Re: DE 08-150 Essex Meadows PV Facility

Application for Certification as a Class II Renewable Energy Source Items Requiring Completion

Mrs. Reno,

Below you will find the answer to the questions to the DE 08-150 Deficiency letter received on January 2, 2009.

- (1) A GIS account has been created for the Essex Meadows facility. The GIS Facility code is pending, as the GIS application has just been processed. Essex Meadows will provide this number to the PUC as soon as it is obtained.
- (2) The output will be verified by an onsite meter, as well as an online metering system developed by Spire Corporation. The online URL for this is:
<http://www.gloriaspire.com/live-data/essex-meadows/index> The interconnection agreement was attached to this fax as well as the interconnection application.

Let us know if you have any questions,

Thanks,

Supria Ranade
