Bristol, NH 03222

This is my official notification that I have not, and will not provide my signed consent for a legally approved installation of a smart meter as now required by law. SB 266 has passed both the senate and the house, and has been signed by the governor, effective immediately (refer to RSA 374.62).

Quotes from SB 266:

"This bill prohibits electric utilities from installing and maintaining smart meter gateway devices without the residential or business property owner's consent."

II (a). "No electric utility that sells or provides electricity within the state of NH shall install a smart meter gateway device on or in a person's home or business without the written consent of the person or persons who own the home or business."

(b) "An electric utility selling or providing electricity shall create a designated signature form that the person or persons who own the home or business must sign to opt-in to having a smart meter gateway device installed on or in his or her home or business."

Therefore, any smart meter installation is hereby illegal without the signed consent form (as noted by the NH Coalition Against Smart Meter Radiation and the National Coalition for Wireless Safety who will be following your response to this notice and others you receive from NHEC members).

This notice is legally binding,

Joan E. Wirth, NHEC Member
