Re: DE 08-147 Industrial Power Services Corporation's
Certification Application for Class III Eligibility pursuant to RSA 362-F

Dear Ms. Gillis:

On November 19, 2008, Industrial Power Services Corporation submitted an application requesting certification of its Granby landfill gas facility (Granby facility) as eligible to produce Class III renewable energy certificates (RECs) pursuant to RSA 362-F, New Hampshire's Electric Renewable Portfolio Standard law. Staff has reviewed the application and recommended approval, noting that the Industrial Power Services Corporation application was complete on February 12, 2009.

Class III eligibility requires a facility to have begun the production of electricity prior to January 1, 2006 using either eligible biomass technologies having a gross nameplate capacity of 25 megawatts or less or methane gas. The application indicates that the Granby facility has a gross nameplate capacity of 3.2 megawatts, is fueled with methane gas and is located at 11 New Ludlow Road, Granby, Massachusetts. The facility began commercial operation in October 16, 2001. The facility's NEPOOL generation information system facility code is MSS 1572.

The Commission has reviewed the Industrial Power Services Corporation application and determined that it has provided all the necessary information to demonstrate that the Granby facility is eligible for certification as a Class III facility. Therefore, the Commission hereby certifies that the Granby facility is a Class III renewable energy source effective February 12, 2009 and is eligible to be issued New Hampshire Class III renewable energy certificates.

Attached please find a copy of the notice of this certification provided to the GIS administrator. The New Hampshire Renewable Portfolio Standard certification code for the Granby landfill methane gas facility is NH-III-09-014.

Sincerely,

A handwritten signature in dark ink, appearing to read "Debra A. Howland", written over a horizontal line.

Re: DE 08-147 Industrial Power Services Corporation's Granby Facility
Certification as a New Hampshire RPS Class III Facility pursuant to RSA 362-F
New Hampshire Certification Code NH-III-09-014

Dear Mr. Webb:

Please be advised that, pursuant to NH RSA 362-F, the New Hampshire Public Utilities Commission has certified Industrial Power Services Corporation's Granby landfill methane gas facility as a Class III renewable energy source effective February 12, 2009. Accordingly, Industrial Power Services Corporation's Granby facility is eligible to be issued New Hampshire Class III renewable energy certificates.

The Granby facility has a gross nameplate capacity of 3.2 megawatts, is fueled with methane gas and is located at 11 New Ludlow Road, Granby, Massachusetts. The facility's initial commercial operation date was October 16, 2001. Its NEPOOL GIS facility code is MSS 1572. The New Hampshire RPS certification code is NH-III-09-014.

Sincerely,

A handwritten signature in dark ink, appearing to read "Debra A. Howland", written over a horizontal line.
