## SCHEDULES

- SCHEDULE LMB – 1: UNITIL SERVICE CORP. DEPARTMENTS
- SCHEDULE LMB – 2: POST-ACQUISITION UNITIL SERVICE CORP.  
CLIENT COMPANY STRUCTURE
- SCHEDULE LMB – 3: SYNERGY ANALYSIS
- SCHEDULE LMB – 4: BUSINESS INTEGRATION PLAN SUMMARY
- SCHEDULE LMB – 5: TRANSACTION ACCOUNTING SUMMARY

1 **I. INTRODUCTION**

2 **Q PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

3 A My name is Laurence M. Brock. My business address is 6 Liberty Lane West,  
4 Hampton, New Hampshire 03842.

5

6 **Q BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?**

7 A I am Controller and Chief Accounting Officer of Unitil Corporation, Inc. (“Unitil”  
8 or the “Company”). I am the Controller of Unitil’s utility operating subsidiaries,  
9 including Unitil Energy Systems, Inc. (“UES”) and Fitchburg Gas and Electric  
10 Company (“FG&E”). I am also Vice President and Controller of Unitil Service  
11 Corp. (“Service Corp.”), which provides centralized management and  
12 administrative services to all of Unitil’s affiliates, including UES and FG&E.

13

14 **Q PLEASE DESCRIBE YOUR BUSINESS AND EDUCATIONAL**  
15 **BACKGROUND.**

16 A I am a Certified Public Accountant in the State of New Hampshire. In 1981, I  
17 graduated from the University of New Hampshire with a Master’s Degree in  
18 Business Administration. I completed my Public Accounting work experience  
19 requirement at Coopers & Lybrand, in Boston, MA. After leaving Coopers &  
20 Lybrand and prior to joining Unitil, I was employed in businesses engaged in  
21 diversified manufacturing activities. I have been employed with Unitil since  
22 June, 1995.

1

2 **Q HAVE YOU PREVIOUSLY TESTIFIED BEFORE THE NEW**  
3 **HAMPSHIRE PUBLIC UTILITIES COMMISSION (“NHPUC” OR**  
4 **“COMMISSION”)?**

5 A Yes. I have also testified before the Massachusetts Department of Public Utilities  
6 (“MDPU”) on behalf of FG&E.

7

8 **Q PLEASE SUMMARIZE YOUR RESPONSIBILITIES AT UNITIL.**

9 A As Controller, I am responsible for Unitil’s accounting and financial reporting  
10 functions. Those responsibilities include ensuring that Unitil and its subsidiary  
11 companies are in compliance with the financial reporting rules and regulations  
12 promulgated by: the Securities and Exchange Commission, the Federal Energy  
13 Regulatory Commission (“FERC”), the Internal Revenue Service, the NHPUC,  
14 and the MDPU. I am also responsible for Unitil’s compliance with the standards  
15 of Generally Accepted Accounting Principles, as defined in the pronouncements  
16 of the Financial Accounting Standards Board.

17

18 **Q PLEASE BRIEFLY DESCRIBE THE ORGANIZATION OF THE UNITIL**  
19 **COMPANIES.**

20 A Unitil is a public utility holding company incorporated under the laws of the State  
21 of New Hampshire. Unitil and its subsidiaries are subject to regulation as a  
22 holding company system by the FERC under the Energy Policy Act of 2005

1 (“EPA”). Unitil directly owns two local distribution utility companies: UES in  
2 New Hampshire and FG&E in Massachusetts. Unitil also directly owns Unitil  
3 Power Corp., a wholesale power utility that is winding down its operations as a  
4 result of industry restructuring; Unitil Realty, which owns the corporate office  
5 building in Hampton, New Hampshire; Service Corp., which provides centralized  
6 management and administrative services to other Unitil affiliates at cost; and  
7 Unitil Resources, Inc., which provides retail energy brokerage and other energy-  
8 related services on a competitive basis through its USource subsidiaries.

9  
10 **Q WHAT IS THE PURPOSE OF YOUR TESTIMONY?**

11 A The purpose of my testimony is to: (i) discuss the service company affiliate  
12 structure of Unitil and the associated shared services cost allocation process; (ii)  
13 to present and support the proposed new affiliate agreements to include Northern  
14 Utilities, Inc. (“Northern”) and Granite State Gas Transmission, Inc. (“Granite”)  
15 following Unitil’s acquisition of Northern and Granite (“the Transaction”); (iii)  
16 provide an preliminary estimate of the operating synergies that are expected to  
17 result from the Transaction, and; (iv) summarize the Transaction accounting.

18  
19  
20

1 **II. UNITIL SHARED SERVICES**

2 **A. Unitil Service Corp.**

3 **Q PLEASE SUMMARIZE THE SERVICES PROVIDED BY SERVICE**  
4 **CORP.**

5 A Service Corp. provides centralized management and administrative services to  
6 each of Unitil’s affiliates. Currently, these shared services fall into six functional  
7 areas: customer services; engineering and operations; regulatory, finance, and  
8 accounting; energy services; technology; and corporate and administration.  
9 Customer services include customer inquiry, billing, cash remittance, credit and  
10 collections and other day-to-day customer service functions. Engineering and  
11 Operations consists of distribution operations management and engineering,  
12 planning, design, and safety and protection. Regulatory, Finance and Accounting  
13 monitor and control compliance with government and regulatory agencies, cash  
14 management, budgeting, financial reporting and accounting. Energy Contracts is  
15 responsible for gas and electricity procurement, energy portfolio management and  
16 market analysis. Technology administers the Company networks, information  
17 systems and communications equipment. Corporate and Administration provides  
18 executive services, human resources and administrative support to all affiliates. A  
19 chart of the Service Corp. and the local Distribution Operating Center (“DOC”)  
20 Departments and Functions is attached as SCHEDULE LMB-1, pp.1-2.

21

1 **B. Service Agreement**

2 **Q PLEASE DESCRIBE THE AGREEMENT BETWEEN SERVICE CORP.**  
3 **AND THE OTHER UNITIL AFFILIATES.**

4 A Service Corp. provides centralized management and administrative services to  
5 each of the affiliates of Unitil under the terms of a Service Agreement between  
6 the parties. Service Corp. is the provider and each of the affiliates is a client of  
7 Service Corp. in this structure. A chart of the post-acquisition Service Corp.  
8 client company structure is attached as SCHEDULE LMB-2. The Service  
9 Agreement describes the services to be provided by Service Corp. to the client  
10 companies and describes how the accounting and billing for those services will be  
11 performed by Service Corp. in accordance with the guidelines originally  
12 established under the Public Utility Holding Company Act of 1935 (“PUHCA ‘35  
13 ACT”) and now governed by FERC pursuant to the provisions of the EPA. The  
14 final rules implementing the EPA, issued by the FERC and effective February 8,  
15 2006, preserve the “at cost” standard for traditional centralized service companies  
16 providing corporate administrative functions. Therefore, Service Corp. maintains  
17 a time and billing accounting software system and provides a detailed monthly  
18 invoice to each of its client companies.

19

20

1   **Q    DOES UNITIL PROPOSE TO EXECUTE A SERVICE AGREEMENT**  
2   **BETWEEN SERVICE CORP. AND NORTHERN AS PART OF THE**  
3   **TRANSACTION?**

4   A    Yes. A copy of the proposed Service Agreement between Service Corp. and  
5   Northern is attached as Exhibit 6 to the Joint Petition. As discussed in the Joint  
6   Petition, Unitil is acquiring Northern’s affiliated natural gas transmission  
7   company, Granite, coincident with the acquisition of Northern. Service Corp. will  
8   be entering into a separate service agreement with Granite.

9  
10   Under the Service Agreement, Service Corp. will provide the same centralized  
11   management and administrative services to Northern, on the same financial terms,  
12   as Service Corp. provides to its existing client companies in the Unitil System  
13   under the current services agreements. In accordance with the requirement of  
14   RSA 366:3 to file affiliate contracts within ten (10) days of execution, Unitil is  
15   providing a proposed Service Agreement for Northern to allow an opportunity for  
16   review pursuant to RSA 366:5. A final executed copy of the Service Agreement  
17   will be filed promptly once the Transaction closes.

18  
19  
20  
21

1 C. **Cost Allocations**

2 Q **HOW DOES UNITIL PROPOSE TO ENSURE A FAIR AND**  
3 **REASONABLE ALLOCATION OF COSTS AMONG NORTHERN AND**  
4 **GRANITE AND THE EXISTING CLIENT COMPANIES AFTER THE**  
5 **TRANSACTION?**

6 A Service Corp.'s time and billing accounting software system provides a detailed  
7 monthly reporting of the costs of all services provided to each client company  
8 including labor costs, overhead costs and direct charges. Each month, all Service  
9 Corp. employees submit a time card, which indicates the number of hours to be  
10 charged to each client company and those hours are recorded on the timecards by  
11 the employees according to their job functions and the Job Order Numbers  
12 ("JON") of the specific tasks that they performed. Service Corp. overhead costs  
13 are charged in direct correlation to direct labor hours. In cases where charges are  
14 allocated, an allocation factor (such as revenues, assets or number of customers) is  
15 used. Where appropriate, a combination of allocation factors is employed to best  
16 reflect a causal relationship to the type of expense being charged.

17

18

19

20

1 **D. Tax-Sharing Agreement**

2 **Q DOES UNITIL PROPOSE TO INCLUDE NORTHERN IN THE TAX**  
3 **SHARING AGREEMENT BETWEEN UNITIL AND ITS AFFILIATES AS**  
4 **PART OF THIS TRANSACTION?**

5 A Yes. A copy of the Unitil's Tax Sharing Agreement is attached as Exhibit 7 to the  
6 Joint Petition. There is no need to update the agreement as a result of the  
7 Transaction because the agreement provides that all entities acquired by any of  
8 the Unitil affiliates will be automatically included in the agreement. Essentially,  
9 the Tax Sharing Agreement provides that Northern, and Granite, will pay their  
10 share of Unitil's consolidated income taxes as if they were "stand-alone" entities  
11 preparing their own tax returns and will pay those taxes to Unitil, the consolidated  
12 tax return filer, on the same financial terms as Unitil's existing affiliate  
13 companies.

14

15 **III. QUANTIFICATION OF TRANSACTION BENEFITS**

16 **A. Preliminary Estimate of Synergy Benefits**

17 **Q DOES THE COMPANY EXPECT THAT THE PROPOSED**  
18 **TRANSACTION WILL PRODUCE SYNERGY SAVINGS?**

19 A Yes. The Company believes there is an opportunity to achieve synergies, or cost  
20 savings, as a result of the Transaction and has developed a preliminary estimate of  
21 these savings. The Company believes the opportunity to achieve synergy savings  
22 exists due to the efficiencies in the provision of centralized management and  
23 administrative shared services to Northern by Service Corp. The Company

1 performed a financial analysis, based on Unitil’s current budget assumptions and  
2 historical financial information available from Northern, to determine the  
3 economic benefit of the synergy savings from providing centralized services in  
4 the post-acquisition Service Corp. client company structure.

5

6 **Q WHAT AREAS OF POTENTIAL SYNERGY SAVINGS HAVE BEEN**  
7 **IDENTIFIED BY UNITIL?**

8 A The largest area of potential synergy savings that has been identified is the lower  
9 labor and overhead costs associated with the provision of centralized utility  
10 management and administrative services, or shared services, to Northern and  
11 Granite by Service Corp. after completion of the Transaction and the full  
12 integration of Northern and Granite into Unitil. There may also be some  
13 additional potential synergy savings related to the cost-effective purchasing of  
14 insurance and employee and retiree benefit plan administration services. Unitil  
15 will continue to assess the potential for additional savings opportunities during the  
16 transition period as Northern and Granite are fully integrated into Unitil. For  
17 example, there may be opportunities to achieve synergies related to choosing  
18 “best practices” between Unitil, Northern and Granite and there may be other  
19 opportunities to achieve synergies related to the upgrade and replacement of older  
20 or redundant information systems during the integration of the companies which  
21 would have required replacement in the near future.

22

1    **Q    PLEASE DESCRIBE THE KEY ECONOMIC ASSUMPTIONS IN THE**  
2    **FINANCIAL ANALYSIS PERFORMED TO CALCULATE HOW**  
3    **POTENTIAL SYNERGY SAVINGS COULD BE REALIZED AS A**  
4    **RESULT OF THE TRANSACTION.**

5    A    The Company’s estimate of the potential synergy savings to Northern and Granite  
6    is based on: a) a successful regulatory approval process; b) the completion of the  
7    Company’s plan to finance the Transaction; and c) a successful post-acquisition  
8    integration of the companies. The estimate takes into account the post-acquisition  
9    affiliate structure of Unitil and the achievement of economies from post-  
10   acquisition cost sharing among a larger group of Service Corp. client companies,  
11   but excludes the calculations of the costs to achieve the proposed Transaction.  
12   The timing of achieving these synergies is dependent upon the timing of  
13   regulatory approvals for the Transaction and the timing of the successful  
14   completion of Transaction financing and business integration processes. As  
15   discussed in the testimony of Unitil witness Mr. Collin, the benefits to customers  
16   of the actual synergy savings achieved by the Transaction will be included in the  
17   first rate case after the acquisition and integration is completed.

18  
19  
20  
21

1 **B. Method of Estimating the Potential Synergy Savings**

2 **Q HOW WERE THE PRELIMINARY ESTIMATES OF SYNERGY**  
3 **SAVINGS RELATED TO SHARED SERVICES CALCULATED?**

4 A A copy of the Synergies Analysis is attached as SCHEDULE LMB-3. The major  
5 steps used to derive a preliminary estimate of the synergy savings, excluding  
6 consideration of the costs to achieve, were as follows:

- 7 • Each Service Corp. manager with budget responsibility estimated the  
8 additional staff needed to replace the centralized services currently  
9 provided to Northern and Granite by NiSource or Bay State. The  
10 incremental personnel costs required by Service Corp. to supplement its  
11 current employee workforce with an additional 42 new positions were then  
12 calculated. This resulted in an estimate of incremental labor costs of  
13 approximately \$2.7 million [ref. p.3 of SCHEDULE LMB-3, Line 12].
- 14 • The incremental labor overheads and overheads related to equipment and  
15 resource costs needed to support the new personnel and functions at  
16 Service Corp. were identified. This resulted in estimated incremental  
17 overheads of an additional \$1.9 million [ref. p.2 of SCHEDULE LMB-3,  
18 Line 20].
- 19 • The resulting total incremental Service Corp. cost estimate of \$4.6 million  
20 (\$2.7 labor + \$1.9 overheads) at Service Corp. was then added to Service  
21 Corp.'s 2008 budget projection of \$23.4 million to create a new post-

1 acquisition 2008 Service Corp. budget projection total of \$28.0 million  
2 [ref. p.2 of SCHEDULE LMB-3, Line 30].

- 3 • The revised 2008 Service Corp. budget of \$28.0 million was then  
4 reallocated to all of the post-acquisition client companies based on the  
5 current cost allocation formulas of revenues, assets and number of  
6 customers of each utility client company of Service Corp., updated for the  
7 inclusion of Northern and Granite. [ref. p.2 of SCHEDULE LMB-3,  
8 Lines 38 - 40].

- 9 • Based on the 2008 budget reallocation, the cost for post-acquisition  
10 centralized management and administrative services to Northern and  
11 Granite was then estimated to be \$6.9 million on an annual basis [ref. p.1  
12 of SCHEDULE LMB-3, Line 4]. This compares favorably to the  
13 approximately \$8.7 million [ref. p.1 of SCHEDULE LMB-3, Line 1] in  
14 actual shared services costs incurred by Northern and Granite in 2006 and  
15 2007, and results in a total of \$1.8 million of potential savings in shared  
16 services costs for Northern and Granite [ref. p.1 of SCHEDULE LMB-3,  
17 Line 5].

18

19 **Q HOW WERE OTHER POTENTIAL SYNERGY SAVINGS ESTIMATED?**

20 A The estimates of savings for insurance and employee and retiree benefit plan  
21 administration costs are estimated to be approximately \$0.5 million on an annual  
22 basis for Northern and Granite, based on a preliminary review of their current

1 benefit and insurance policies in comparison to duplicate or comparable plans  
2 offered by Unitil. [ref. p.1 of SCHEDULE LMB-3, Line 6]

3

4 **Q DO THE POTENTIAL SYNERGY SAVINGS REFLECT THE COSTS TO**  
5 **ACHIEVE THE ACQUISITION?**

6 A No. The potential synergy savings are those estimated synergy amounts before  
7 consideration of the costs to achieve the proposed Transaction.

8

9 **Q WHAT IS UNITIL’S TOTAL ESTIMATED COST TO COMPLETE THE**  
10 **TRANSACTION AND ACHIEVE THE ESTIMATED SYNERGY**  
11 **SAVINGS?**

12 A The total costs to achieve the Transaction, and associated estimated synergy  
13 savings, (“Costs to Achieve”) are estimated to be \$14.2 million. The Costs to  
14 Achieve include: 1) the acquisition transaction costs (“Transaction Costs”); 2) the  
15 cost to finance the Transaction (“Financing Costs”); 3) the business integration  
16 costs associated with combining the companies (“Integration Costs”); and 4) the  
17 transition services costs (“Transition Costs”).

18

19

20

21

22

1    **Q    PLEASE DESCRIBE THE TRANSACTION COST COMPONENT OF**  
2    **THE COSTS TO ACHIEVE.**

3    A    The Transaction Costs component of the Costs to Achieve is estimated to be  
4    approximately \$3.6 million and comprises the investment banking, advisory and  
5    legal fees, including regulatory costs, required to bring about the Transaction.

6  
7    **Q    PLEASE DESCRIBE THE FINANCING COST COMPONENT OF THE**  
8    **COSTS TO ACHIEVE.**

9    A    The Financing Cost component of the Costs to Achieve is estimated to be  
10   approximately \$4.6 million and represents the estimate of banking and  
11   professional fees to be incurred by Unitil, Northern and Granite to issue equity  
12   and bonds, respectively, to finance the Transaction. The Financing fee estimates  
13   are \$4.0 million attributable to the equity financing and \$0.6 million attributable  
14   to the bond financing.

15  
16   **Q    PLEASE DESCRIBE THE INTEGRATION COST COMPONENT OF THE**  
17   **COSTS TO ACHIEVE.**

18   A    The Integration Cost component of the Costs to Achieve are estimated to be  
19   approximately \$3.0 million and represent the estimate of costs to effectively  
20   merge all of the business processes of Northern and Granite into Unitil as a result  
21   of the Transaction. The goal of the integration is that Northern and Granite will  
22   become fully integrated utility operating subsidiaries of Unitil, with centralized

1 administrative and management services provided by Service Corp. I will discuss  
2 the Transition Plan and the Business Integration Plan later on in my testimony.

3

4 **Q PLEASE DESCRIBE THE TRANSITION COST COMPONENT OF THE**  
5 **COSTS TO ACHIEVE.**

6 A The Transition Cost component of the Costs to Achieve is estimated to be  
7 approximately \$3.0 million and represents the estimate of the amounts to be paid  
8 to NiSource pursuant to the terms of the Transition Services Agreement (“TSA”)  
9 referenced as Exhibit C to the Stock Purchase Agreement (“SPA”). Essentially,  
10 the TSA will provide for the continuation of administrative and management  
11 services for Northern and Granite after the close of the Transaction, pending full  
12 integration of Northern and Granite into Unitil.

13

14 **C. The Timing and Allocation of Synergy Savings**

15 **Q PLEASE DESCRIBE THE ESTIMATE OF POTENTIAL ANNUAL**  
16 **SYNERGY SAVINGS TO BE ALLOCATED TO NORTHERN AND**  
17 **GRANITE.**

18 A Before considering any Costs to Achieve the proposed Transaction, it is expected  
19 that the synergy benefits to Northern and Granite would be comprised of \$1.8  
20 million in estimated savings in centralized service fees plus the preliminary  
21 estimate of \$0.5 million savings in other operations and maintenance (“O & M”)

1 costs related to benefit plan administration costs for a total estimate of \$2.3  
2 million in annual O & M cost savings for Northern.

3

4 **Q WHY IS IT APPROPRIATE TO CONSIDER THE SYNERGY SAVINGS**  
5 **OPPORTUNITIES SEPARATELY FROM THE COSTS TO ACHIEVE**  
6 **THE PROPOSED TRANSACTION?**

7 A Considering the achievement of synergy savings separately from the Costs to  
8 Achieve the proposed Transaction is essentially a matter of timing of the  
9 economic costs and benefits identified for each component. Currently, Unitil  
10 does not own Northern and Granite. The expenditure of much of the Costs to  
11 Achieve are front-end loaded and will be spent early in the acquisition process.  
12 The synergy savings, on the other hand, are achievable mainly during and after  
13 the first full year following full integration of the businesses. If the proposed  
14 Transaction were to close in late 2008, and the integration completed in 2009,  
15 then the first full year of cost synergy savings could be realized in 2010.  
16 However, most of the Costs to Achieve would have been expended in 2008.

17

18 **Q PLEASE DISCUSS THE ANTICIPATED TIMING RELATED TO THE**  
19 **ACHIEVEMENT OF THE TRANSACTION SYNERGIES AND HOW**  
20 **NORTHERN'S CUSTOMERS WILL BENEFIT.**

21 A The timing of achieving the synergies is dependent upon the timing of the closing  
22 of the Transaction and the successful completion of business integration

1 processes. It is expected that a portion of the synergies will begin to be realized  
2 soon after the Transaction has received regulatory approval and the financial  
3 closing takes place. Ultimately the full level of estimated synergies are expected  
4 to be achieved following the completion of the Business Integration Plan (“BIP”),  
5 discussed below, which provides for the integration of Northern into Unitil. As  
6 discussed in the prefiled testimonies of Company witness Mr. Collin, absent the  
7 Transaction, because Northern is not earning its authorized return, Northern  
8 anticipated that it would need to increase delivery rates to recover the higher costs  
9 of providing service to its customer in both New Hampshire and Maine. As a  
10 direct result of the Transaction, Unitil has committed to defer increases in  
11 delivery rates for Northern for at least a year following the closing of the  
12 Transaction, and to use the synergy savings to stabilize rates thereafter. At the  
13 time of next rate case, the synergy savings will be fully reflected in the cost of  
14 service and passed on the Northern’s customers. The benefits of the Transaction  
15 synergies will therefore begin to flow to customers immediately after closing  
16 since, as a result of the Transaction, Northern’s customers would see no increase  
17 in their utility bills, with the net synergy savings expected to offset inflationary  
18 operating cost increases and delay the need for the rate case.

19  
20  
21  
22

1 **IV. THE TRANSITION PLAN**

2 **Q PLEASE BROADLY DESCRIBE THE TRANSITION PLAN.**

3 A There are two components of the Transition Plan. First is TSA, which will  
4 provide for the smooth transition of Northern and Granite to Unitil by ensuring  
5 there is no interruption in the quality of service to customers until Northern and  
6 Granite are fully integrated into Unitil. A copy of the term sheet for the TSA is  
7 referenced as Exhibit C to the SPA and is attached as Exhibit 1 to the Joint  
8 Petition. Second is the Business Integration Plan, which will be coordinated  
9 between Unitil and NiSource to bring together all of Northern's operations,  
10 administration and management within the existing business processes of Unitil.  
11 A summary of the BIP is attached as SCHEDULE LMB-4, pp. 1-10.

12  
13 **Q PLEASE DESCRIBE THE TERMS OF THE TSA.**

14 A The TSA will be designed for NiSource to provide, at its fully loaded cost,  
15 transitional services to continue the operation and maintenance of Northern and  
16 Granite until the successful transition to Unitil of all business functions previously  
17 performed by NiSource or Bay State. The business functional services include:  
18 Utility Operations, Construction, Information Systems, Corporate Governance,  
19 Corporate Accounting, Regulatory, Treasury, Accounts Payable & Purchasing,  
20 Taxes, Payroll, Benefits and Human Resources, and Revenues and Receivables.  
21 The TSA term is transitional in nature and is meant to end as promptly as  
22 practicable following the closing.

1 **Q PLEASE DESCRIBE THE BIP.**

2 A The BIP is a vital component of achieving the potential synergy savings and is  
3 specifically focused on developing a best practices approach for the combined  
4 companies. To that end, the BIP goes beyond the TSA and coordinates broad  
5 participation across Unitil, NiSource and Bay State from executives, managers  
6 and staff who are charged with integrating all the utility operating functions of  
7 Northern into Unitil. The focus of the BIP on utility processes and functions is a  
8 proven approach which allows for the discovery of additional savings  
9 opportunities in the process.

10

11 **Q PLEASE DESCRIBE THE ORGANIZATIONAL DESIGN OF THE BIP.**

12 A The organizational design of the BIP follows the organizational structure of the  
13 post-acquisition combined companies. It is an advantage to the BIP that both  
14 Northern and Unitil currently operate as utilities with local Distribution  
15 Operations Centers (“DOC”) which receive centralized administrative and  
16 management services from a service company. The BIP cross-functional  
17 integration teams are organized in this structure, with dedicated teams to  
18 accomplish the integration of DOC operations and additional teams dedicated to  
19 the integration of functions and processes at Service Corp. The BIP itself will  
20 have three phases: Integration Planning, Implementation Planning, and  
21 Implementation.

22

1 **Q SPECIFICALLY, WHO WILL EXECUTE THE BIP?**

2 A The BIP is led by a joint Senior Management steering committee of Unitil and  
3 NiSource. Those key executives are charged with setting the overall direction for  
4 the planning and integration efforts and ultimately making decisions on how the  
5 post-acquisition business will be managed and operated. Reporting to Senior  
6 Management are the BIP Team Leaders who have day-to-day responsibility for  
7 managing the BIP initiatives. Reporting to the Team Leaders are managers and  
8 supervisors who are the leaders of the functional integration teams. Those  
9 functional and cross-functional teams will execute the integration of the  
10 companies at the specific process level.

11

12 **V. TRANSACTION ACCOUNTING**

13 **Q PLEASE DESCRIBE THE RELEVANT ASPECTS OF THE**  
14 **ACCOUNTING ASSOCIATED WITH THE TERMS OF THE**  
15 **TRANSACTION.**

16 A Per the SPA, Unitil has agreed to purchase all of the capital stock of (i) Northern  
17 from Bay State and (ii) Granite from NiSource. The aggregate purchase price for  
18 the shares of Northern and Granite is \$160 million plus a net working capital  
19 adjustment at time of closing. In addition, under the terms of the SPA, Northern  
20 will be transferred to Unitil debt-free. While the Transaction has been structured  
21 as the sale of the stock of Northern and Granite for cash, Unitil and NiSource  
22 have agreed to make a Section 338(h)(10) election under the Internal Revenue

1 Code with respect to the tax treatment of the Transaction. The primary  
2 consequence of this election is that Unitil will receive the benefit of a “stepped  
3 up” depreciable tax basis in the assets of Northern as if the Transaction has been  
4 structured as an asset sale.

5

6 **Q IS THERE AN ACQUISITION PREMIUM ASSOCIATED WITH THE**  
7 **TRANSACTION?**

8 A No, there is no acquisition premium associated with the Transaction. The  
9 purchase price of \$160 million represents the fair value of the net assets and  
10 liabilities of Northern and Granite as determined by Unitil. The calculation of the  
11 \$160 million includes the recognition of the Transaction as a stock purchase,  
12 treated as an asset sale for tax purposes, and includes an evaluation of the  
13 Transaction and financing costs and an assessment of the post-acquisition fair  
14 value to Unitil of the assets and liabilities of Northern and Granite. Further, the  
15 acquisition premium adjustments previously recorded on Northern’s and Granite’s  
16 accounting records, resulting from the accounting for a prior change in control  
17 Transaction, will be eliminated when Northern and Granite are transferred to  
18 Unitil. Therefore, Unitil will not seek to recover from ratepayers any acquisition  
19 premium associated with the Transaction.

21

1    **Q    PLEASE SUMMARIZE HOW THE PROPOSED PURCHASE PRICE TO**  
2    **BE PAID FOR NORTHERN AND GRANITE IS ALLOCATED SO THAT**  
3    **THERE IS NO ACQUISITION PREMIUM ASSOCIATED WITH THE**  
4    **TRANSACTION.**

5    A    Under the terms of the SPA, Northern will be transferred to Unitil debt-free. A  
6    summary of the estimated Purchase Price Allocation is attached as SCHEDULE  
7    LMB-5. The Purchase Price Allocation is estimated based on the balance sheet  
8    amounts at December 31, 2007, as provided in the seller's disclosure schedules  
9    provided by NiSource as part of the SPA. The actual purchase price allocation  
10   will be completed subsequent to closing the Transaction. Based on the figures at  
11   December 31, 2007, the purchase price would be \$160.0 million plus \$37.3  
12   million for the working capital adjustment; a total purchase price of \$197.3  
13   million [ref. SCHEDULE LMB-5, Lines 1-3]. The purchase price is allocated to  
14   the assets and liabilities of the companies purchased before considering  
15   Transaction Costs, Financing Costs and the other Costs to Achieve. The total net  
16   assets to be acquired have a book value of \$218.7 million [ref. SCHEDULE  
17   LMB-5, Lines 4-10] and include: Utility Plant of \$186.0 million, Current Assets  
18   of \$53.4 million, Other Long Term Assets (excluding Seller's intangible assets) of  
19   \$21.0 million; reduced by liabilities for Accounts Payable of \$11.1 million, Other  
20   Current Liabilities of \$6.2 million and Non-current Liabilities (excluding  
21   Deferred Taxes) of \$24.4 million. As a result, and as shown on Schedule LMB-5,  
22   Line 11, there is a negative estimated Plant Acquisition Adjustment amount of

1 (\$21.4) million and therefore no acquisition premium is associated with the  
2 proposed Transaction.  
3

4 **Q WHAT IS THE FAIR VALUE OF UTILITY PLANT IN RATE BASE**  
5 **ASSOCIATED WITH THE TRANSACTION?**

6 A Following the close of the Transaction, an independent appraisal will be  
7 completed that establishes the fair value of all of Northern's and Granite's assets  
8 and liabilities. Since there is no acquisition premium associated with the  
9 proposed Transaction to step up the basis of fixed assets, Northern will continue  
10 to value its rate base on the original depreciated cost of the assets devoted to  
11 utility customers. This aspect of the Transaction should contribute to continued  
12 rate stability and serve to maintain distribution rates to customers.  
13

14 **Q DOES THIS CONCLUDE YOUR TESTIMONY?**

15 A Yes, it does.  
16
