Pittsfield Aqueduct Co. Inc.

An increase of 9% or 9.34% in one year.

When does something go down or stop rising
it's cost. the Pittsfield Aqueduct should learn
how to use their profit more wiser instead
of increasing cost of \$64.40 per year

per customer. I vote as a customer to
~~NO~~ increase. They need to find
the money some other way. They own

all the water so we have NO
competition that keeps companies keeping
their price down and keeping them

truthful to their customers.

They must be taking their profits and
making money some where or that,
not just paying their CEO a Bonus.
let the CEO take a cut in pay

this year. I vote for that.
