Re: DE 08-143, Facility Expansion of WM Renewable Energy, L.L.C.'s
Mill Seat Landfill RPS Class I Facility
New Hampshire Certification Code NH-I-08-020

Dear Mr. Webb:

Previously, on December 22, 2008, the New Hampshire Public Utilities Commission notified you that it had certified WM Renewable Energy (WMRE)'s Mill Seat landfill methane gas facility (Mill Seat facility) eligible to produce New Hampshire Class I renewable energy certificates and issued the facility a New Hampshire Certification Code of NH-I-08-020. On February 17, 2009, WMRE notified the Commission that it had increased the gross nameplate capacity of the facility from 4.8 megawatts to 6.4 megawatts. Please be advised that, pursuant to NH RSA 362-F, the Commission has certified the Mill Seat facility's additional capacity as a Class I renewable energy source effective June 8, 2009. Accordingly, Mill Seat facility's additional capacity is eligible to be issued New Hampshire Class I renewable energy certificates.

The newly expanded Mill Seat facility has a gross nameplate capacity of 6.4 megawatts that began commercial operation on December 17, 2008. The facility's NEPOOL generation information system facility code is IMP 32645.

Sincerely,

Debra A. Howland
Executive Director
