# DW 04-048

Staff Request to Pennichuck Water Works; Pittsfield Aqueduct Company, Inc.; Pennichuck East Utility, Inc.; and Pennichuck Corporation

Date of Reque		May 4, 2006 Staff 4-22	Date of Response: Witness:	May 22, 2006 John Guastella
REQUEST:	Regar	ding PWW's supple	mental response to Nashua 3-1	1:
			nary of the common assets repl n costs assigned to each;	aced as a result of
			e common assets are used by P ome combination thereof;	EU only, PAC
		ease indicate the spe ing of the assets of	ccific effect on cost of capital a PWW;	s a result of a
		ease indicate the ant visioned by this resp	icipated employee levels in the ponse; and	e scenario
		-	nal detail as to the increases pr gory and the reasons for those i	-
RESPONSE:	a)		unit price, and cost of the "com see the attached schedules:	mon assets
		transporta equipment communic	s Equipment (Work Schedule A tion equipment; tools, shop and ; laboratory furniture and equip tation equipment and general p I need to be replaced.	f garage pment;
		the compu	ative Equipment (Work Sched ter equipment, office equipme and fixtures that would need to	nt and office
		Schedule	t Facility (see the table at the b G, provided in response to Stat Street replacement cost of the s	ff 4-22(e) below) -

Pennichuck Water Works, Inc. DW 04-048 Response to Staff 4-22 Page 2 of 3

> \$1,059,111 based on the reproduction cost study performed by the Company's appraisal consultant and the cost of the land is \$300,000 based on acreage market value provided by a local land appraiser.

- b) The common assets would be shared by PEU, PAC and PWSC.
- c) The debt cost rates were derived from recent information from CoBank offering current rates in the range of 6.0 to 6.5 percent. In order to account for issuance fees and charges, the 6.5% cost rate was used in the financial projections for the restructured entity.

The equity cost rate of 11.5% used in the financial model was derived based on the recognition that smaller utilities are "riskier" by nature than larger utilities and the PUC's approval of an 11% ROE for PEU while affiliated with PWW. In recent years, allowed returns have been at a relatively low level. The return on equity I have used is reflective of more typical returns, given the long time period that my analysis is intended to cover.

d) The anticipated reductions of equivalent full-time employee are as follows:

	Current	Anticipated
Corporate Officers	5	3
HR Department	2	2
IT Department	3	2
Accounting	7	5
Customer Service	8	5
Engineering	8	4
Service Company	2	2
Operations-Supervision & Admin.	13.5	8.5
Operations-Field employees	28	15
Totals	76.5	46.5

- e) For the detail of projected O&M expenses, please see the attached schedules. Following the schedules is a narrative which explains the detailed analysis of expense projections.
  - 1. Expense Detail (Work Schedule C) Summary schedule of expenses by category for existing system by division with PWW, and projected expense results if PWW is taken.

23

Pennichuck Water Works, Inc. DW 04-048 Response to Staff 4-22 Page 2 of 3

- Supply & Distribution (Work Schedule D) Production and T&D expense detail schedule. This information supports the Expense Detail schedule.
- 3. Engineering and Customer Service (Work Schedule E) expense detail supporting the Expense Detail schedule.
- 4. Administrative and General (Work Schedule F) expense detail supporting the Expense Detail schedule.
- 5. Other Operating Expenses (Work Schedule G) Detailed schedule of operating expenses, other than O&M, supporting the Expense Detail schedule.
- 6. Narrative Description and explanation of O&M projections and resulting change to expense categories.

Pennichuck Water Works, Inc. DW 04-048 Staff 4-22 - Attachment 8 of 8 Narrative 7 Pages

# A. Water Supply and Distribution - O&M Expense Projections

Information provided by the Company was used to develop the operations departmental costs. The Company developed its projections by analyzing the direct (union employee) labor and labor hours devoted to the field work, meter reading, construction, maintenance, flushing, customer premise visits, etc. necessary to provide water service for PEU, PAC and PWSCO during 2005. The number of full time employees at various pay scales, the hours worked per employee, over-time hours, employee grades or levels necessary, employee benefits and payroll taxes were all factored into the Company's direct labor projections. The Company's direct labor projections are based on the need for 5 union employees in the Water Supply Department and 10 union employees in the Distribution Department.

The Company's projections of Water Supply Department non-labor expenses contain the following assumptions:

The purchased power costs are projected to remain at existing levels. The cost of chemicals is projected to increase based on the future inability to accommodate bulk volume delivery. A change to a lesser volume container delivery for chlorine and phosphate products would become necessary. Based on vendor information, chlorine would increase from \$.74 to \$2.43 per gallon and zinc ortho phosphate would increase from \$4.85 to \$8.00 per gallon. These price increases would result in \$21,811 and \$18,057 of higher chemical cost for PEU and PWSCO, respectively. The cost of materials, supplies, and equipment expenses would remain at existing levels, but would increase with the inclusion of \$13,000 of duty stand-by pay for one employee at \$250 per week.

The Company's projections of Distribution Department non-labor expenses contain the following assumptions:

The purchased power costs are projected to remain at existing levels. The projected materials, supplies, and equipment expenses are increased by 10% or \$5,649 and \$617 for PEU and PAC, respectively and no impact on PWSCO. This increase is based on lost purchasing power with vendor estimates of 10% to 15% due to orders of lesser volume. The other increase within this category of expense would reflect the inclusion of \$59,000 of duty stand-by pay for three employees at \$250 per week.

The Company provided projections that non-union supervision and technical personnel would decrease from 8 to 5 employees in the Water Supply Department and decrease from 5 full-time and one part-time to 3 full-time and one part-time employee in the Distribution Department. With this information, an Operations Labor Schedule was developed which shows the current allocation of operations labor and benefits by PWW and the projected operations labor and benefits without PWW. The projected non-union salaries are based on average existing wages by employee class and the projected total wages and benefits are spread to PEU, PAC, PWSCO and the real estate affiliate based on the percentages currently allocated by PWW as shown on the schedule. The total

operations labor costs without PWW developed on this Operations Labor Schedule are carried over to the Water Supply and Distribution Departmental Expense Schedule.

Existing transportation expenses within the Water Supply and Distribution Departments are currently allocated by PWW to its affiliated divisions. The projected expense levels without PWW are based on the need for 30 versus 60 vehicles, or 50% of the existing costs, and spread to the divisions based on the existing percentages of allocated PWW transportation expense with PWW excluded.

The Will Street-office supplies and expense within the Distribution Department are currently allocated by PWW to its affiliated divisions. The projected level of this expense is 50% of the existing cost without PWW. This projection is based on consideration of field personnel levels, number of customers, and pricing expectations. These projected costs are then spread to the divisions based on the existing relative percentage of allocated Will Street-office supplies and expenses by PWW.

# 1. Summary of Projected Water Supply Departmental O&M Expenses:

The PEU water supply costs are projected to increase by \$190,279. Non-union wages increase \$125,148; Union wages and benefits increase \$27,487; transportation expenses increase \$7,122; chemical costs increase \$21,811; and other expenses increase \$8,710.

The PAC water supply costs are projected to increase by \$29,015. Non-union wages increase \$16,252; Union wages and benefits increase \$9,749; transportation expenses increase \$935; and other expenses increase \$2,079.

The PWSCO water supply costs are projected to increase by \$69,080. Non-union wages increase \$29,700; Union wages and benefits increase \$17,436; transportation expenses increase \$1,677; chemical costs increase \$18,057; and other expenses increase \$2,210.

The Real Estate Affiliate share of allocated costs is projected to increase by \$7,782. Non-union wages increase \$7,370 and transportation expenses increase \$412.

### 2. Summary of Projected Water Distribution Departmental O&M Expenses:

The PEU water distribution costs are projected to increase by \$179,596. Non-union wages increase \$79,057; Union wages (including meter reading) and benefits increase \$17,494; transportation expenses increase \$37,310; Will Street supplies and expenses increase \$6,935; and other expenses increase \$38,800.

The PAC water distribution costs are projected to increase by \$25,516. Non-union wages increase \$10,248; Union wages (including meter reading) and benefits increase \$2,966; transportation expenses increase \$4,898; Will Street supplies and expenses increase \$937 and other expenses increase \$6,467.

The PWSCO water distribution costs are projected to increase by \$68,365. Non-union wages increase \$18,690; Union wages and benefits increase \$39,294; transportation expenses increase \$8,787; and Will Street supplies and expenses increase \$1,593.

The real estate affiliate's share of allocated costs is projected to increase by \$7,173. Nonunion wages increase \$4,638; transportation expenses increase \$2,161; and Will Street supplies and expenses increase \$375.

# **B.** Engineering - O&M Expense Projections

The personnel levels of the restructured Engineering Department are determined through discussion with PWW administrative personnel. The existing staff of one Department Manager, three Engineering Inspectors, two full-time and one part-time Draftsman, and an Administrative Assistant is reduced to one Manager, two Inspectors, and one Draftsman.

The existing engineering departmental expenses are \$396,999 consisting of \$384,394 for salaries, \$8,041 of departmental expenses, and \$4,563 of transportation costs. The staffing reductions result in projected salaries of \$229,000. The departmental expenses are projected at 70% of existing costs, or \$5,629, based on judgment (with consideration given for projected staff levels, lost purchasing power, etc.). Transportation costs are estimated at 75% of existing costs, or \$3,422 based on vehicular needs for a manager and two inspectors versus a manager and three inspectors. All Engineering Expenses are spread to PEU, PAC, PWSCO and the real estate affiliate at the same percentage as PWW allocated existing costs to the affiliated divisions.

### 1. Summary of Projected Engineering Departmental O&M Expenses:

The existing engineering costs for PEU of \$60,200, PAC of \$7,800, PWSCO of \$14,200 and the real estate affiliate of \$3,600 reflect only the allocation of salaries. PWW is absorbing the remaining salaries of \$298,594, plus \$8,041 of departmental expenses and \$4,563 of transportation costs.

The PEU engineering costs are projected to increase from \$60,200 to \$167,024. Salaries increase by \$100,474; departmental expense by \$3,949; and transportation costs by \$2,401.

The PAC engineering costs are projected to increase from \$7,800 to \$21,641. Salaries increase by \$13,018; departmental expense by \$512; and transportation costs by \$311.

The PWSCO engineering costs are projected to increase from \$14,200 to \$39,398. Salaries increase by \$23,700; departmental expense by \$932; and transportation costs by \$566. The real estate affiliate's share of allocated engineering costs is projected to increase from \$3,600 to \$9,988. Salaries increase by \$6,008; departmental expense by \$236; and transportation costs by \$144.

# C. Customer Service - O&M Expense Projections

The collection function is currently provided by one employee at an annual cost of \$67,803 with direct charges of \$56,893 to PWW, \$8,240 to PEU and \$2,670 to PAC. The projected annual expense of \$10,910 remains at the same level for PEU and PAC. The meter reading and meter reading transfers and exceptions expenses are removed from customer service departmental costs and are reflected in the direct (union) labor costs of the Water Distribution Department as presented in the Company's operation projections. The salaries of customer service employees are recorded and projected within the category of administrative office salaries.

The billing and accounting expense consists of the cost of materials, supplies and postage relating to the issuance of customer bills and notices, and cash receipts, customer correspondence and customer appointment activity. The customer service department provided information on the number of annual events for each of these functions by division. The existing divisional billing and accounting costs were analyzed by multiplying the number of bills issued at the cost of \$.21 per bill, the number of notices issued at the cost of \$.05 per notice and the number of bills and notices at the average postage cost of \$.35 as provided by the Company. The remaining costs represent the cost related to cash receipts, customer notes and appointments activities and are allocated based on the number of relative events for each division.

The Company anticipates the cost of bills and notices will increase by 10 to 12% based on lesser purchase volume per its vendors. The projected billing and accounting costs are derived by multiplying the number of bills issued at a cost of \$.235 per bill, notices at a cost of \$.055 per notice, and postage at a cost of \$.38 per bill and notice issued. All other billing and accounting costs are projected at to remain at existing levels.

The uncollectible accounts costs are projected to remain at existing levels.

# 1. Summary of Projected Customer Service Departmental O&M Expenses:

PEU's customer service costs, excluding meter reading, are projected to increase by \$11,248 based on the analysis of billing and accounting cost by event and anticipated increased costs for bills, notices and postage.

PAC's customer service costs, excluding meter reading, are projected to increase by \$9,127 based on the analysis of billing and accounting cost by event and anticipated increased costs for bills, notices and postage.

PWSCO's customer service costs, excluding meter reading, are projected to increase by \$5,350 based on the analysis of billing and accounting cost by event and anticipated increased costs for bills, notices and postage.

There are no customer service cost impacts on the real estate affiliate.

# D. Administrative and General - O&M Expense Projections

The Company provided a list of current Officers, administrative office, engineering, and service company personnel with annual salaries by position. They also provided a list of personnel needed under the corporate restructuring without the affiliation with PWW. This information is used to develop the projected administrative personnel costs. The existing 2005 salary levels are used for the development of projected salaries with certain positions eliminated under the restructuring proposal. The number of Officers is reduced from 5 to 3 positions with total salaries of \$403,000. The H.R. department remains at 2 positions with total salaries of \$121,000, but will require the administrative assistant to perform tasks for other departments. The I.T. department is reduced from 3 to 2 positions with total salaries of \$124,000. The accounting department is reduced from 7 to 5 positions with total salaries of \$297,000. The customer service department is reduced from 7 full-time and 1 part-time positions to 5 full-time positions with total salaries of \$204,000. The service company remains at 2 positions with total salaries of \$122,000, but will require the administrative assistant to perform tasks for other departments. The current Officers' salaries (\$975,398) and administrative office salaries (\$1,317,279) with PWW are allocated among all divisions. The projected Officers' salaries (\$403,000) and administrative office salaries (\$868,000) are spread to the remaining divisions based on the same relative percentage as PWW's current allocations.

Office supplies and expenses in the amount of \$15,093 are projected at the existing levels of \$5,693 in direct costs and \$9,400 in allocated costs for each division (excluding PWW) and increased by 12% for anticipated pricing adjustments due to lost purchasing power.

Office equipment rental and lease expenses in the amount of \$33,912 are based on monthly lease costs, as provided by the Company, for 2 fax/copier machines, an encoder/endorser machine, a postage machine and a mail opener. These costs are spread to the divisions at the same relative percentage as PWW's current allocations. The 2005 office equipment lease expense was \$48,931.

The current office space is subject to a three-year lease agreement; therefore, the projected expense reflects the current annual lease amount of \$196,474 which is spread to each division at the same relative percentage as PWW's current allocation of rent expense.

The 2005 Manchester Street telephone expense was \$27,442, maintenance of office furniture and equipment was \$9,205, and maintenance of communication equipment was \$12,064. The projected costs of \$18,033, \$6,049 and \$7,928, respectively are based on 65.7% of existing costs, consistent with the reduction in administrative employees.

These expenses are spread to each division at the same relative percentage as PWW's current allocation.

The 2005 Officers' life insurance expense was \$12,542. The projected cost of \$6,374 is based on 51% of existing expense, related to the reduction in Officers' salaries, and is spread to each division at the same relative percentage as PWW's current allocation.

Administrative office, engineering, and non-union water supply and distribution employee benefits (including payroll taxes) are projected at 50% of their respective salary projections. Officers' benefits (including payroll taxes) are projected at 42% of their respective salary projections. These percentages were provided by the Company.

The Manchester Street maintenance expense of \$23,849 and vehicle lease expense of \$11,680 are projected to remain the same levels and are spread to each division at the same relative percentage as PWW's current allocation.

The 2005 transportation expense was \$6,847. The projected cost of \$3,424 is based on 50% related to a fleet of 30 versus 60 vehicles and is spread to each division at the same relative percentage as PWW's current allocation.

Computer maintenance costs are projected at 18% of the projected replacement software asset costs. This percentage represents an accepted industry average as provided by the Company's I.T. Manager. The 2005 maintenance costs were \$134,816. The projected costs are \$105,547 which is spread to each division at the same relative percentage as PWW's current allocation.

Supervisory fee/special services expense, regulatory commission expense, PWSCO other expenses, PWSCO marketing/PR expense, meals expense, membership fees, public relations costs, miscellaneous general expense, and charitable contributions are all projected to remain at the direct cost levels booked to PEU, PAC and PWSCO. These expenses do not impact the real estate affiliate's costs.

The PWW allocated \$2,000 of the \$8,107 courier/express mail costs; \$13,800 of the \$57,203 temporary employee expense; \$1,400 of the \$5,835 boiler and machinery insurance; and \$8,900 of the \$36,739 recruitment fees to its affiliates. These expense items are projected to remain at the allocated levels.

Parking rental of \$520, executive retirement plan of \$110,002, meetings and conventions cost of \$52,486, maintenance of miscellaneous equipment of \$485, and transfer expense credits of \$844,114 (an expense reduction for PWW) were eliminated, because it is anticipated they would not exist without PWW.
