Dear Dr. Howland,
I am resolutely opposed
to the proposed fracked gas
infrastructure for Lebanon
and Hanover. Hanover was
first town in NH to endorse
a commitment to ^{100%} renewable
energy - electricity by 2030 and
transportation/heat by 2050. A
new fracked gas infrastructure
is INCOMPATIBLE with this
commitment! Jude Colla

I oppose the pipeline project proposed for the Upper Valley of NH/VT. I am strongly opposed to this project as a misguided step backwards - socio-economically and environmentally.

I urge you, for my sake and that of my children (9 and 12), to prevent the construction of this pipeline.

No more fracking using
water with added toxic
waste chemicals which
have got into the
aquifers. It may be
cheaper ^{now} but only if you
don't count the human cost
of chemical exposure, increased
explosions and more earthquakes.

Dear Director Howland,

I live on the intersection of Rt 4 and Rt 120 in Lebanon - so will have the poison pipes on 2 sides. The Mascamunda River floods and has mud slides and destroys roads every year - bad placement - it will break the pipeline and pollute the river and ~~be~~ pour poison gas into the air in downtown Lebanon.

Please oppose the pipeline proposed for

opposed because natural gas is a more

fracking is an ecosystem-destroying &

step away from safe
