Summary

On March 24, 2014, the Commission received applications filed by Knollwood Energy of MA, LLC¹ (Knollwood Energy) for Pugliese Contracting (Pugliese); Buckley Gould Real Estate (Buckley Gould); and, Warren Goldblatt (Goldblatt). Knollwood Energy is requesting Class II New Hampshire Renewable Energy Certificate (REC) eligibility for these entities' photovoltaic (PV) arrays pursuant to RSA 362-F, New Hampshire's Electric Renewable Portfolio Standard law² and inclusion in the Knollwood Energy aggregation.

The Commission, in a non-adjudicative process, is required to issue a determination of whether a facility meets a particular classification within 45 days of receipt of a completed application. The above-named facilities are customer-sited sources and meet the Class II eligibility requirements under RSA 362-F:4, II. Based on review of the applications, Staff recommends that the Commission certify the Pugliese, Buckley Gould, and Goldblatt PV arrays as eligible facilities for Class II RECs to be included as part of the Knollwood aggregation effective as of March 24, 2014.

¹ The Commission approved Knollwood Energy of MA, LLC as an aggregator of RECs on November 12, 2013, DE 13-256.

² Class II eligibility requires a facility to produce electricity from solar technologies that began operation after January 1, 2006 (RSA 362-F:4, II).
