all telephone service provided by the Company.

III. LIMITATIONS AND USE OF SERVICE

A. Equipment and lines furnished by the Telephone Company on the premises of a customer, authorized user or agent of the Telephone Company are the property of the Telephone Company except as otherwise specifically provided in its tariffs and are provided upon the condition that such equipment and lines must be installed, relocated and maintained by the Telephone Company and that the Company's employees or designees may enter said permises at any reasonable hour to install, inspect or maintain the equipment and lines and to make collections from coin boxes and upon termination or cancellation of the service, to remove the equipment and lines.

B. Equipment furnished by the Telephone Company shall, upon termination of service from any cause whatsoever, be returned to it in good condition, reasonable wear and tear thereof excepted.

C. Service shall not be used in competition with the business of the Telephone Company.

D. No equipment, apparatus, circuit or device shall be attached to or connected with the facilities furnished by the Telephone Company, whether physically, by induction or otherwise, except as provided in this tariff. In case any such unauthorized attachment or connection is made, the Telephone Company shall have the right to remove or disconnect the same; or to suspend the service during the continuance of said attachment or connection; or to terminate the service.

E. The right is reserved to restrict the amount of other services furnished in connection with any particular class of service in order to prevent any impairment in the quality of service furnished.

GENERAL REGULATIONS (continued)

III. LIMITATIONS AND USE OF SERVICE (continued)

a. The right is reserved to terminate the service of a party line customer where it appears that his use of the service excludes reasonable use by other parties on the same line.

b. The use of unlimited business exchange service is restricted to the customer, his agents and employees when engaged in his business. The use of unlimited residence exchange service is restricted to the customer and members of his household.

c. For message units the initial period is five minutes for one or two unit messages. The overtime period is five minutes for one unit messages and three minutes for two unit messages. For each of the overtime periods one message unit applies.

d. The Company reserves the right to discontinue or refuse service because of abuse or fraudulent use of service. Abuse or fraudulent use of service includes the use of service or facilities of the Telephone Company to transmit a message or to locate a person or otherwise to give or obtain information, without payment of a message toll charge.

e. The Telephone Company's obligation to furnish service or to continue to furnish service is dependent on its ability to obtain, retain and maintain suitable rights and facilities, and to provide for the installation of those facilities required incident to the furnishing and maintenance of that service.

1. CLASSIFICATION OF EXCHANGE SERVICE

a. Service is furnished at business rates if the use of the service is primarily or substantially for business purposes, or if the service is furnished at a business location.

b. Service is furnished at residence rates if the use of the service is primarily for social or domestic purposes.

2. TERMINATION OF SERVICE AND MINIMUM CHARGES

a. The right is reserved to require notice of not more than four business days of the customer's desire to terminate the service.

b. The minimum charge for service at any premises, except as otherwise stated elsewhere in this schedule, is one month's service charge. The right is reserved to require a minimum charge in excess of one month's service charge in connection with special equipment.

GENERAL REGULATIONS (continued)

3. CHANGE IN TELEPHONE NUMBERS
   a. A telephone number is subject to change at any time.

4. FAILURE OF SERVICE
   a. For any complete failure of local exchange service continued more than twenty-four hours and brought to the notice of the Telephone Company, the Telephone Company will make a pro-rata adjustment of charge or guarantee.

5. PAYMENT FOR SERVICE
   a. Bills are due when rendered and are payable at an office of the Telephone Company. Delayed payment of bills may result in the interruption or discontinuance of the customer's service.
   b. The customer is required to pay, in accordance with the Telephone Company's established collection and billing practice, all charges for exchange service and equipment and for all toll messages, including charges for messenger service. The customer is held responsible for all charges for telephone service rendered at his telephone, both exchange and toll, including charges for toll messages on which the charges have been made collect.
   c. In order to safeguard it against loss of charges or tolls due at the time service may be terminated, pursuant to Rule 1203.03 of the Public Utilities Commission's Code of Administrative Rules the Telephone Company may require a customer or applicant for telephone service to make a cash deposit or obtain a written guarantee equal to the estimated amount of exchange and toll service charges for any period of two months exclusive of the highest-use month. Simple interest at a rate equal to the prime rate shall accrue and shall be paid or credited to the customer annually from the date of deposit to the date of termination of the service or the return of the deposit by the Telephone Company. The receipt of such a deposit by the Telephone Company shall in no way relieve the customer or applicant from compliance with the Telephone Company's regulations as to advance payments (if any) and the prompt payment of bills, nor constitute a waiver or modification of the practices of the Telephone Company for the discontinuance of service for nonpayment of any sums due for service rendered.

GENERAL REGULATIONS (continued)

D. Telephone Calls to Emergency Services in Towns. The company shall, at the customer's request, adjust the charges for tolls to such customers so that no toll charges shall be imposed for any call from any point within the geographical boundaries of said town placed through the Telephone Company to the emergency number of an agency of local government located within the town, provided, however, that the request for adjustment is made at the Telephone Company's business office prior to paying such charges.

IX. LIABILITY DUE TO DIRECTORY ERRORS AND OMISSIONS

A. The Telephone Company's liability arising from errors or omissions in directory listings (other than charged listings) shall be limited to the amount of actual impairment to the customer's service and in no event shall exceed one-half the amount of the exchange service charges for main telephones, and auxiliary lines involved during the period covered by the directory in which the error or omission occurs.

B. In case of charged directory listings, the liability of the Telephone Company shall be limited to an amount not exceeding the amount of charges for the charged listing or listings involved during the period covered by the directory in which the error or omission occurs.

X. USE OF SERVICE FOR UNLAWFUL PURPOSES

The service is furnished subject to the condition that it will not be used for an unlawful purpose. Service will not be furnished if any law enforcement agency, acting within its jurisdiction, advises that such service is being used or will be used in violation of law. If the Telephone Company receives other evidence that such service is being or will be so used, it will either discontinue or deny the service or refer the matter to the appropriate law enforcement agency.

XI. POWER SUPPLY

The customer is responsible for providing suitable electric power at a convenient outlet when and where required, unless otherwise provided in this tariff. In the event of a power failure no allowance is made for interruption of service.

XII. MISCELLANEOUS DEVICES PROVIDED BY THE CUSTOMER

A. The provisions of paragraph III.D. preceding shall not be construed or applied to bar a customer from using devices which serve his convenience in his use of the facilities of the Telephone Company in the service for which they are furnished under this tariff, provided any such device so used would not endanger the safety of Telephone Company employees or the public; damage, require change in or alteration of, or involve

direct electrical connection to, the equipment or other facilities of the Telephone Company; or interfere with the proper functioning of such equipment or facilities; or impair the operation of the telephone system or teletypewriter system or otherwise injure the public in its use of the Telephone Company's services.

B. Except as otherwise provided in this tariff, nothing herein shall be construed to permit the use of a recording device, or of a device to interconnect any line or channel of the Telephone Company with any other communication line or channel of the Company or of any other person.

XIII. VOICE SILENCERS

Devices provided by the customer to obtain quietness or privacy may be used, provided any such device does not involve direct electrical connection to the equipment of the Telephone Company or any change in or alteration of such equipment, or interfere with its proper functioning, or damage it in any way.

XIV. CANCELLATION OR CHANGE OF APPLICATION PRIOR TO ESTABLISHMENT OF SERVICE

A. When an application for facilities and service is cancelled in whole or in part prior to completion of the construction and installation, the customer is required to pay to the Telephone Company, upon demand, the total costs and expenses in connection with providing and removing such facilities, less the estimated recoverable value, if any, of the facilities involved; such payment shall not exceed that specified under paragraph B, following.

B. When an application is cancelled in whole or in part after completion of the construction and installation but prior to the establishment of service the customer is required to pay to the Telephone Company, upon demand, the applicable minimum and termination charges specified in this Tariff and the applicable connection and construction charges.

GENERAL REGULATIONS

XV. ENHANCED UNIVERSAL EMERGENCY NUMBER SERVICE (E-911 SURCHARGE)

An Enhanced Universal Emergency Number Service (E-911) surcharge of $.42 per month applies to each residence and business telephone exchange line, including PABX trunks, Centrex lines, trunks and lines serving cellular communication towers, semi-public coin, Public Access Lines, and seasonal service lines or telephone lines that are temporarily suspended, in addition to the monthly rates for these services specified elsewhere in this tariff.

The surcharge shall be used to fund the statewide Enhanced 911 system, and shall be uniform throughout the state.

The surcharge shall not be imposed upon more than 25 lines per customer billing account.

The $.42 Enhanced Universal Emergency Number Service surcharge shall be applied to all bills rendered on or after October 1, 1995.

PAY TELEPHONE LINE SERVICE

I. GENERAL

A. Pay Telephone Line exchange service is one-party exchange service for use by pay telephone providers, location owners and interexchange carriers and is furnished solely for connection with coin, coinless, or combination coin/coinless pay telephone equipment to the Telephone Company's network.

B. Pay Telephone Line Service

1. Will be considered a business service for the purpose of applying the terms, rates and conditions found in this Tariff.

2. Directory listings may be provided under the regulations that govern the furnishing of listings for business customers.

3. One directory will be distributed to the customer without charge for each Pay Telephone Line.

4. Only one coin-operated or coinless public access telephone unit may be connected to each Pay Telephone Line.

5. The customer is responsible for the provision of booths, shelves, directories and all other ancillary equipment.

6. Will be provided on a dial-tone-first basis to enable end users to dial certain calls without requiring coin deposits, i.e., all emergency calls, telecommunications relay service calls, and non-sent paid calls.

7. The pay telephone provider is responsible for meeting all federal, state and local statutes with respect to provision of pay telephones in accordance with all hearing impaired and handicapped person requirements.

8. Pay telephones connected to a Pay Telephone Line must be registered in compliance with Part 68 of the FCC's Rules and Regulations.

PAY TELEPHONE LINE SERVICE (Cont'd)

I. GENERAL (Cont'd)

B. Pay Telephone Line Service (Cont'd)

9. Each pay telephone connected to a Pay Telephone Line must be capable of providing user call completion to 911 service.

10. The customer shall be responsible for the payment of charges for all local and toll messages originating from or accepted at this type of service, including any Directory Assistance calls. The company shall not be liable for shortages of coins collected and deposited at the customer's paystation instrument.

11. Failure of subscriber to comply with provisions of this Tariff may result in the suspension or disconnection of the subscriber's service.

II. REGULATIONS AND RATES

A. Pay Telephone Line Service is provided at the one-party business line rate as contained in the Telephone Company's Tariff P.U.C. - N.H. - No. 5.

B. Line Connection charges listed in this Tariff apply to Pay Telephone Line Service, if requested by the customer.

C. Requests to Directory Assistance Service originated from Paystations will be charged the applicable rate of the Directory Assistance Service Provider.

D. All subscribers to Pay Telephone Service shall have the right to select their presubscribed intraLATA toll provider.

E. The Multiline Business Subscriber Line charge, found in the interstate access tariff, is applicable to all paystation access lines.

PAY TELEPHONE LINE SERVICE (Cont'd)

III. AVAILABLE FEATURES FOR PAY TELEPHONE SERVICE

A. Optional coin supervision functions, as listed below are provided at the monthly rates stated.

1. Coin-Supervision Additive — provided for the collection, return, recognition, announcements and pre-prompting for overtime; monitors signals from the pay telephone equipment to identify when and what denomination of coins are deposited; identifies the status of attempted calls and sends a signal to the pay telephone equipment to collect the appropriated coins when calls are completed, or returns coins when calls are not completed.

PAY TELEPHONE LINE SERVICE (Cont'd)

III. AVAILABLE FEATURES FOR PAY TELEPHONE SERVICE (Cont'd)

B. Rates:

	Monthly	Non-recurring
1. Coin Supervision Additive	$2.21	N/A

DEFINITIONS OF TERMS

Customer

An individual, partnership, association, corporation, cooperative marketing association, tenant, governmental unit, or a subdivision of a municipality, or the State of New Hampshire, that arranges for service and is responsible for the payment of charges and compliance with the rules and regulations of the Telephone Company.

Customer-Provided Terminal Equipment

Devises, apparatus and their associated wiring, provided by a customer which do not constitute a communications system and which, when connected to the communications path of the telephone system, are so connected either electrically, acoustically or inductively.

Data-Access Arrangement

A protective connecting arrangement for use with the network control signaling unit, or, in lieu of the connecting arrangement, an arrangement to identify a central office line and protective facilities and procedures to determine compliance with appropriate network protection criteria.

Distributing Center

Amplifying and bridging equipment at Telephone Company premises where program transmission channels, used in connection with loudspeakers, are interconnected to form a network for the distribution of program material to a number of loudspeaker locations.

Duplex Service

Service which provides for simultaneous transmission in both directions.

Exchange

A geographical unit established for the administration of communication service in a specified area. It generally consists of one or more central offices together with the associated plant used in furnishing communication service within that area.

Exchange Area

The Territory served by an exchange.

DEFINITIONS OF TERMS

Exchange Service

The furnishing of central office line facilities to provide for telephone communications within the local service calling area on a measured or unlimited service basis in accordance with the rates and regulations of the Tariff.

Extension Line

A private line channel to provide extension telephone service, in connection with main telephone exchange and private branch exchange telephone service, to locations not in the same building as the main telephone exchange service or PBX attendant's switchboard position.

Extension Telephone

An additional telephone connected to the same channel as the main telephone and having the same telephone or PBX branch number as the main telephone.

Foreign Central Office Service

Exchange service furnished from a central office in a multi-office exchange which is other than that normally serving the area in which the customer is located.

Foreign Exchange Service

Exchange service furnished from an exchange other than that normally serving the area in which the customer is located.

General Cable Distributing PLant

The cable provided primarily to distribute local exchange service to the general public.

General Distributing Plant

The carrying plant and associated wire or cable which provide service to the general public within an exchange.

DEFINITIONS OF TERMS

Grade of Service

The grade of service (as distinguished from class of service) is determin by the number of parties which a main telephone line is intended to serve.

Half-Duplex Service

Service which provides for transmission alternately in either direction, or for transmission in one direction only.

Highway Construction - Construction generally located along a public way c construction on private property which, within one year from the date of installation of telephone service, has been accepted as a municipally-owne and maintained road subsequent to the initial installation of service and i to be used in common for more than one customer.

Initial Charge

See "Nonrecurring Charge."

Installation Charge

See "Nonrecurring Charge."

Intercommunication

Communication (1) over interior lines of a key telephone system or (2) communication between PBX system telephones.

Interexchange Channel

A communications path which interconnects exchanges.

Issued: September 12, 1986

Effective: September 15, 1986

D. B. Montgomery, Manager

DE 85-422, OR. No. 18,379
8/22/01

DEFINITIONS OF TERMS

Interface

That point on the premises of the customer, authorized user or joint user at which provision is made for connection of other then Telephone Company provided facilities to facilities provided by the Telephone Company.

Intraexchange Channel

A communications path which interconnects points within an exchange.

Joint User Service

This is a service which includes a listing in the alphabetical section of the Telephone Company directory and provides for the use of the customer's exchange telephone service facilities by a corporation, association, partnership or individual not associated with the customer in business.

Joint Use Arrangement

This is a service which permits the use of the customer's interexchange private line service by an individual, firm or corporation designated as a user of the private line service by the customer and to whom a portion of the charge for service will be billed.

Key Pulsing

A method of dialing by depressing button type keys on a line arranged for normal rotary dialing.

Line Hunting

An arrangement whereby two or more central office lines or private branch exchange trunk lines furnished to a customer at a given location are grouped so that calls to the first number of the grouped lines are automatically routed to the first non-busy line of the lines so grouped and a busy signal is not given unless all the grouped lines are busy.

Local Channel

A communication path within an exchange connecting a customer's premises with an interexchange channel.

DEFINITIONS OF TERMS

Main Listing / Main Telephone Listing

Usually the initial listing of person who is held responsible for the service. In the case of a business service, the business name will be the main listing. (See also definition of Customer.)

Main Telephone

A telephone directly connected to the central office switching equipment by an individual or party line circuit or, a PBX or centrex telephone directly connected to the PBX and centrex switching equipment by an individual line circuit. Additional telephones beyond the main telephone are considered extension telephones.

Maximum Termination Liability

A libility assumed by a customer for certain equipment or service for which a minimum service period in excess of one month applies.

Message

A completed communication between two telephone numbers. Messages may be classified as follows:

Local Message - A message between telephones where the called telephone is within the unlimited or message unit calling area of the calling telephone.

Toll Message (Long Distance Message) - A message between telephones in different local calling areas for which a message toll service charge applies.

Message Unit

The unit of measurement for charging for local messages.

Minimum Service Period

A stated length of time which a customer is expected to retain service at a specified location.

DEFINITIONS OF TERMS

Miscellaneous Common Carrier

Miscellaneous common carriers, as defined in Part 21 of the Federal Communications Commission Rules, are communications common carriers which are not engaged in the business of providing either a public land line message telephone service or public message telegraph service.

Move

The relocation, on the same premises, of equipment and wiring associated with a customer's service.

Multicentral Office Exchange

An exchange served by more than one central office building.

Multipling Arrangement

This is an arrangement associated with a customer's trunk line, tie line, or main exchange service to provide for an additional appearance of a line when the service is multipled between nonmultiple switchboard positions or between a switchboard and station equipment of another type.

Municipality

This term applies to a city, town or unincorporated place, but is not to be applied to any entity larger than a city, for example, a county.

Network Control Signaling

The transmission of signals used in the exchange and message toll telephone system, which perform functions such as supervision (control, status, and charging signals), address signaling (e.g., dialing), calling and called number identification, and other audible tone signals to control the operation fo transmission and switching systems within the telephone network.

Network Control Signaling Unit

The terminal equipment furnished, installed and maintained by the Telephone Company for the provision of network control signaling.

DEFINITIONS OF TERMS

Network Interface
A standard FCC Registration Program jack or equivalent that is installed by the Telephone Company as part of the network access line on or within a customer's premises at a location determined by the Company which is accessible to the customer and consistent with FCC Registration regulations governing the location of the network interface. The network interface is located on or within the customer's premises and serves as the point of connection for all premises services to the telecommunications network.

Network Terminating Wire
Wire installed for network service for a specific customer and used to connect the intrabuilding network cable or the outside plant distribution facilities to the Network Interface.

Nondirectory Listed Service
Exchange service telephone numbers not listed in the Company's directory, but carried in the Company's directory assistance records and given to any calling party on request.

Nonlisted Service
Exchange service telephone numbers not listed in the Company's directory or carried in directory assistance records. There are no restrictions against giving out these numbers if they are known. This service is provided only to customers that have other listed exchange service, either a complete listing or in directory assistance records only.

Nonpublished Service
Exchange service telephone numbers not listed in the Company's directory or carried in directory assistance records and not available to the general public.

Nonrecurring Charge
A charge applying to the provision of certain items of service and equipment or facilities as distinguished from the Part VI service charge applicable for the establishment of telephone service.

Normal Type of Construction
The term used to refer to aerial construction.

Person-to-Person Calls
See Part V - Toll Telephone Service.

DEFINITIONS OF TERMS

Premises
All space in the same building where one customer has the right of occupancy to the exclusion of others or shares the right of occupancy with others, or all space in different buildings on the same continuou property provided the buildings are occupied solely by one customer.

Premises Wire
All wire within a customer's premises located beyond the network interface. It includes wiring within the same building or between buildings (except wiring in cables that contain network facilities) on the same continuous property and located on the customer's side of the network interface. In the absence of an FCC approved network interface or jack in lieu of a standard network interface, premises wire is construed to be that wire which is located on the customer's side of the protector which links customer provided facilities with Telephone Company provided facilities. In all cases, access to the protector is limited to New England Telephone personnel. In the absence of a protector, premises wire is all telephone wire, excluding network terminating wire, beyond a minimum point of penetration on a customer's premises.

Private Branch Exchange (PBX) /
Private Automatic Branch Exchange (PABX) Systems
An arrangement of switching equipment, consisting of a manually operated attendant position or console, or dial switching apparatus, or both, with connecting central office and PBX telephones and lines.

Private Line Service
The channels or the channels and equipment furnished to a customer for communication between specified locations.

Private Property Construction
Construction of private property to serve one or more customers.

Rate Center
A specified geographical location within an exchange area from which mileage measurements are determined for the application of message toll rates and private line interexchange mileage rates.

Restoral of Service
The return to active service following a period of temporary interruption for non-payment of bills, provided this return occurs prior to discontinuance of the service.

Rewire
The additional termination of a new or existing line at an in-service telephone or the rearrangement of a line termination.

Issued: September 12, 1986

Effective: September 15, 1986

D. B. Montgomery, Manager

DE 85-422, OR. No. 18,375
8/22/86

DEFINITIONS OF TERMS

Same Continuous Property

A continuous plot of ground occupied by one customer, or contiguous plots of ground which are occupied by the one customer, the plot or plots being within the same exchange. When a customer owns (or leases) and is the sole occupant of properties on both sides of a street, alley or railroad right-of-way, whch properties otherwise would constitute a continuous plot, such properties shall be considered as constituting the same continuous property if such supporting structures as are required for the wire facilities between the properties are customer owned, either built by the customer or built by the Company at the customer's expense.

Secretarial Service

An arrangement of terminal equipment permitting the answering at one location of calls to main telephone lines of different customers at such times as these lines are unattended.

Secretarial Service Equipment

An arrangement of telephone service to be furnished at secretarial answering bureau locations where the termination of a customer's line will not be in a secretarial service board.

Service Charge (SC) / ServiceConnection Charge (SCC)

A charge made in connection with the ordering or connection of certain services and equipment.

Single Ended Terminal Device

The term single ended terminal device denotes a terminal device which terminates only one line at a given time (e.g., headset).

Station

The term station, as used in connection with private line services, denotes the transmitting or receiving equipment, or combination transmitting and receiving equipment, at any location on a premises and connected for private line service, or where the service involves only channels, denotes a point on a premises in which a channel is terminated. The term station, as used with local exchange service, denotes a telephone instrument or the location where it is terminated.

DEFINITIONS OF TERMS

Station-to-Station Calls

See Part V - Toll Telephone Service.

Telephone Company (Company)

The term "Telephone Company" denotes the Dunbarton Telephone Company unless otherwise stated.

Temporary Suspension of Service

An arrangement whereby service is made inoperative for a temporary period at the request of the customer.

Termination Charge

The charge made when service for which a maximum termination liability applies, is terminated by the customer prior to the expiration of the minimum service period.

Tie Line

A channel connecting two private branch exchange systems, two Centrex systems or a private branch exchange system and a Centrex system.

Trunk Line

A central office line terminating in a private branch exchange system, certain automatic call distributor and answering service systems or other switching equipment that utilizes pooled line facilities.

Unauthorized Attachment or Connection

Any customer-provided terminal equipment, communications systems or accessory which is attached to the facilities of the Telephone Company contrary to the provision of the tariff.

MAIN TELEPHONE EXCHANGE SERVICE

I. Within the exchange area:
One party service is furnished.

II. MONTHLY EXCHANGE RATES
Unlimited Service:

	Residence	Business
1-Party	$9.72	$22.35

III. EXTENDED LOCAL SERVICE

The local service area of the Dunbarton exchange is extended to include the Concord, Goffstown and Suncook exchanges of Bell Atlantic, the Weare exchange of Granite State Telephone Inc., and the Contoocook exchange of Merrimack County Telephone Company.

IV. TRUNK LINES

Business 150% of the one-party business rate shall apply per line.

Residence One-party residence rate shall apply per line.

MAIN TELEPHONE EXCHANGE SERVICE (continued)

IV. MUNICIPAL CALLING SERVICE

A. Municipal Calling Service is a service arrangement provided on a non-optional basis to municipalities served by more than one exchange where toll charges would normally apply to calls between exchanges.

B. All dial station-to-station service within a munipality is not chargeable as toll when technically feasible except for tolls originating from pay telephones.

c. Our Dunbarton exchange serves part of the munipality of Goffstown.

MUNICIPALITY	SERVING A PORTION OF
Dunbarton	Goffstown

PAY TELEPHONE LINE SERVICE

I. GENERAL

A. Pay Telephone Line exchange service is one-party exchange service for use by pay telephone providers, location owners and interexchange carriers and is furnished solely for connection with coin, coinless, or combination coin/coinless pay telephone equipment to the Telephone Company's network.

B. Pay Telephone Line Service

1. Will be considered a business service for the purpose of applying the terms, rates and conditions found in this Tariff.

2. Directory listings may be provided under the regulations that govern the furnishing of listings for business customers.

3. One directory will be distributed to the customer without charge for each Pay Telephone Line.

4. Only one coin-operated or coinless public access telephone unit may be connected to each Pay Telephone Line.

5. The customer is responsible for the provision of booths, shelves, directories and all other ancillary equipment.

6. Will be provided on a dial-tone-first basis to enable end users to dial certain calls without requiring coin deposits, i.e., all emergency calls, telecommunications relay service calls, and non-sent paid calls.

7. The pay telephone provider is responsible for meeting all federal, state and local statutes with respect to provision of pay telephones in accordance with all hearing impaired and handicapped person requirements.

8. Pay telephones connected to a Pay Telephone Line must be registered in compliance with Part 68 of the FCC's Rules and Regulations.

PAY TELEPHONE LINE SERVICE (Cont'd)

I. GENERAL (Cont'd)

B. Pay Telephone Line Service (Cont'd)

9. Each pay telephone connected to a Pay Telephone Line must be capable of providing user call completion to 911 service.

10. The customer shall be responsible for the payment of charges for all local and toll messages originating from or accepted at this type of service, including any Directory Assistance calls. The company shall not be liable for shortages of coins collected and deposited at the customer's paystation instrument.

11. Failure of subscriber to comply with provisions of this Tariff may result in the suspension or disconnection of the subscriber's service.

II. REGULATIONS AND RATES

A. Pay Telephone Line Service is provided at the one-party business line rate as contained in the Telephone Company's Tariff P.U.C. - N.H. - No. 5.

B. Line Connection charges listed in this Tariff apply to Pay Telephone Line Service, if requested by the customer.

C. Requests to Directory Assistance Service originated from Paystations will be charged the applicable rate of the Directory Assistance Service Provider.

D. All subscribers to Pay Telephone Service shall have the right to select their presubscribed intraLATA toll provider.

E. The Multiline Business Subscriber Line charge, found in the interstate access tariff, is applicable to all paystation access lines.

PAY TELEPHONE LINE SERVICE (Cont'd)

III. AVAILABLE FEATURES FOR PAY TELEPHONE SERVICE

A. Optional coin supervision functions, as listed below are provided at the monthly rates stated.

1. Coin-Supervision Additive — provided for the collection, return, recognition, announcements and pre-prompting for overtime; monitors signals from the pay telephone equipment to identify when and what denomination of coins are deposited; identifies the status of attempted calls and sends a signal to the pay telephone equipment to collect the appropriated coins when calls are completed, or returns coins when calls are not completed.

B. Rates:

	Monthly	Non-recurring
1. Coin Supervision Additive	$2.21	N/A

PUBLIC EMERGENCY CALL RECEIVING SERVICE

I. GENERAL

A. Public Emergency Call Receiving Service is intended for use by Fire Departments and emergency organizations of like nature in small community dial office areas, where, because of lack of continuous attendance at headquarters, it is desirable to have telephones at a number of locations for the purpose of receiving emergency calls.

B. The service consists of an exchange line and associated special telephones at designated locations. Generally, a minimum of two and, because of transmission limitations, a maximum of six emergency call receiving telephones are connected to the exchange line.

C. All public emergency call receiving telephones are arranged to ring simultaneously on calls incoming to the number listed for the service. The telephones are restricted to the receipt of calls. They are not equipped with dials.

D. The exchange facilities, if desired, may be arranged for signal service. Special keys can be provided at specified locations to actuate one or more signal control relays which in turn operate the siren or sirens, which are furnished by the customer.

E. Regular telephone service is required at each premise where a public emergency call receiving telephone is located.

PUBLIC EMERGENCY CALL RECEIVING SERVICE (continued)

II. RATES AND CHARGES

A. The rural line residence rate applies for each main public emergency call receiving telephone.

The applicable service connection charges are those shown in Section 4.

B. Signal Service

	Monthly Rates
1. Between buildings, not on the same continuous property:	
a. Two-point channels, both points within the base rate area	$5.00
b. Multi-point channels - Points in excess of those charged for in (a) preceding, within the base rate area, each	2.50
c. Points outside the base rate area - For mileage charges see Section 3, Sheet D-1 .	
2. Between buildings on the same continuous property:	
Each building-to-building portion per quarter airline mile or fraction thereof	.50
Minimum charge for channel	1.00
3. Signal Equipment	
a. Signal key, per key	.25
b. For signal control relays, charges apply as indicated in Section 3, Sheet J-1 of this tariff.	

C. Non-Recurring Charges

1. Installation Charges:
A charge of $5.00 applies per point of termination for installing a channel.

2. Move Charges:
A charge of $5.00 applies per point of termination for a subsequent move of a channel termination.

LOCAL EXCHANGE SERVICE MILEAGE

Mileage charges previously on this page have been deleted.

DIRECTORY LISTINGS

I. GENERAL

A. The rates and regulations for directory listings apply only to the listings in the alphabetical directory.

B. Directory listings are intended solely as an aid to the use of the telephone system; and therefore, listings are limited to such information as is essential to the identification of the listed party. The listing of a service, comodity or trade name as such, will in no case be permitted unless the name of the service or of the comodity or the trade name is the name or an integral part of the name under which the customer is doing business.

C. A listing will be limited to one line in the directory, except where in the judgement of the Telephone Company more than one line is required to properly identify the customer. In such cases, the additional lines required will be provided at no extra cost.

D. Directory listings must conform to the Telephone Company's specifications with respect to its directories.

E. Listing services are available with all classes of main telephone exchange services.

F. Dual name listings are available for residence service customers as an initial or additional listing.

II. INITIAL LISTINGS

A. One listing, termed the initial listing is included with each customer's service, with the initial line of a line hunting group, and with each joint user service.

B. Dual name initial listings consist of:

1. The first name, or first name and middle initial, or first initial and middle name, or initials only of two individuals who have the same surname and reside at the same address.

2. The first name, or first name and middle initial, or first initial and middle name, or initials only, and the married name of a woman.

3. Two names for one person, who may be referred to be either, with the same surname.

Initial dual name listings will be alphabetical by the surname and the first given name or initials.

Issued: December 28, 1977

Issued by: D.B.Montgomery
Title: Manager

III. ADDITIONAL LISTING SERVICE

A. Additional listings are confined to the names of those who are entitled to use the customer's service as defined in Part 1.

B. Additional listings are included in the alphabetical directory and on directory assistance records or appear on directory assistance records only.

C. Additional dual name listings, provided in conjunction with the initial listing, list the second name (or initials) first and the listing is alphabetized accordingly in the Directory; in this case billing always commences with the directory delivery date of the issue of the directory in which the listing first appears.

D. The rate for an additional listing or dual name additional listing provided for names that are not part of the initial listing, dates from the day after the directory assistance records are posted. Directory assistance records are posted either as of the delivery date of the issue of the directory in which the listing first appears or at any earlier practicable date selected by the customer.

E. If the additional listing is ordered discontinued after the closing date of the directory, the charge continues through that issue of the directory and up to the date for charges to be effective for the next directory. If the additional listing is ordered discontinued before the closing date of the directory in which it would first appear, the charge continues only to the date of cancellation by the customer with a minimum service period of one month.

NOTE: The Directory Listing Service Charge will not apply for Dual Name Listing requests.

IV. NONPUBLISHED SERVICE

A. Nonpublished service is not listed in the Telephone Company's directories or on directory assistance records.

B. Listing information (name, address and number) on nonpublished service is not available to the general public notwithstanding any claim of emergency the calling party may present.

Issued: December 28, 1977 Issued by: D.B.Montgomery

Effective January 31, 1978 Title: Manager

C. No liability for damages arising from publishing the telephone number of nonpublished service in the directory or by the disclosing of said number to any person shall be attached to the Telephone Company, and where such a number is published in the directory, the Company's liability shall be limited to an amount not to exceed the amount of charges made for such nonpublished service, as indicated in VI below.

D. The customer indemnifies and saves the Telephone Company harmless against any claims for damages caused by the publication of the number of a nonpublished service or by the disclosure of said number to any person.

V. NONDIRECTORY LISTED SERVICE

A. Telephone numbers of nondirectory listed service are omitted or deleted from the Telephone Company's alphabetical directory.

B. Telephone numbers of nondirectory listed service will be carried in the Telephone Company's directory assistance and other records and will be given to any calling party.

VI. RATES AND CHARGES

		Monthly Rate	
		Res.	Bus.
A.	Additional listings, each	$1.13	$1.48
B.	Nonpublished Service	$2.97	$2.97
C.	Nondirectory Listed	$1.48	$1.48

TEMPORARY SUSPENSION OF SERVICE

I. GENERAL

A. Exchange service may be temporarily suspended and the customer's listing retained in the directory.

B. More than one period of temporary suspension may be permitted in any one calendar year provided at least one month's full rental shall be paid for service furnished between periods of temporary suspension. The reduction of rate on account of the temporary suspension service applies during a total of not more than six months in each calendar year.

C. The reduction of rate on account of the temporary suspension of service will not apply during the first month's period of service.

II. MONTHLY RATE

A. The monthly rate during the temporary suspension of service of each main telephone, together with all associated mileage, service and equipment, is 50% of the regular monthly rate -- minimum charge 50% of the regular rate for one month.

SEASON SERVICE

I. GENERAL

A. Season service regulations apply to the telephone service of all customers within the entire exchange.

II. REGULATIONS

A. When the service period includes any portion of the months of July or August, the minimum charge for all items of exchange service is equal to the charge for six months at the established monthly rate.

B. If a customer requests a change of service, the minimum charge is determined from the highest established monthly rates for the services furnished at any one time during July or August.

C. When service is retained for a period longer than six months, the charge for each additional month is at the established rates.

D. These season service regulations do not supersede the regulations for any service or equipment requiring a minimum service period of more than six months.

RESTORAL OF SERVICE

Service that has been temporarily interrupted for non-payment of bills will be restored upon payment of all service charges due or if the customer enters into a payment arrangement for the unpaid arrearage which satisfies the provision of Rule 1203.07 of the Public Utilities Commission's Code of Administrative Rules as if there had been no interruption. An additional charge of $8.00 is made for restoring service for each account. An account may consist of a main telephone including any other associated equipment, a main trunk with all additional trunks and associated equipment of a private line channel or service with any associated equipment.

BLOCKING OPTION

Seven-digit intraLATA toll blocking is available without charge for all customers who request it until January 10, 1995. Charges will also not apply if this blocking option is requested to be installed or removed within the first 60 days of the installation of a network access line.

The non-recurring charge that will apply after January 10, 1995 is Element 1b as listed in Section 4, Sheet 2 of this tariff.

TOLL BLOCKING SERVICE

Toll Blocking Service permits originated calls to be completed within the local exchange area only, and restricts 1+ and 7-digit direct dialed toll calls from completing outside the exchange boundaries.

The non-recurring charge that will apply is Element 1b as listed in Section 4, Sheet 2 of this tariff.

No recurring charge will apply.

SALE OF EMBEDDED EQUIPMENT

I. GENERAL

A. The embedded Single-Line Telephones and Speciality Products listed in Section 3 are offered for sale subject to availability.

B. Telephones and equipment sold by the Telephone Company are intended for use with the telecommunications network excluding coin services. Their use is subject to Part 68 of the Federal Communications Commission's Rules and Regulations.

C. The telephones and equipment, other than those purchased in-place, are available for inspection and sale at the Telephone Company. If a customer does not choose to visit the Telephone Company, Direct Delivery Service can be provided, and standard service charges specified in Section 4 will apply.

II. REGULATIONS

A. Title and risk of loss or damage pass to the customer upon delivery of the equipment to the customer or his agent or when the customer notifies the Company that the offer to purchase in place equipment is accepted under the terms and conditions of this section.

Upon the customer's taking title to the equipment sold under this tariff, the Telephone Company bears no liability for the repair or replacement of the equipment, except as herein provided. Equipment sold by the Telephone Company is warranteed as specified in this section. Copies of the warranties are available at the Telephone Company.

B. At the expiration of the warranty, repairs will be charged for.

C. Customers may bring or mail equipment needing repair to, and may pick up replacement cords and equipment at, the Telephone Company during established working hours and call for equipment at the same location when repairs are completed. As an option, repaired equipment can be shipped to the customer at his expense.

D. The selling price, per item sold, does not include charges for associated services or equipment. Such charges and Service Charges as found in Section 4 may apply.

SALE OF EMBEDDED EQUIPMENT

II. REGULATIONS (Continued)

E. Telephones and Specialty Products other than those purchased in-place, may be returned for refund during the specified refund periods providing that they are undamaged, unused or unaltered and in the original packing case. The amount of such a refund will be equal to the purchase price paid by the customer excluding any shipping, handling or mailing charges.

F. Single-Line Telephones are available subject to supply and other than those purchased in-place are available for sale and inspection at the Telephone Company. This offering excludes the sale of single-line telephones connected to or used with Semi-Public Services, and are offered on a monthly basis at rates and charges specified elsewhere in this Tariff.

G. Repairs may require replacing the defective equipment with one from inventory. Replacements may be reconditioned.

The Company may refuse to replace defective equipment if, in the opinion of the Company, the equipment is not reasonably repairable.

III. WARRANTIES

A. Single-Line Telephones and Specialty Products purchased either from inventory or in-place are warranteed by the Telephone Company for a period of 30 days from the date of purchase.

For Single-Line Telephones and Specialty Products this warranty is limited to the electrical components and required labor to properly repair them. Except where hardwired, equipment must be returned to the company for repair or a Premises Visit charge will apply.

IV. RETURNS

Single-Line Telephones and Specialty Products, purchased from inventory, can be returned to the Telephone Company for refund within 10 days from the date of purchase provided that the returned product is undamaged, unaltered and in the original packing case. The amount of the refund is equal to the purchase price paid excluding any shipping, handling, or mailing charges. Single-Line Telephones and Specialty Products sold in-place are not eligible for refund.

SALE OF EMBEDDED EQUIPMENT

SALE OF EMBEDDED EQUIPMENT

V. RATES AND CHARGES

The following rates and charges do not include charges for associated services or equipment. Payment for embedded equipment sold under this section shall be accomplished by one of the following options:

1. Payment in full at time of purchase
2. Special Installment Billing Program for inplace telephones

A $5.00 Transaction Fee shall be applied to the Special Installment Billing Program option.
A $5.00 charge will be added to the cost of inventory phones for reconditioning.

SALE OF EMBEDDED EQUIPMENT

SALE OF EMBEDDED EQUIPMENT

V. RATES AND CHARGES (Continued)

B. Specialty Products

Prices for the sale of Specialty Products shall be negotiated based upon the Net Book Value then in effect plus any costs incurred for reconditioning as appropriate.

1. Volume-Control Telephone Equipment
2. Inside Extension Bells
3. Outside Extension Bells
4. Panel Phone
5. Two-Line Phones

C. Special Installment Billing for Inplace Telephones and Equipment

Monthly charges as found in Section 3, Sheets J2 and J3, will be applied for fourteen months as the purchase price for all inplace telephones and equipment unless the customer pays in full at one time or returns the equipment within 30 days after being notified.

VI. DISCONTINUANCE OF SERVICE

A. If a customer terminates his service prior to completion of payments for the equipment he will be billed the full purchase price less any payments made to date.

B. If a customer's service is disconnected for non-payment of bill before all monthly payments for the equipment are made, he will be billed the full purchase price less any payments made to date.

C. Seasonal customers described in Section 3, Sheet G-1 will be billed the full purchase price, less any payments already made, when disconnected for the season.

TOUCH CALLING SERVICE

TOUCH-CALLING SERVICE & EQUIPMENT

I. GENERAL

A. TOUCH-CALLING service provides for initiating calls using instruments equipped for tone-type signalling along with special office facilities.

B. This service is available on both business and resident telephones.

II. RATES AND CHARGES

A. TOUCH-CALLING service is included in the resident and business rates at no extra charge.

B. There are no charges for customer-provided equipment.

CUSTOM CALLING SERVICES

I. GENERAL

A. Custom Calling Services are available to one-party residence or business customers (except for pay telephone line service) to the extent that facilities are available.

B. When a call is forwarded to another exchange where a toll charge is incurred, the toll charge for the forwarded call will be billed to the Custom Calling Service customer.

C. No assurance can be given that transmission will be fully satisfactory during Call Forward and Three Way Calling Service calls.

II. CUSTOM CALLING FEATURES

A. **Call Waiting** signals a customer talking on a line that another call has been placed to the line. The customer may answer the second call and alternate between the calls by manipulating the switchhook. The customer may prevent, on a per call basis, any incoming calls from Call Waiting on their line. Incoming calls to the station receive busy treatment. This ensures that Call Waiting indication tones do not interrupt important calls or disrupt data transmissions.

B. **Call Forward** permits a customer to forward all incoming calls to another preselected telephone number. The customer activates the service by dialing a code and the telephone number of the line to which the calls are to be forwarded. Call Forward, Remote Access can be added to this feature.

C. **User Programmable Call Forward, Busy** provides forwarding capability to incoming calls that encounter a busy state. The forwarded to directory number is programmed by the customer by dialing an access code followed by the number. Call Forward, Remote Access can be added to this feature.

D. **User Programmable Call Forward, No Answer** provides forwarding capability to incoming calls that encounter a no answer state. The forwarded to directory number is programmed by the customer by dialing an access code followed by the number. The customer also programs the number of rings before transfer to designate a no answer state. Call Forward, Remote Access can be added to this feature.

E. **User Programmable Call Forward, Busy/No Answer** provides forwarding capability to incoming calls that encounter a busy or no answer state. The forwarded to directory number is programmed by the customer by dialing an access code followed by the number. The customer also programs the number of rings before transfer to designate a no answer state. Call Forward, Remote Access can be added to this feature.

CUSTOM CALLING SERVICES (Continued)

F. **Call Forward, Remote Access** permits a customer to activate or deactivate the Call Forward, User Programmable Call Forward, Busy, User Programmable Call Forward, No Answer or User Programmable Call Forward Busy/No Answer feature on their telephone via DTMF tones from a local or toll remote station. The customer accesses the system by dialing a base directory number, their own directory number, followed by a Personal Identification Number (PIN) and activation/deactivation codes. The Call Forward, User Programmable Call Forward, Busy, User Programmable Call Forward, No Answer or User Programmable Call Forward Busy/No Answer, feature is required on the customers line.

G. **Fixed Call Forwarding - Telephone Company Administrable** allows the customer to have all calls to their directory number forwarded to a fixed number. The fixed number is administrable only by the Telephone Company.

H. **Three-Way Calling** allows a customer to establish a talking connection involving the customer and two other parties. The customer, by switchhook operation, is able to place an existing call on hold and dial the telephone number of a third party.

I. **Speed Calling (8 codes)** allows a customer to call a predesignated seven or ten digit telephone number by dialing a one digit code. A maximum of 8 predesignated telephone numbers can be stored.

J. **Speed Calling (30 codes)** allows a customer to call a predesignated seven or ten digit telephone number by dialing a two digit code. A maximum of 30 predesignated telephone numbers can be stored.

K. **Teen Service** allows two telephone numbers to be assigned to a single party line. Each telephone number is assigned a unique ringing pattern so the called party can determine the nature of the call. Each number may be assigned separate Call Waiting, Call Forwarding, and/or User Programmable Call Forward, Busy/No Answer features.

L. **Ring Again** service allows the customer encountering a busy station within the Dunbarton exchange to be notified when the busy station becomes idle and to be placed automatically in the ring again mode. If the redialed telephone number is busy, the called line is monitored for a maximum of 30 minutes. After hearing the Ring Again notification signal, the customer goes offhook and the switch places the call. If the customer does not go off hook within 30 seconds the Ring Again request is cancelled.

CUSTOM CALLING SERVICES (Continued)

CUSTOM LOCAL AREA SIGNALING (CLASS) SERVICES

I. GENERAL

A. CLASS service consists of a set of call management features which utilize the network's ability to forward the calling party's telephone number between the originating and terminating central offices. CLASS depends on the availability of Signaling System 7 (SS7).

B. CLASS service features are available to one party residence and one party business main telephone exchange service (except PBX trunks, pay telephone line service, foreign exchange and foreign central office services), Universal Emergency Number Service - "911" customers served by suitably equipped central offices where facilities are available. In addition, both the subscriber to the service and the other party involved in the call must either be served from the same central office or served from different central offices which are linked by SS7 facilities.

C. Calling Number Delivery Per Call Blocking is an originating option that allows customers to control the disclosure of their directory number on a call by call basis. When activated, the option precludes the originating customer's telephone number from being displayed on the terminating customer's Caller ID display device. Activation is accomplished by the calling party dialing an activation code prior to initiating a call. Per Call blocking is available to one party residence and one party business customers. Per Call blocking is not furnished for pay telephone line service, toll access trunk lines, nor PBX trunks. There are no charges associated with Per Call blocking.

D.

1. Calling Number Delivery Line Blocking (Line Blocking) allows customers to automatically block the disclosure of their directory number on all originating calls. The option precludes the originating customer's telephone number from being displayed on the terminating customer's Caller ID display device. The customer can override the automatic blocking on a per call basis by dialing an activation code prior to initiating a call.

2. Line Blocking is available free of charge to Non Published and Non Directory Listed customers and to Domestic Violence Agencies, their staff, volunteers and safe houses. Line Blocking is also available free of charge to other customers that submit a written request to the Telephone Company asserting a specific need for line blocking for reasons of health or safety. Line Blocking is available at no charge to all other customers for the period of 30 days prior to and 60 days following the introduction of Calling Number Delivery service. Customers requesting Line Blocking after that period will incur a service charge unless they send a written request to the Telephone Company requesting Line Blocking for reasons of health or safety. Line Blocking is available to one party residence and one party business customers. Line Blocking is not furnished for pay telephone line service, toll access trunk lines, nor PBX trunks. There is no monthly charge associated with Line Blocking.

CUSTOM LOCAL AREA SIGNALING (CLASS) SERVICES (Continued)

E. CLASS service features are not available when the customer completes or receives a call utilizing an interexchange carrier's facilities.

F. Satisfactory provision of CLASS service features requires technically compatible customer provided premises equipment.

G. The Telephone Company shall not be liable for failure of CLASS service features, for whatever reason, except when due to gross negligence or willful misconduct of the Telephone Company.

II. SERVICE DESCRIPTIONS

A. **Automatic Call Back** - automatically monitors and redials the telephone number of the most recent outgoing call. If the redialed telephone number is idle, the call completes immediately. If the redialed telephone number is busy, the called line is monitored for a maximum of 30 minutes. When the called line becomes idle, a distinctive ringing signal alerts the calling customer that the number is available and the call can be completed. The activation of this feature can be cancelled by the customer when desired.

The following types of calls cannot be automatically redialed:

Calls to 800 service numbers
Calls to 900 service numbers
Calls preceded by an interexchange carrier access code
Calls made on an International Direct Distance Dialed basis
Calls to Directory Assistance Service
Calls to universal emergency number service (911)
Calls made with operator assistance.

B. **Calling Number Delivery** provides the originating telephone number, the date, and the time of an incoming call in the period between the first and second telephone ring. The information is displayed on a customer provided compatible display device attached to the customer's telephone line.

C **Customer Originated Trace** allows a customer to trace the most recent incoming call by dialing a code immediately after terminating the call. The Telephone Company's central office equipment records and stores the incoming call message detail (date, time, and originating telephone number of the call) provided that the call was completed over a suitably equipped facility and the customer has not received another call after the call to be traced was terminated. The results of the trace are not provided to the customer directly. Call details can be obtained by an appropriate law enforcement agency when the customer files a complaint.

D. **Selective Call Forwarding** allows customers to define a list of calling directory numbers that will be forwarded to a designated remote directory number. Any calling numbers not on that list are treated normally. Customers can review and change the list of accepted directory numbers as desired.

CUSTOM LOCAL AREA SIGNALING (CLASS) SERVICES (Continued)

E. **Selective Call Rejection** allows customers to define a list of calling directory numbers that will be routed to announcements and rejected. Any calling numbers not on that list are treated normally. Customers can review and change the list of rejected directory numbers as desired.

F. **Selective Call Acceptance** allows customers to define a list of calling directory numbers that will be accepted. Any calling numbers not on that list are routed to announcement and rejected. Customers can review and change the list of accepted directory numbers as desired.

G. **Distinctive Ringing/Call Waiting** allows customers to define a list of calling directory numbers that provide the customer with special incoming call treatment. Incoming calls on the list are indicated by a distinctive ringing pattern or a distinctive Call Waiting tone, if applicable. Terminating calls from telephone numbers which cannot be identified, or which are not on the list, are given standard treatment. Customers can review and change the list of accepted directory numbers as desired.

H. **Calling Number and Calling Name Delivery** provides the name and number associated in the Telephone Company's records with the line from which an incoming call originates, including names and numbers associated with nonpublished and nonlisted service. The name and the calling number are displayed on customer provided premises equipment attached to the customer's telephone line. Per call blocking and line blocking will prohibit the display of both name and number.

I. **Caller ID with Call Waiting** allows a customer who is offhook on an existing call to receive the Caller ID (number only or number and name) information for a new, incoming call allowing the customer to decide the disposition of the call in progress. The Customer must subscribe separately to Call Waiting to take full advantage of this service. Three way calling is optional, depending on the functionality desired. The customer is required to purchase customer premises equipment that is capable of displaying Caller ID with Call Waiting information, in addition to facilitating disposition options.

J. **Call Return** automatically redials the telephone number of the most recent incoming call. If the telephone number of the most recent incoming call is idle, the call completes immediately. If the telephone number is busy, the line of the most recent incoming call is monitored for a maximum of 30 minutes. When the line becomes idle, a distinctive ringing signal alerts the subscriber that the call can now be completed. The following types of calls cannot be returned:

Calls from PBX station lines
Calls from DID station lines
Calls from lines equipped with Line Blocking
Calls from lines which have activated Per Call Blocking

CUSTOM LOCAL AREA SIGNALING (CLASS) SERVICES (Continued)

II. SERVICE DESCRIPTIONS (continued)

K. **Anonymous Call Rejection** allows a customer to redirect incoming calls for which calling name and number display has been suppressed through the use of per call or line blocking, to an announcement indicating that the customer is not presently accepting such calls. The customer may activate and deactivate the feature without charge by dialing a code.

Upon receiving the anonymous call rejection announcement, the calling party may either reverse the blocking status of his/her line and redial or elect not to redial the call.

Anonymous Call Rejection is provided automatically to customers subscribing to Calling Number Delivery, Calling Number and Calling Name Delivery, and Caller ID with Call Waiting. Anonymous Call Rejection initially will be provided in a deactivated state.

III. RATES AND CHARGES

A. The following rates and charges for both residential and business customers are in addition to all other applicable rates and charges for services and equipment furnished.

B. Customers subscribing to Customer Originated Trace are subject to an activation charge each time a call is successfully traced.

C. Nonrecurring charges do not apply for the first application of Line Blocking to a customer's line for the period of 30 days prior to 60 days after the introduction of Calling Number Delivery. The nonrecurring element 1b charge listed in Section 4, Sheet 2 applies for any subsequent application of Line Blocking to that line unless the customer sends a letter to the Telephone Company requesting Line Blocking for reasons of health or safety or the customer has Non Published or Non Directory Listed service.

D. Call Return and Automatic Call Back are available on a monthly charge basis or on a per activation basis to customers served by a suitably equipped central office. The activation charge applies each time the feature is successfully activated. Activation charges do not apply when the customer elects call return and/or automatic call back on a monthly charge basis.

E. RATES AND CHARGES

	Monthly Rate
1. Automatic Call Back Each line equipped.....	$2.25
2. Calling Number Delivery each line equipped.....	4.95

CUSTOM LOCAL AREA SIGNALING (CLASS) SERVICES (Continued)

III. RATES AND CHARGES (Continued)

		Per Activation
3.	Customer Originated Trace each line equipped	3.25

		Monthly Rate
4.	Selective Call Forwarding each line equipped	2.25
5.	Selective Call Rejection each line equipped	2.25
6.	Selective Call Acceptance each line equipped	2.25
7.	Distinctive Ringing/Call Waiting each line equipped	2.25
8.	Calling Number and Calling Name Delivery each line equipped	5.95
9.	Caller ID (number only) with Call Waiting each line equipped	4.95
10.	Caller ID (number and name) with Call Waiting each line equipped	5.95
11.	Call Return each line equipped	2.25

		Per Activation
12.	Call Return each line equipped	.50
13.	Automatic Call Back each line equipped	.50

OTHER SERVICES

I. DIRECT INWARD DIALING (DID) SERVICE

A. General

1. Direct Inward Dialing (DID) Service permits incoming dialed calls from the exchange network to reach a specific station line without the assistance of an attendant. DID Service is furnished subject to the availability of facilities.

2. DID Service is furnished for use with compatible customer premises equipment subject to the regulations specified in Section 4.

3. The rates and charges specified herein are in addition to applicable Service Charges, as specified in Section 4, and to the rates and charges for associated services and equipment.

B. Regulations

1. DID Service is designed for voice communications, not for the transmission of data. Data transmission is not guaranteed over the facilities equipped with DID.

2. All DID calls must be routed over the same trunk group. Trunk lines arranged for DID service may not be mixed in a trunk group with trunk lines not arranged for DID Service.

3. The Telephone Company accepts no responsibility for reserving telephone numbers to be used at a future time. If the provision of additional service necessitate telephone number changes, Service and Equipment Charges apply.

4. The customer is responsible for providing interception of calls to vacant or non-working assigned station lines or telephone numbers by means of attendant intercept or a recorded announcement.

5. DID Service is furnished upon the condition that a customer must subscribe to adequate facilities (e.g. trunks, circuit packs, etc.) to permit use of the service without injurious effect on general telephone service.

C. Rates and Charges

The following rates and charges are in addition to trunk line rates, as specified in Section 2.

	Service and Equipment Charges	Monthly Rates
Per trunk equipped		
1-10 trunks, each	$42.56	$89.05
11 or more trunks, each	42.56	44.53
Per 100 number group, or fraction thereof	26.76	37.40

DIGITAL SERVICES

I. DS1 1.544 MEGABITS PER SECOND (Mbps) DIGITAL SERVICE

A. General

1. DS1 digital service is provided only where facilities are available and is subject to the technical limitations of the digital equipment used by the Telephone Company.

2. DS1 digital service consists of two point digital channels and equipment which provide for simultaneous two way transmission of serial, bipolar, return to zero, digital signals at a transmission speed of 1.544 Mbps.

3. DS1 digital service is designed to provide an average performance of at least 98.75% error free seconds of transmission measured over a continuous 24 hour period.

4. Central Office (C.O.) Multiplexing may be provided from suitably equipped Multiplexing Hubs as defined in B following. The customer is responsible for the assignment of individual channels within the multiplexer and for maintaining records for those assignments. Customer provided multiplexing equipment must conform with the electrical requirements for channel units specified in NYNEX Technical Reference Publication 43801 and Compatibility Bulletin 119.

DIGITAL SERVICES

B. Definitions

Bit - The smallest unit of information in the binary system of notation.

Channel Service Unit Function - Denotes equipment which performs the functions of:

1. Proper termination of a circuit
2. regeneration of signals
3. recognition and correction of signal format errors
4. remote loop back.

DS1 to Digital Multiplexer - A service provided by the Telephone Company at central offices, designated as Multiplexing Hubs, that converts a 1.544 Mbps channel to 24 channels for use with digital private line service.

DS1 to Voice Multiplexer - A service provided by the Telephone Company at central offices, designated as Multiplexing Hubs, that converts a 1.544 Mbps channel to 24 channels for use with voice grade service.

Intermediate Hub - Denotes a wire center, that provides multiplexing, which can serve itself and one or more wire centers within the LATA. In this Intermediate Hub (wire center) a 1.544 Mbps channel can be multiplexed and the individual channels terminated at customer designated premises located within the local serving area of each wire center.

Interoffice Channel - A 1.544 Mbps path for digital transmission between central offices.

Intra Central Office Distribution Channel - A 1.544 Mbps path for digital transmission to connect a local distribution channel or interoffice channel central office based service.

Local Distribution Channel - A 1.544 Mbps path for digital transmission between the customer's premises and the serving central office.

DIGITAL SERVICES

Definitions (Continued)

Multiplexing - The act of combining a number of individual channels for transmission over a common transmission path.

Multiplexing Hub - A Telephone Company designated central office at which multiplexing functions are performed.

Terminus Hub - Denotes a wire center in which a 1.544 Mbps channel can be multiplexed to 24 channels. A terminus Hub serves only customers in the wire center in which the multiplexing is performed.

C. Provision of Service

1. DS1 digital service is provided on a two point basis only between customer designated premises or between a customer designated premises and a Telephone Company designated central office or between designated Telephone Company central offices. The central office multiplexing capability is provided by a C.O. multiplexer at designated Multiplexing Hubs which converts a 1.544 Mbps channel to 24 channels for use with voice grade services and/or analog data services or to 24 channels for use with digital services.

2. DS1 digital service is furnished on a full time basis, 24 hours a day, 7 days a week.

3. The minimum service period for DS1 digital service is three months.

D. Allowance for Interruptions

1. When the service is interrupted for thirty minutes or more a credit allowance will be made for the portion of the service which is affected, provided that the interruption is brought to the attention of the Telephone Company within ten days. For the purpose of determining the amount of allowance, every month is considered to have thirty days.

2. Interruptions credited to the customer at the proportionate monthly contract charge in half hour multiples for each half hour or major fraction thereof of interruption.

DIGITAL SERVICES

Allowance for Interruptions (Continued)

3. No credit allowance will be made for interruptions to service:

   a. of less than thirty minutes

   b. due to negligence of the customer or authorized user

   c. due to the failure of equipment provided by the customer or authorized user

   d. which continue due to the failure of the customer to authorize replacement of any element of special construction. The period during which no credit allowance will be made begins on the seventh day after the customer receives the Company's notification of the need for replacement and ends on the day after the company receives the customer's authorization for replacement.

E. Mileage Measurements

1. Mileage used to determine the rate for a local distribution channel is the airline distance measured, in ½ mile increments, directly between the customer's premises and the serving central office.

2. Mileage used to determine the rate for an interoffice channel is the airline distance measured, in 1 mile increments, directly between the serving central offices, or between a serving central office and the Telephone Company Multiplexing Hub.

F. Service Functions

1. Service functions are optional features or arrangements that are available for use with DS1 digital service.

DIGITAL SERVICES

Service Functions (Continued)

2. Central Office Multiplexing - DS1 to Voice

Central Office Multiplexing - DS1 to Voice allows for up to 24 individual voice grade or analog data private lines on a channelized basis for use with a 1.544 Mbps circuit. This function is offered for the same customer at Multiplexing Hubs. The voice grade private lines are provided as:

a. Private line voice (PLT)
b. Private line analog data
c. PBX stations off premises (SOP's)
d. PBX tie lines
e. Centrex tie lines and SOP's
f. Foreign Exchange

3. Central Office Multiplexing - DS1 to Digital

Central Office Multiplexing - DS1 to Digital allows for up to 24 individual digital private lines to be derived from a 1.544 Mbps circuit. This function is offered for the same customer at Multiplexing Hubs.

4. Clear Channel Capability (CCC)

Clear Channel Capability provides a Bipolar with Eight Zero Substitution (B8ZS) encoding technique that allows a customer to transport 1.536 Mbps information rate signals over a 1.544 Mbps High Capacity Channel with no constraint on the quantity or sequence of ones (mark) and zero (space) bits. This arrangement allows customers to derive 64 kbps clear channels. This service is provided only on 1.544 Mbps High Capacity Channels between two customer designated premises and is subject to availability of facilities. This arrangement requires the customer provided multiplexing equipment to be compatible with the B8ZS line code.

G. Rates and Charges

The following rates and charges are in addition to applicable Service Charges, as specified in Section 4.

1. Basic Service

		Service and Equipment Charges	Monthly Rates
a.	Local distribution channel, each	$710.00	$170.00
	first ½ mile or fraction thereof	-	50.00
	each additional ½ mile or fraction thereof	-	15.00
b.	Intra-central office distribution channel	130.00	65.00

c. Inter-central office channel

Mileage Bands	Service and Equipment Charges*	Monthly Rates Fixed	Monthly Rates Per Mile
Over 0 to 4	$100.00	$ 80.00	$24.00
Over 4 to 8	100.00	90.00	23.00
Over 8 to 25	100.00	100.00	22.00
Over 25 to 50	100.00	120.00	21.00
Over 50	100.00	125.00	20.00

* Applies when the inter-central office channel is connected at the same time as the local distribution channel(s), per inter-central office channel.

	Service and Equipment Charges
When the inter-central office channel is installed without the associated local distribution channel(s), in addition to the Service and Equipment Charge of $100.00 the following applies, per inter-central office channel.....	$300.00

d. Optional Service Functions

	Service and Equipment Charges	Monthly Rates
1. C.O. Multiplexing (DS1 to Voice) Per arrangement.....	$265.00	$150.00
(a) Voice grade connections from the C.O. multiplexer to a premises served by the same central office (other than as specified in b. following) each:		
(1) Series 2000		
(A) Type 2001.....	155.00	35.00
(B) Type 2001A.....	175.00	40.00
(C) Type 2001B.....	230.00	50.00
(2) Series 3000, analog data		
(A) Type 3002.....	255.00	50.00
(b) Voice grade connections, between the C.O. multiplexer and Foreign Exchange Service, in the same serving central office, each.....	95.00	10.00
(c) Rates and charges for voice grade connections to the C.O. multiplexer to a customer premises or a Foreign Exchange Service in a different serving central office are provided as Series 2000 and 3000 channels as specified in Part B, Section 2 of the NYNEX NHPUC No. 77 Tariff.		

	Service and Equipment Charges	Monthly Rates
2. C.O. Multiplexing (DS1 to Digital) Per arrangement.....	$265.00	$150.00
3. Clear Channel Capability		
- Per DS1 1.544 Mbps two point circuit		
- installed coincident with initial installation of service	-	-
- installed subsequent to the installation of service.....	$435.00	-

DIGITAL SERVICES

I. SWITCHED 56 KILOBIT PER SECOND(Kbps) SERVICE

A. General

1. Switched 56 service provides full duplex, synchronous information transport via a specially equipped measured access line.

2. Switched 56 service is provided only where facilities are available. The provision of Switched 56 service is subject to the availability of such facilities and does not create an obligation of the Telephone Company to construct facilities except as provided in Section 4. Switched 56 service is subject to the technical limitations of the equipment used by the Telephone Company

3. Switched 56 connections are made by the customer, using normal dialing procedures for a local or for a toll call. Two point connections only may be established at any one time.

4. Switched 56 service may be used for the transmission of data communications to or from any station with similar service.

DIGITAL SERVICES

B. Definitions

Measured Access Line - A two point measured, switched digital transmission path between the customer's premises and the customer's serving wire center. A Switched 56 measured access line is a nonloaded metallic facility. The provision of this line is dependent on the technical and transmission limitations of a metallic circuit operating at 56 kbps. Such limitations include, but are not limited to, a maximum loop length of 18,000 feet between the customer's premises and the serving wire center.

Service Arrangement - An arrangement consisting of hardware and software located at Telephone Company designated Switched 56 wire center that is necessary to provide Switched 56 service.

Network Call Usage - The rates applicable for the chargeable time which contains the initial period charges or the initial period and overtime charges.

DIGITAL SERVICES

C. Responsibility of the Telephone Company

1. When an application for service is canceled or changed in whole or in part by the applicant prior to completion of construction and installation, the regulations in Section 1 apply.

2. For any complete failure of switched 56 service which continues for more than 24 hours, credit will be applied according to Section 1.

3. Switched 56 service is not subject to a temporary suspension of service.

D. Responsibility of the Customer

1. The customer shall provide terminal equipment compatible with Switched 56 service.

E. Regulations

1. The minimum period for which service is furnished and for which charges are applicable is one month.

2. Charges for a fractional part of a month which follows, and is consecutive with, a full month will be the monthly charge times the number of days of service divided by 30.

F. Application of Rates and Charges

1. Service charges, including those for moves and changes, apply in addition to the charges for Switched 56 service specified herein.

2. All network usage is timed and measured. Chargeable time begins when the connection is established between the calling party station and the called party. Chargeable time ends when the network connection is released.

3. Charges for calls within the local service area will be determined based on the actual time of each call for each minute or fraction thereof.

DIGITAL SERVICES

Application of Rates and Charges (Continued)

4. Charges for each call outside the local service area will be determined based on the actual time of each call in one second increments. At the end of the customer's billing period when the total charges for usage would result in fractions of a cent being billed, the total will be rounded to the nearest cent for billing purposes.

5. The local service area of each exchange consists of the serving exchange and the additional exchanges included in any extended local service areas or any municipal calling service areas.

6. Calls may be completed to points within the local service area, subject to call establishment and call connection charges. For calls within the local service area, a 50% discount applies on calls made from 9:00PM to, but not including, 9:00AM weekdays and all day on Saturdays, Sundays, and on New Year's Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

7. Calls may be completed to locations outside of the customer's local service area during all time periods. Charges for calls are at rates per message, and rates per minute, per second. Charges vary according to the time period of the call.

   A. The Day period rate is subject to a credit, based on usage, when usage exceeds 480 minutes. Day rates apply Mondays through Fridays from 8:00AM to, but not including, 5:00PM.

   B. Evening rates apply Sundays through Fridays from 5:00PM to, but not including, 11:00PM. On New Year's Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day the holiday rate is the evening rate. Evening rates apply, unless a lower rate would normally apply.

   C. Night and weekend rates apply Sundays through Thursdays from 11:00PM to, but not including, 8:00AM of the following day, and from 11:00PM Fridays to, but not including, 5:00PM Sundays.

DIGITAL SERVICES

G. Rates and Charges

The following rates and charges are in addition to applicable Service Charges, as specified in Section 4.

1. **Basic Service**

		Service and Equipment Charges	Monthly Rates
a.	Measured Access Line, each	$380.00	$ 20.00
b.	Service Arrangement	-	25.00

2. **Network Call Usage**

A. Local Service Area

1. Call Establishment	$0.04	per call or per message
2. Connection	$0.03	per minute or fraction thereof

B. Outside Local Service Area

1. Call Establishment - All Time Periods	$0.02	per call or per message
2. Connection - Day	$0.24	per minute plus
	$0.0040	per second for fractional part of a minute

DIGITAL SERVICES

Rates and Charges (continued)

3. Connection - Evening

$0.15	per minute plus
$0.0025	per second for fractional part of a minute

4. Connection - Weekend

$0.10	per minute plus
$0.0017	per second for fractional part of a minute

3. **Network Call Usage Credit**

A. Local Service Area

1. Credit -
A 50% discount applies to calls made from 9:00PM to, but not including, 9:00AM weekdays, and all day on Saturdays, Sundays, New Year's Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

B. Outside Local Service Area

1. Credit - Day

a. 0 to 480 minutes	No Credit
b. 481 to 4800 minutes	$0.11 per minute
C. Over 4800 minutes	$0.14 per minute

DIGITAL SERVICES

I. 56 KILOBIT PER SECOND(Kbps) SERVICE

A. Definitions

Bit - The smallest unit of information in the binary system of notation.

Digital Service Center - The wire center to which local distribution channels, interoffice channels and interdigital service center channels are connected in the digital service center area where access to the service is provided.

Digital Service Center Area - A specific geographic area in the digital service center.

Serving Wire Center - The office from which a customer would be served for local exchange telephone service.

B. Description

1. 56 Kilobit service provides full duplex, synchronous information transport at speeds of 2.4, 4.8, 9.6, or 56 Kbps within a Local Access and Transport Area (LATA).

2. 56 Kilobit service is provided only where facilities are available. The provision of 56 Kilobit service is subject to the availability of such facilities and does not create an obligation of the Telephone Company to construct facilities except as provided in Section 4. 56 Kilobit service is subject to the technical limitations of the equipment used by the Telephone Company.

C. Service Options

1. Two Station Service - This offering may consist of two local distribution channels in the same digital service center, or two local distribution channels furnished in different wire centers within the digital service center area requiring an interoffice channel or two local distribution channels located in two different digital service center areas requiring an interdigital service center channel and interoffice channels if applicable.

DIGITAL SERVICES

C. Service Options (con't.)

2. Multi Station Service - This offering consists of connections of three or more stations from a designated multi station digital service center and provides the capability to connect multiple stations at a designated multi station digital service center. All stations must operate at the same transmission speed.

D. Service Components

1. Local Distribution Channel - A two point digital transmission path between the customer's premises and the serving wire center.

2. Interoffice Channel - A two point transmission path between a serving wire center and a designated digital service center where 56 Kilobit capability is available. The mileage for interoffice channels is based on airline distance using V and H coordinates between the serving wire center and the digital service center.

3. Interdigital Service Center Channel - A two point transmission path between two different digital service centers. The mileage for interdigital service center channels is based on the airline distance using V and H coordinates between digital service centers.

E. Responsibility of the Telephone Company

1. When an application for service is canceled or changed in whole or in part by the applicant prior to completion of construction and installation, the regulations in Section 1 apply.

2. For any complete failure of 56 Kilobit service which continues for more than 24 hours, credit will be applied according to Section 1.

3. 56 Kilobit service is not subject to a temporary suspension of service.

DIGITAL SERVICES

F. Responsibility of the Customer

1. The customer shall provide terminal equipment compatible with 56 Kilobit service.

G. Regulations

1. 56 Kilobit service may be used for the transmission of data communications to or from the customer or authorized user and relating directly to the customer's or authorized user's business.

2. 56 Kilobit service may be used for the transmission of data communications relating directly to the business of a subsidiary corporation over which the customer exercises control.

3. The service furnished under this tariff shall not be used by other than the customer or authorized user or for any purpose or in any manner directly or indirectly in violation or the law or in aid of any unlawful act or undertaking.

4. The minimum period for which service is furnished and for which charges are applicable is one month.

5. Charges for a fractional part of a month which follows, and is consecutive with, a full month will be the monthly charge times the number of days of service divided by 30.

6. Where suitable facilities are not available for the provision of service as ordered by the customer or unusual expenditures are involved, special construction charges may apply.

DIGITAL SERVICES

H. Application of Rates and Charges

1. Service charges, including those for moves, changes and premises visit charges shall apply in addition to the charges for 56 Kilobit service specified herein.

2. In addition to the nonrecurring and monthly rates for service, premises visit charges apply as appropriate.

3. A Multi Station Arrangement is required for each station on a service arranged for multi station operation.

4. Premises visit charges apply for the move of digital local channels.

5. Charges for a change in digital local channels are the same as for a new installation.

DIGITAL SERVICES

I. Rates and Charges

The following rates and charges are in addition to Premises Visit Charges, as specified in Section 4.

1. **Local Distribution Channels**

		Service and Equipment Charges	Monthly Rates
a.	2.4 Kbps each	$380.00	$ 107.50
b.	4.8 Kbps each	$380.00	$ 107.50
c.	9.6 Kbps each	$380.00	$ 107.50
d.	56 Kbps each	$380.00	$ 250.00

2. **Interoffice Channels**

		Service and Equipment Charges	Monthly Rates	Mileage Charge /ch./mi./mo.
a.	2.4 Kbps each	$35.00	$ 10.25	$6.50
b.	4.8 Kbps each	$35.00	$ 10.25	$6.50
c.	9.6 Kbps each	$35.00	$ 10.25	$6.50
d.	56 Kbps each	$35.00	$ 10.25	$11.50

DIGITAL SERVICES

I. Rates and Charges (con't.)

3. **Interdigital Service Center Channels**

		Service and Equipment Charges	Monthly Rates	Mileage Charge /ch./mi./mo.
a.	2.4 Kbps each	$26.00	$ 27.50	$6.50
b.	4.8 Kbps each	$26.00	$ 27.50	$6.50
c.	9.6 Kbps each	$26.00	$ 27.50	$6.50
d.	56 Kbps each	$26.00	$ 27.50	$11.50

4. **Multi Station Arrangement**

		Service and Equipment Charges	Monthly Rates
a.	each	$28.00	$ 43.00

VOICE MAIL SERVICES

I. GENERAL

A. Voice Mail Service is offered as a supplement to residential and business one party main telephone exchange service.

B. All toll charges incurred through the use of Voice Mail Service will be billed to the Voice Mail Service customer.

II. SERVICE OPTIONS

A. **Voice Mail Basic** gives customers basic voice mail service and allows storage of up to 7 messages (new or saved) for 7 days. Messages are automatically erased after 7 days. Maximum message length is 1 minute. One mail box is provisioned with this service.

B. **Voice Mail Enhanced** gives customers basic voice mail service and allows storage of up to 30 messages (new or saved) for 30 days. Messages are automatically erased after 30 days. Maximum message length is 2 minutes. One mail box is provisioned with this service.

C. **Additional Mailboxes** gives the customer up to 4 additional mailboxes that correspond to his/her main telephone number.

D. **Auto Attendant** provides voice prompt questions that guide the caller, via a menu, to the correct individual or function.

III. RATES AND CHARGES

A. The following rates and charges are in addition to all other applicable rates and charges for services and equipment furnished.

B. RATES AND CHARGES

		Monthly Rate
1.	Voice Mail Basic.....	3.95
2.	Voice Mail Enhanced.....	5.95
3.	Additional Mail Boxes - per set of 4	7.45
4.	Auto Attendant	4.00

SERVICE CHARGES

I. GENERAL

A. The term "SERVICE CHARGE" as specified herein and in other Sections of this Tariff is defined as a charge or charges applying to the ordering, installing, moving, changing rearranging or furnishing of telephone service, miscellaneous and supplemental equipment and other facilities. Service Charges are categorized as (1) Service Order Charge, (2) Central Office Charge, (3) Line Connection Charge, (4) Premise Work Charge.

B. SERVICE CHARGES

1. Service Order Charge
   The term Service Order Charge means the charge that applies per customer request for work performed by the Telephone Company in connection with the receiving, recording and processing of customer requests for service.
2. Central Office Charge
   The term Central Office Charge means the charge that applies for programming and/or making and changing connections in the central office.
3. Line Connection Charge
   The term Line Connection Charge means the charge that applies for making and changing connections in distribution facilities between the central office and the customer's premises.
4. Premise Work Charge
   The term Premise Work Charge means the charge that applies for a visit to the customer's premises to perform work requested by the customer, other than new installations or disconnect work. When more than one visit is necessary, for Telephone Company reasons, to complete the work, only one Premise Work Charge applies.

SERVICE CHARGES (continued)

C. REGULATIONS

1. Service Charges are in addition to all other rates and charges that may be applicable for service provided by the Telephone Company. Other rates and charges include, but are not limited to, One-Time Charges and Nonrecurring Charges.

2. One or more of the above service charges may not be applicable to a request or the associated work functions if the request results in the partial or complete disconnection of service or if particular work function is optional at the discretion of the Company.

3. All connection to the Telephone Network shall be made through standard plugs and modular jacks.

D. SERVICE CHARGE SCHEDULE FOR BUSINESS AND RESIDENCE SERVICE

1.	Service Order Charges	
	a. Initial	$ 24.00
	b. Subsequent	5.00
	c. Record Order	6.00
2.	Central Office Charge	10.00
3.	Line Connection Charge	5.00
4.	Premise Work Charge per customer request	20.00

SERVICE CHARGES (continued)

E. MOVE and CHANGE CHARGES

1. General
Except as provided elsewhere in this tariff, the charges specified herein apply to moves and changes of facilities on the same premises of a customer.

No charges are made to change from one basic service to a higher grade of basic service. In addition, no #1 Service Charge is made for requests which result in a change in records which primarily benefit the Company.

The aggregate charges for moves and changes done at the same time shall not exceed the charge that would apply if the services were removed and installed anew.

2. CHARGES

a. Moves
If a customer requests a change of location of the drop wire, protector and/or Network Interface Device, ...The charge is based on cost not to exceed the termination and service charges that would apply if the facilities moved were removed and installed anew, except that if the customer elects to continue under the existingminimum service period the charge is the entire cost of the move.

b. Rewires
For a rearrangement in the termination of a line .....Service Charges as specified in this Section, apply.

SERVICE CHARGES (continued)

c. Maintenance of Service Call Charge
The customer shall be responsible for the payment of all charges for visits by the Telephone Company to the premises of the customer or authorized or joint users where the service difficulty or trouble report results from use of equipment, wiring or facilities provided by the customer or his authorized users or joint users.

Per service visit.....Elements one and four apply

F. Lifeline Program

1. Lifeline is an assistance program which provides for qualifying low-income customers a monthly credit toward one residential network access line per household at the customer's principal place of residence.

2. The applicant must participate in at least one of the following assistance programs:

   Medicaid
   Food Stamps
   Supplemental Security Income (SSI)
   Federal Public Housing Assistance
   Low Income Home Energy Assistance.

   The applicant must, at the time of application, certify under penalty of perjury receipt of benefits from at least one of the above assistance programs, identify the programs(s) from which the customer receives assistance, and agree to notify the Company when the customer ceases to receive such assistance.

3. Eligible customers are those that meet the following criteria:

   a. Must be receiving aid from at least one of the assistance programs listed in I.F.2. above.

   b. Must be the billed party for the residential network access line to which the credit is to be applied.

4. The credit to the network access line provided by this program is applicable only to the monthly rate of one residential network access line at the customer's principal place of residence. The credit will equal $1.75 or the tariffed rate for the network access line to which the credit will apply, whichever is less.

F. Lifeline Program (Continued)

5. Eligible customers receiving the Lifeline credit will not be charged the End User Common Line Charge (EUCL) as per NECA Tariff FCC - No. 5, 4.6.7.(A).

6. The service of an eligible customer receiving the Lifeline credit may not be disconnected for non-payment of toll charges unless a waiver of this provision is granted by the Commission.

7. An eligible customer who elects toll blocking shall not be required to provide a service deposit in order to initiate the Lifeline credit.

G. Link-Up New Hampshire Program

1. Link-Up New Hampshire is a connection assistance plan that provides reduced Service Charges for low-income households for one residential network access line per household at the principal place of residence.

2. The applicant must participate in at least one of the following assistance programs:

   Medicaid
   Food Stamps
   Supplemental Security Income (SSI)
   Federal Public Housing Assistance
   Low Income Home Energy Assistance.

   The applicant must, at the time of application, certify under penalty of perjury receipt of benefits from at least one of the above assistance programs, and identify the programs(s) from which the customer receives assistance.

3. Eligible customers must be receiving aid from at least one of the assistance programs listed in I.G.2. above.

4. The reduction in Service Charges provided by this program is applicable only to Element Charges for the initial installation of a residential network access line. The reduction is equal to 50% or one-half of such amount, not to exceed $30.00.

Connection with Customer Premises Wiring

I. General

A. Customer Premises Wiring includes all Customer Premises Inside Wire (CPIW), previously installed by the Telephone Company and associated with both simple and complex services; Customer Provided Inside Wiring (CPPW), associated with complex systems; and Customer Owned Inside Wiring (COPW), installed by customers for non-complex residence and business services.

B. All customers or third parties hired by customers, may provide and install premises wiring as set forth in this tariff, associated with both complex and non-complex (simple) telecommunications services provided by the Telephone Company.

C. Connection of Customer Premises Wiring to the telecommunications network, shall in all cases, be accomplished through a Network Interface Device or equivalent FCC registered jack, that is located on or within the customers premises on the customer side of the Telephone Company protector.

D. The Network Interface Device shall be, in all instances, the property of the Telephone Company and shall be installed as part of the Network Access Line. The Network Interface Device or equivalent FCC registered jack shall serve as the point of Demarcation, so called, between the facilities of the Telephone Company and the facilities of the customer.

In the absence of a FCC approved Network Interface Device or jack in lieu of a standard network interface, premises wire is construed to be that wire which is located on the customer's side of the Telephone Company protector. In all instances, access to the protector is limited to Telephone Company personnel.

E. A customer who provides, maintains, or attempts to maintain customer premises wire assumes the risk of loss of service, damage to property, or death to or injury of the customer or the customer's agent. The customer saves the Telephone Company harmless from any and all liability, claims or damage suits arising out of the customer's wire provision or maintenance activity.

II REGULATIONS

A. Customer premises wire may be connected to exchange, private lir and WATS services furnished by or through the Telephone Company.

B. The network interface for the connection of customer premises wi is provided as part of the Network Access Line. The Network Interface Device is normally installed outside the customer's premises at a location determined by the Telephone Company, whic is accessible to the customer. If, at the customers request, the network interface is extended beyond the location designated by the company as normal, charges as set forth in Section 4 apply.

C. As part of it's program to comply with the FCC rules on deregulation of inside wire, the Telephone Company will install Network Interface Devices in locations where they are not curren installed as follows:

1. As part of installation of Network Access Lines

2. As part of the re-installation of Network Access Lines

3. As part of any Premises Maintenance Visit, other than thc made as part of troubles arising form natural disasters c emergencies, where the priority concern is to restore service to large numbers of customers.

D. When the company installs a Network Interface Device as part of Premise Maintenance Visit, where the problem is found to have be caused by faulty equipment or wiring for which the customer is responsible, there will be no charge for the installation.

When a customer requests a Premises Maintenance Visit by company personnel at a location where an approved Network Interface Devi is in-place, and the problem is found to have been caused by faulty equipment or wiring for which the customer is responsible appropriate Section 4 Service Charges will apply.

E. When the company is requested by the customer to install a Netwc Interface Device at a time other than those outlined above, appropriate Section 4 Service Charges will apply.

Issued: August 29, 1986

Effective: January 1, 1987

D. B. Montgomery, Manager

CONSTRUCTION CHARGES

I. GENERAL

A. The regulations specified in II, III, IV and V, following apply for main telephone exchange and private branch exchange services and for private lin service between points not on the same continuous property.

B. The Telephone Company places either aerial or underground construction and determines in each case the normal type of construction to be used to furnish service. If another type of construction is required, such as submarine cable or radio, or if service is desired at remote locations, the provision in this section governing Special Conditions, the regulations in this Tariff pertaining to Hazardous or Inaccessible Locations, or other established Telephone Company practices and procedures apply.

C. When a service specified in A. above is extended to another building on the same continuous property of a customer, or when a private line service is furnished exclusively between points on the same premises, the construction is furnished in accordance with regulations specified in Section 3.

D. If the furnishing of facilities and service involves a special assembly, a special installation, or disproportionately large construction, maintenance or replacement costs, or expenses on the part of the Telephone Company, charges for the construction are determined in accordance with the Special Conditions provisions in this Section.

E. If within one year of the time when a special construction charge for highway or private property construction has been incurred, conditions change so that the whole or a part of the charge should be assumed either by a new customer or by the Telephone Company, an equitable refund will be made.

F. Pole line costs, referenced in this tariff, are based on the current charges on file with the Public Utilities Commission.

G. Highway construction furnished under the conditions specified in I and II is the property of the Telephone Company and will be maintained and replaced by the Company at its expense. The Telephone Company at its expense will furnish, own, and maintain the associated circuit construction.

II. HIGHWAY CONSTRUCTION

A. Where no general distribution plant exists, the Company will provide, without a special construction charge, 3/10 of a mile (route measurement) of normal type construction for each customer to be served. Construction in excess of this allowance for joint ownership will be provided at the full pole line cost. Where attachment to facilities of another wire-using company will be provided, the attachment charge incurred by the Company will be assumed by the customer(s). These charges will be prorated among all customers to be served by the proposed construction.

CONSTRUCTION CHARGES (Continued)

II. HIGHWAY CONSTRUCTION (continued)

B. Where general distribution plant exists, the Telephone Company will furnish all required construction of normal type on general distributing plant already occupied by lines of the Telephone Company unless other customers along such facilities are entitled to refund of highway special constructic charges, incurred during the previous year. Where refunds are involved, such construction is treated as new construction in accordance with Paragraphs A. above and I E. preceding.

C. The minimum service period is one year for service involving an extension o highway construction or the use of an extension of highway construction built during the preceding year. If service is being transferred, an unexpired minimum service period may be assumed by a second customer.

D. When a customer is so located that it is necessary to use a private right-o way to furnish service and the Company is unable to obtain the required right-of-way without cost, the customer is required to pay the entire costs involved in securing such right-of-way.

III. PRIVATE PROPERTY CONSTRUCTION

A. GENERAL

1. Aerial or underground telephone construction located on private property is considered private property construction, the cost of which will be assumed by the customer or prorated among all customers to be served by the proposed construction and occupying the same such private property, and is subject to the regulations in B. and C. following.

2. That portion of construction on private property which within one year from the date of installation of telephone service, has been accepted as a municipally-owned and maintained road is furnished under the regulations applicable to Highway Construction as shown in II. preceding.

3. The principal location for residence service customers is considered to be the main office on the premises of the customer, except that where private branch exchange is furnished, the principal location is considered to be the building in which the private branch exchange switching equipment is located.

4. The principal location for business service customers is considered to be the main office on the premises of the customer, except that where private branch exchange service is furnished, the principal location is considered to be the building in which the private branch exchange switching equipment is located.

CONSTRUCTION CHARGES

III. PRIVATE PROPERTY CONSTRUCTION (Continued)

B. POLE CONSTRUCTION

Poles on private property to service the customer(s) principal location are subject to the regulations below.

1. If a pole line suitable either for telephone occupancy or joint occupancy with another wire-using company is built by the Telephone Company, the Telephone Company furnishes the first pole for each customer without charge and the customer(s) assumes the cost of any additional pole line costs. Such construction shall be the property of the Telephone Company and shall be maintained and replaced by the Company at its expense. The Telephone Company at its expense will furnish, own and maintain the associated circuit construction.

2. If the Telephone Company is required to furnish telephone service through joint ownership in a pole line of another wire-using company, the pole line cost, beyond the first pole for each customer, will be charged to the customer or prorated among all customers to be served. Where attachment charges are incurred by the Company, these charges, beyond the first pole for each customer, will be assumed by the customer or prorated among all customers. The Telephone Company at its expense will furnish, own and maintain the associated circuit construction.

3. If a pole line suitable for telephone occupancy is built by the customer(s) requesting service the entire line cost of construction, future maintenance and replacement will be assumed by the customer(s). The pole line shall be constructed in a manner acceptable to the Telephone Company, and will be the property of the customer(s). The Telephone Company at its expense will furnish, own and maintain the associated circuit construction.

4. The customer(s) shall assume the expense of maintenance and replacements made necessary by any act of the customer(s) or representatives of the customer(s) or by circumstances over which they have control.

5. The minimum service period is one year for service which involves pole line construction on private property.

C. UNDERGROUND CONSTRUCTION

Underground construction on private property to serve the customer(s) principal location is subject to the following regulations:

1. When the Company determines that the normal type of construction is underground:

CONSTRUCTION CHARGES (Continued)

III. PRIVATE PROPERTY CONSTRUCTION (Continued)

C. UNDERGROUND CONSTRUCTION (Continued)

a. For underground wire or cable construction of a type not requiring conduit, the Telephone Company furnishes without charge all trench work for a maximum route distance of 400 feet on private property. Trench work in excess of the maximum allowance is furnished at the expense of the customer(s). Excess construction may be built either by the Telephone Company or by the customer(s) under Telephone Company supervision and in conformity with Company engineering specifications. The customer(s) assumes the cost of providing a suitable entrance into the building.

b. For underground conduit construction, the Telephone Company furnishes trench work in accordance with a. preceding. The customer(s) assumes the cost of conduit material to be placed by the Telephone Company at its expense. The customer(s) assumes the cost of providing a suitable entrance into the building.

2. When the company determines that the normal type of construction is aerial but underground construction is built at the request of the customer:

a. For underground wire or cable construction of a type not requiring conduit:

(1) First 200 feet route measurement - the customer assumes full cost of trench work.

(2) Beyond 200 feet route measurement - the customer assumes full cost of trench work, less a credit of one pole based on the current pole line cost.

(3) The customer assumes the cost of providing a suitable entrance into the building.

b. For underground conduit construction:

(1) First 200 feet route measurement - the customer assumes full cost of all trench work and conduit material.

(2) Beyond 200 feet route measurement - the customer assumes the full cost of all trench work and conduit material, less a credit of one pole based on the current pole line cost.

(3) The customer assumes the cost of providing a suitable entrance into the building.

CONSTRUCTION CHARGES (Continued)

III. PRIVATE PROPERTY CONSTRUCTION (Continued)

C. UNDERGROUND CONSTRUCTION (Continued)

2. (Continued)

c. The construction work in 2.a. and 2.b. preceding may be built eith by the Telephone Company or by the customer(s) under Telephone Company supervision and in conformity with Company engineering specifications. The Telephone Company does not make any credit allowances where construction is built by the customer.

3. The minimum service period is one year for service provided in accordance with the preceding where the circuit distance is in excess 200 feet route measurement and the Telephone Company has assumed all o part of, or has given the customer(s) credits against, the cost of underground construction in excess of 200 feet.

IV. MAINTENANCE AND REPLACEMENT OF CIRCUIT AND CONDUIT CONSTRUCTION

A. Circuit construction furnished under III, C. preceding is furnished, owned and maintained by the Telephone Company. Any necessary trench or conduit work in connection with maintenance and replacement is done at Telephone Company expense.

B. If the rendering of access to the conduits, provided under III, C. preceding, is unusually expensive, the customer(s) is required to bear the unusual expense incurred in opening and closing the trench in connection with maintenance and replacement or to provide service over a new route.

C. The customer(s) assumes the expense of maintenance and replacement of circuit construction, provided under III, C. preceding, made necessary by some act of the customer or his representative, or by circumstances over which the customer(s) has control.

V. SPECIAL CONDITIONS

A. If customer(s) within the exchange area desires or requires a form of highway or private property construction that is of higher cost than that which normally would be placed, or if because of the obviously temporary nature of the service the construction cost is disproportionately large in comparison with the estimated revenue, special construction charges apply t cover the excess costs.

B. If a special installation involving special construction is made on behalf of the customer(s), or if the cost involved is disproportionately large in comparison with the estimated revenue, charges based on costs apply, in addition to Service Charges specified in Section 3. If there is considerable cost involved for design and installation, service is furnishe subject to a minimum revenue guarantee for at least twelve months service. If a special installation request is cancelled, a processing fee may apply for the expense incurred in engineering the service arrangement.

CONSTRUCTION CHARGES (Continued)

V. SPECIAL CONDITIONS (Continued)

C. For a change in construction not provided for in this schedule, charges based on cost apply.

D. If conditions change so that the whole or a part of a special construction charge previously paid by a customer(s), as provided in Paragraphs B. and C preceding, is assumed either by a new customer(s) or by the Telephone Company, an equitable refund will be made.

ATTACHMENT A

EFFECTIVE September 15, 198

DUNBARTON TELEPHONE COMPANY

CONSTRUCTION PRICE LIST

Price/pole:

Joint owned	-	$390/pole
Solely owned	-	$780/pole

Price/ 1/10 of a mile (route measurement):

Joint Owned	-	$ 895/ 1/10 mile
Solely Owned	-	$1,785/ 1/10 mile

Underground Construction:

Where underground construction is involved, the charge to the customer will be based c the actual construction charge incurred by the Telephone Company, less any applicable allowance.

TOLL SERVICE

1. For all calls originating in this Company and interchanged with the New England Telephone and Telegraph Company, rates and regulations of the New England Telephone and Telegraph Company will apply.

MAR 2 7 1992

SELECTIVE CALLING SERVICE

A. GENERAL

1. Selective Calling Service is no longer available. Selective Calling Service installed prior to January 20, 1992 is furnished to existing customers at present locations only, with existing or fewer exchanges or localities.

2. Selective Calling Service is offered as a Message Toll Service and all rates and regulations of the New England Telephone Company as filed in their tariff currently in effect for New Hampshire shall govern and apply. The following regulations are filed to inform our customers of the service provided and will conform in all respects to those of New England Telephone Company.

3. Selective Calling Service is offered, subject to availability of facilities, as a supplement to a one- and two-party residence or business main telephone exchange service or to trunk lines in the exchanges listed in D. following.

4. Selective Calling Service is offered to business customers provided that all lines at the same premises are arranged for Selective Calling Service with the same selected exchanges or localities.

5. This service permits customer-dialed Station-to-Station calling at discounted rates to a maximum of ten exchanges or localities selected by the customer, outside the local service area, but within the State of New Hampshire LATA, not exceeding twenty-two air line miles. Exchanges and localities included in each Selective Calling area are listed in D. following.

6. Selective Calling Service rates apply during certain time periods to customer dialed station-to-station sent paid calls and operator completed station-to-station sent paid calls if facilities are not available for customer-dial completion. The rates also apply to operator completed station-to-station sent paid calls for handicapped persons unable to dial calls because of their handicap. All other calls, including calls made outside the specified time periods, are charged for at the current rates specified in Part A, Section 9 of the New England Telephone Company tariff for New Hampshire.

To be implemented on March 20, 1992.

SELECTIVE CALLING SERVICE

A. GENERAL (CONTINUED)

7. The Selective Calling Service usage discount applies during the following time periods:

   a. Mondays through Fridays.....From 12:00 Noon to, but not including 9:00 AM.

   b. All day on Saturdays, Sundays, and on Thanksgiving Day (the fourth Thursday in November), Christmas Day (December 25), New Year's Day (January 1), Independence Day (July 4), and on Labor Day.

B. MONTHLY RATES AND USAGE DISCOUNT

Selective Calling Service rates are in addition to the rates and charges for the associated main telephone exchange service, other associated services and the Section 4 Service Charge, as appropriate. Recurring monthly rates for Selective Calling Service will be charged in accordance with New England Telephone Company's tariff as specified in Part A, Section 9.

C. LIMITATIONS OF SERVICE

Selective Calling Service is not available

- on foreign exchange service or public access line service

- for person-to-person, collect, charge to a Calling Card number, charge to a third telephone number, conference, or other calls which normally require an operator.

To be implemented on March 20, 1992.

Switched Access for Use with Custom Network Services

Dunbarton Telephone Company concurs with NHPUC No. 78, a tariff filed by New England Telephone and Telegraph Company effective September 18, 1987. The subject matter of the tariff is Switched Access for Use with Custom Network Services and covers the regulations, rates and charges associated with that service.

There are two exceptions to our concurrence. First, any reference in NHPUC - No. 78 to NET F.C.C. No. 40 should be replaced by a reference to NECA F.C.C. No. 1, with the exception of the reference in Section 4.3.2 (13) relative to the nonrecurring charge. Secondly, Section 6, Operating Territory, would be limited to the territory of Dunbarton Telephone Company, as referenced elsewhere in this tariff.

Part M - Section 2 - All Pages

2. Services in the aforementioned tariff sections are offered in suitably equipped central offices to the extent that existing facilities are available.

NHPUC No. 5 - Telephone

Dunbarton Telephone Company

Dunbarton, New Hampshire

SUPPLEMENT NO. 1

TARIFF

for

TELEPHONE SERVICE

Effective in the Towns of

Dunbarton - Bow - Grasmere

DR84-253 Ord. 17,206

Issued:	August 15, 1984	Issued By:	D. B. Montgomery
Effective:	September 17, 1984	Title:	Manager

This supplement provides for conformance with the Federal Communications Commissions First Report and Order in Docket 84-182 concerning Customer Owned Premises Wiring dated April 26, 1984.

CUSTOMER OWNED PREMISES WIRING

Parties other than the Telephone Company may provide and install one and two-line business and residential non-system Customer Owned Premises Wiring.

In all cases where Customer Owned Premises Wiring is installed the Telephone Company shall install a Network Interface Device. The Network Interface Device will be the "Demarcation Point" between the facilities owned and provided by the Telephone Company and those owned and provided by the customer and will be installed on the customer's side of the Telephone Company provided protector on the exterior of the building. All Network Interface Devices installed by the Telephone Company will include a standard modular jack as required by the Federal Communications Commission for purposes of testing Telephone Company provided facilities by the customer.

All applicable service charges specified elsewhere in this tariff shall apply for the establishment and rearrangement of service.
