**CONCORD STEAM CORPORATION  
2012-2013 Cost of Energy Adjustment  
ORDER OF NOTICE**

On September 12, 2012, Concord Steam Corporation (Concord Steam), a public utility supplying steam service to approximately 100 commercial and institutional customers and one residential customer in Concord, filed its annual cost of energy (COE) rate for the period November 1, 2012 through October 31, 2013. The filing includes certain production costs historically included in delivery rates, costs that Concord Steam has excluded in its proposed increase in delivery rates (Docket No. DG 12-242). The proposed COE rate is \$20.90 per Mlb, is an increase of \$3.43 per Mlb when compared to the projected weighted average COE rate of \$17.47 per Mlb for the year ending October 31, 2012, resulting in an increase of approximately 3 to 3 1/2% in an average customer's total bill. Without a corresponding decrease in the proposed delivery rates, the proposed COE rate would increase an average customer's total bill by approximately 10%. The petition and subsequent docket filings, other than information for which confidential treatment is requested of or granted by the Commission, will be posted to the Commission's website at <http://www.puc.nh.gov/Regulatory/Docketbk/2012/12-270.html>. The filing raises, *inter alia*, issues related to the forecast of sales, wood and fossil fuel supply and transportation costs, estimated wood yard operations expenses, purchasing decisions related to current and past annual fuel supplies, the causes and treatment of over and under recoveries, prior period costs and revenues, the reasonableness of Concord Steam's proposed inclusion of certain production costs historically included in delivery rates in COE rate recovery, the status of Concord Steam's new plant project, and the justness and reasonableness of the proposed COE rate. Each party has the right to have an attorney represent them at the party's own expense.
