Re: DE 06-061, Investigation of Federal Standards of the 2005 Energy Policy Act
Scope of Investigation

To the Parties:

On May 16, 2006, an order of notice was issued in the above reference proceeding regarding the five new federal standards that have been added to Title I of the Public Utility Regulatory Policies Act, namely Net Metering, Fuel Source Diversity, Fossil Fuel Generation Efficiency, Time-Based Metering and Interconnection. Following the May 16, 2006 prehearing conference, the Parties and Staff developed a document that delineated the scope of the investigation for each of the five standards, which was filed with the Commission on July 25, 2006.

Please be advised that at its public meeting on August 2, 2006, the Commission adopted the scope of the investigation as recommended by the parties.

Sincerely,

Debra A. Howland
Executive Director and Secretary
