Re: DE 08-142, Waste Management Renewable Energy, L.L.C.
Certification Application for Class I Eligibility pursuant to RSA 362-F

Dear Ms. Glenn:

On November 10, 2008, Waste Management Renewable Energy (WMRE) submitted an application requesting certification of the Chaffee landfill methane gas facility (Chaffee facility) as eligible to produce Class I renewable energy certificates (RECs) pursuant to RSA 362-F, New Hampshire's Electric Renewable Portfolio Standard law. Staff has reviewed the application and recommended approval noting that the WMSE application was complete on November 10, 2008.

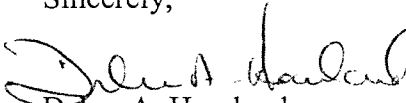

Class I eligibility requires that a facility began operation after January 1, 2006 and that it produces electricity from certain renewable sources, one of which is methane gas. The application indicates that the Chaffee facility has a gross nameplate capacity of 4.8 megawatts and is located at 10860 Olean Road, Chaffee, New York. The facility began commercial operation in August 2007. The facility's NEPOOL generation information system facility code is 32644.

The Commission has reviewed the WMRE application and determined that it has provided all the necessary information to demonstrate that the Chaffee facility is eligible for certification as a Class I facility. Therefore, the Commission hereby certifies that the Chaffee facility is a Class I renewable energy source effective November 10, 2008 and is eligible to be issued New Hampshire Class I renewable energy certificates. For the issuance of any renewable energy certificates, please be aware that since the facility is located in an adjacent control area, the applicant must provide proof pursuant to Puc 2504.01 (a)(2) that the associated electricity produced by the facility was imported into the New England control area.

Page two

Attached please find a copy of the notice of this certification provided to the GIS administrator. The New Hampshire Renewable Portfolio Standard certification code for the Chaffee landfill methane gas facility is NH-I-08-019.

Sincerely,

Debra A. Howland
Executive Director

Re: DE 08-142, Waste Management Renewable Energy, L.L.C.
Certification as a New Hampshire RPS Class I Facility pursuant to RSA 362-F
New Hampshire Certification Code NH-I-08-019

Dear Mr. Webb:

Please be advised that, pursuant to NH RSA 362-F, the New Hampshire Public Utilities Commission has certified Waste Management Renewable Energy (WMRE)'s Chaffee landfill methane gas facility as a Class I renewable energy source effective November 10, 2008. Accordingly, WMRE's Chaffee facility is eligible to be issued New Hampshire Class I renewable energy certificates.

The Chaffee facility has a gross nameplate capacity of 4.8 megawatts and is located at 10860 Olean Road, Chaffee, New York. The facility began commercial operation in August 2007. The facility's NEPOOL generation information system facility code is 32644. The New Hampshire RPS certification code is NH-I-08-019.

Sincerely,
