

Dave Mason
*Senior Project Manager***RANGE OF EXPERIENCE**

Mr. Mason has had a lengthy career providing strategic management and technical services to public and private sectors. He possesses a blend of experiences and training that combines full financial performance responsibility, with hands-on line management, grassroots operating experience, technical background, skills, and a practical understanding of the human factors that influence productivity.

He is currently serving as an advisory consultant to the Director of the Detroit Water and Sewerage Department. As such, he is leading teams of senior managers and technical experts that are responsible for improving the productivity of the utility's operating and maintenance divisions through the development of key performance indicators and, under the direction and auspices of the Honorable Judge John Feikens, for oversight and enforcement of the Department's capital improvement program and contract procurement practices.

Previously, he served as Vice President of US Filter Corporation's Competitive Advantage Group. As VP, he led cross-functional teams responsible for adapting and implementing best practices throughout company. He also served on several international, best practices, performance improvement task forces for deployment throughout the company and world.

He has served on and led several national committees and has authored numerous papers dealing with competitive practices and performance management.
