RE: Request by Beaver Ridge Wind for Preliminary Designation as a Class I Source

Dear Ms. Howland:

Please find attached an application for "Preliminary Designation" of the Beaver Ridge Wind Project as a Class I facility pursuant to RSA 362-F, New Hampshire's Renewable Portfolio Standard legislation, and the Commission's Rules at Puc 2505.03. The Beaver Ridge Wind Project is a 4.5 MW wind project in the Town of Freedom, Waldo County, Maine ("Project"). The Project is currently under construction and scheduled to be on-line in late October 2008. The Project has an executed Interconnection Agreement with Central Maine Power Company under which output from the Project will be delivered to the CMP grid at 34.5 kV. This delivery point is within the New England Control Area, as that term is defined in Puc 2502.25.

If you have any questions or require any additional information, I can be reached at (207) 772-6190. Thank you for your consideration of this matter.

Sincerely,

Richard Silkman
Member
