1 I. <u>INTRODUCTION</u>

2	Q.	Would you please state your name, address and position with Pennichuck East
3		Utility, Inc.?
4	А.	My name is Larry D. Goodhue. My business address is 25 Manchester Street,
5		Merrimack, New Hampshire. I am the Chief Executive Officer and Chief Financial
6		Officer of Pennichuck East Utility, Inc. (the "Company" or "PEU"). I have been
7		employed with the Company since December, 2006. I am also the Chief Executive
8		Officer, Chief Financial Officer and Treasurer of Pennichuck Corporation
9		("Pennichuck"), which is the corporate parent of PEU.
10	Q.	Please describe your educational background.
11	А.	I have a Bachelor in Science degree in Business Administration with a major in
12		Accounting from Merrimack College in North Andover, Massachusetts. I am a licensed
13		Certified Public Accountant in New Hampshire; my license is currently in an inactive
14		status.
15	Q.	Please describe your professional background.
16	А.	Prior to joining Pennichuck, I was the Vice President of Finance and Administration and
17		previously the Controller with METRObility Optical Systems, Inc. from September, 2000
18		to June 2006. In my more recent role with METRObility, I was responsible for all
19		financial, accounting, treasury and administration functions for a manufacturer of optical
20		networking hardware and software. Prior to joining METRObility, I held various senior
21		management and accounting positions with several private and publicly-traded
22		companies.

1	Q.	What are your responsibilities as Chief Executive Officer of Pennichuck
2		Corporation?
3	А.	As Chief Executive Officer, I am responsible for the overall management of Pennichuck
4		and its subsidiaries, including PEU, and I report to the Board of Directors. I work with
5		the Chief Operating Officer, the Corporate Controller, Assistant Treasurer, the Director
6		of Human Resources and the Director of Information Technology to: (1) implement short
7		and long-term financial and operating strategies, (2) insure the adequate funding of debt
8		and expenses, and (3) enable Pennichuck's utility subsidiaries to provide high quality
9		water service at affordable rates, on a consistent basis.
10	Q.	Have you previously testified before this or any other regulatory commission or
11		governmental authority?
12	А.	Yes. I have submitted written testimony in the following dockets before the New
13		Hampshire Public Utilities Commission (the "Commission"):
14		• Financings for PEU – DW 12-349, DW 13-017, DW 13-125, DW 14-020, DW 14-
15		191, DW 14-282, DW 14-321, DW 15-044, DW 16-234 and DW 17-055;
16		• Financings for Pittsfield Aqueduct Company ("PAC") – DW 15-045 and DW 16-235;
17		• Financings for Pennichuck Water Works, Inc. ("PWW") – DW 14-021, DW 14-130,
18		DW 15-046, DW 15-196, and DW 16-236.
19		• Permanent and Temporary Rate Increase Proceedings for: PWW – DW 13-130 and
20		DW 16-806; PEU – DW 13-126; and PAC – DW 13-128.
21	II.	PURPOSE OF THIS TESTIMONY
22	Q.	What is the purpose of your testimony?

1	А.	The purpose of my testimony is to provide information supporting PEU's request for
2		temporary and permanent rate relief, including: (1) relevant historical information
3		regarding the City of Nashua's acquisition of Pennichuck in early 2012; (2) information
4		concerning how the ratemaking structure set forth in the Settlement Agreement approved
5		by this Commission in Order No. 25,292 in Docket No. DW 11-026 has been operating
6		since the 2012 acquisition; (3) information concerning PWW recent settlement modifying
7		its ratemaking structure in Docket No. DW 16-806 should be applied to PEU; and (4)
8		information supporting the rate relief requested by PEU and the specific modifications to
9		PEU's current ratemaking structure demonstrating that such requests are just, reasonable
10		and in the public interest. I note that, while PEU is applying the modified rate
11		methodology that is described in PWW's Settlement Agreement filed in DW 16-806, as
12		of the filing of PEU's rate case, the Commission has not yet issued a ruling on that
13		Settlement. If the Commission modifies the Settlement in its order, PEU will supplement
14		its filing as may be necessary under the Commission's order.
15	Q.	Would you please identify the other witnesses in this case?
16	А.	The other witnesses in this case, both of whom are providing written testimony in this
17		proceeding, are Chief Operating Officer Donald Ware and Chief Engineer John Boisvert.
18		Both of these individuals hold these roles for both PEU and Pennichuck, as well as the
19		other subsidiaries of Pennichuck. Their testimonies will describe their qualifications,
20		history and previous instances of testimony before the Commission.

1 III. HISTORY OF THE CITY OF NASHUA ACQUISITION

2	Q.	Mr. Goodhue, before explaining the details of the proposed financings, would you
3		please provide some history regarding the ownership of PEU and how that history
4		supports PEU's request for approval of permanent and temporary rate relief?
5	А.	PEU as a corporate entity is wholly-owned by Pennichuck, which is, in turn, a closely-
6		held private corporation that is wholly-owned by the City of Nashua, New Hampshire.
7		The City of Nashua acquired its ownership of Pennichuck on January 25, 2012, pursuant
8		to this Commission's Order No. 25,292 (23, 2011) (Approving Acquisition and
9		Settlement Agreement). Prior to this acquisition by the City of Nashua, Pennichuck's
10		shares were traded on the NASDAQ public stock exchange. For purposes of my
11		testimony, I refer to the period prior to the City's acquisition as "pre-acquisition" and the
12		period after as "post-acquisition."
13	Q.	Did the City's acquisition affect the way in which PEU operates as a utility?
14	А.	Yes. The change in the ultimate ownership of PEU's parent, Pennichuck, from a
15		publicly-traded investor-owned utility to ownership by the City has had important
16		consequences for the operation of PEU. These same issues were involved with PEU's
17		sister company, PWW which is also wholly owned by Pennichuck. As such, my
18		testimony in PWW's recent rate case, Docket No. DW 16-806, applies equally to this
19		case. In light of the recent settlement regarding PWW's ratemaking methodology, I will
20		be referring to PWW's recent rate case in DW 16-806 throughout my testimony.
21	Q.	What are the important similarities in the way the City's acquisition affected the
22		operation of PEU and PWW?

1	А.	One of the most important consequences is that both PEU and PWW, after the City's
2		acquisition of Pennichuck, no longer have access to the private equity markets as a
3		method of financing a portion of their capital needs, like most Investor Owned Utilities
4		("IOU's"), whereby a 50/50 debt/equity ratio is considered optimal, but at an elevated
5		cost to rate payers due to a return on equity needed to benefit public company
6		shareholders. As such, and as contemplated during the Commission's proceeding to
7		approve the City's acquisition of Pennichuck in DW 11-026, after the acquisition, PEU
8		and PWW are expected to finance their on-going capital needs entirely through the
9		issuance of debt.
10	Q.	Does reliance solely on debt to finance PEU's operations have impacts on PEU's
11		customers?
12	А.	Yes. As contemplated during the acquisition proceedings, one positive result of this
13		anticipated debt financing is that the weighted cost of PEU's capital structure is
14		significantly lower than it was prior to the City's acquisition, due to the elimination of the
15		public company ROE dynamic discussed previously, as for PEU this ROE existed at
16		9.75% post-tax pre-acquisition (approximately 16% pre-tax). This lower cost of capital
17		has had and will continue to have direct beneficial benefits for PEU's customers.
18	Q.	Does reliance solely on debt to finance PEU's operations have consequences for
19		PEU's rate setting methods and procedures?
20	А.	Yes. As also contemplated in the acquisition Docket DW 11-026, the City's acquisition
21		of Pennichuck and the resulting need to finance utility operations solely with debt has
22		required modifications to PEU's (and Pennichuck's other utilities') ratemaking methods

1		and procedures. As a result of this reliance on debt, PEU is much more dependent on the
2		direct relationship of cash flow generated from rates, as it relates to the ongoing
3		repayment of debt in support of ongoing capital investments. Under the previous
4		ownership structure, the allowed return on public company equity allowed for extra cash
5		generated to cover the repayment of debt obligations, as well as adequate coverage of
6		operating expenses and dividend obligations to shareholders.
7 8 9	IV. Q.	RATEMAKING METHODOLOGY SETTLEMENT IN PWW'S RATE CASE, DOCKET NO. DW 16-806 Mr. Goodhue, you noted the impacts of the City's acquisition of Pennichuck on its
10		subsidiaries, including PEU and PWW, were similar. Please provide an overview of
11		PWW's 2016 rate case.
12	А.	In PWW's Docket DW 16-806, we were faced with many of the same issues that
13		presently face PEU. The City's acquisition resolved almost a decade of intense disputes
14		between the City and the pre-acquisition management of Pennichuck, and was premised
15		on the assumption that the City's ownership of the utilities would produce consistently
16		lower rates for ratepayers over time, as compared to the previous investor-owned utility
17		structure. On July 19, 2017, the Parties to Docket DW 16-806 filed a Settlement
18		Agreement which substantively updated the ratemaking methodology adopted in Docket
19		DW 11-026. As is outlined in the DW 16-806 Settlement Agreement, Pennichuck's
20		experiences since the DW 11-026 ratemaking methodology was approved demonstrated
21		some deficiencies in that methodology, but our experience also provided a basis to
22		understand what improvements to the methodology were needed. Those improvements

1		are reflected in the DW 16-806 Settlement. The DW 16-806 Settlement Agreement is
2		attached as Exhibit LDG-1 (excluding exhibits).
3	Q.	What are the primary benefits of the DW 16-806 Settlement Agreement?
4	A.	The modifications to PEU's ratemaking structure will increase PEU's required access to
5		the credit markets, provide adequate cash flows to repay their debts, give them the ability
6		to meet lender covenant requirements, and will provide lenders with the confidence in
7		PEU's ability to repay their debt obligations, all of which is fundamental for PEU to be
8		able to continue to access needed debt for infrastructure replacement and operations.
9	Q.	Did the Parties to the DW 16-806 Settlement Agreement anticipate that the modified
10		rate structure would also apply to PEU?
11	А.	Yes. The Settlement Agreement specifically includes the following provision on pages
12		14-15: "The Settling Parties agree that the current \$5,000,000 Rate Stabilization Fund
13		(RSF) maintained by PWW, which was established under the Original Rate Structure,
14		should be re-allocated amongst the three Penn Corp utilities such that PWW's allocated
15		share of the RSF shall now be \$3,920,000, with the remaining balance of \$1,080,000 to
16		be allocated between PEU and PAC. The allocation to PWW is based on the respective
17		three utilities' last Commission approved revenue requirements as detailed on <u>Exhibit 6</u>
18		of this Settlement Agreement. The Settling Parties agree that the \$1,080,000 portion of
19		the RSF that is proposed to be allocated between PEU and PAC shall remain in PWW's
20		RSF cash account until such time that rate case filings are made for PEU and PAC. At
21		that time, the modified rate structure for PWW that is proposed in this settlement
22		agreement will also be requested as the proposed rate structures for both PEU and PAC.

If the respective rate structures for PEU and PAC are approved by the Commission, the \$1,080,000 will then be transferred from PWW's RSF funds to the respective RSF funds to be established in PEU and PAC." Is PEU now seeking to implement the same ratemaking structure described in the **Q**. **16-806 Settlement Agreement?** Yes. This is the ideal time for the new ratemaking structure to apply to PEU. PEU Α. currently has lender covenants in place that exceed its ability to meet those requirements, and fully cover its cash flow obligations and covenant compliancy, under its existing rate structure, given the fact that PEU's depreciation lives are well in excess of its debt instrument lives, giving rise to the fact that the cash flow generated from depreciation does not fully meet the principal repayments on issued debt. Additionally, as PEU has no current access to the RSF funds at PWW, with the ability to repay any monies borrowed from those funds, the new methodology is needed to: (1) insure adequate EBITDA coverage for PEU, as it relates to covenant requirements, (2) provide adequate cash flows from revenues to pay debt service, CBFRR and operating expenses, and (3) provide adequate support funds in the form of the RSF accounts, to provide for cash funding

during times of revenue shortfalls and expense growth above inflationary levels between
rate case filings.

Q. Of the \$1,080,000 of RSF funds to be transferred from PWW to PEU and PAC, how much is reserved for PEU, and if that amount is insufficient to fully fund those RSF accounts, how does the Company anticipate handling the full funding of those accounts?

1	А.	Of the \$1,080,000 in RSF funds available from transfer from PWW to PEU and PAC,
2		\$980,000 is reserved for PEU and \$100,000 for PAC. As delineated in Mr. Ware's
3		testimony in support of this filing, the calculated need to fully fund the new RSF accounts
4		is actually \$1,310,000. As such, the available transferrable cash funds are \$350,000 short
5		of the overall assessed need at this time. This shortfall is anticipated to be funded in one
6		of the following ways: (1) to the extent the Company is able to collect refunds from its
7		property tax abatement and litigation proceedings, for previous years taxes returned to the
8		Company, it will seek approval internally from its Board of Directors to allocate those
9		funds as additional funding to establish the RSF accounts, (2) to the extent that the
10		Company monetized certain real property assets currently being pursued as available for
11		sale, as they are no longer used for well sites, booster station sites, or other water supply
12		purposes, the Company will seek approval internally from its Board of Directors to
13		allocate those funds as additional funding to establish the RSF accounts, and (3) to the
14		extent that the funds are still inadequately funded, the Company will seek full funding of
15		those accounts in its next promulgated future rate case.
16	Q.	Are there any differences from the Settlement Agreement that PEU is asking for at
17		this time?
18	А.	Yes. There is one exception to how we are asking to implement the modified rate
19		methodology. We propose to phase in the five-year test year revenue averaging into two
20		phases; implementing 50% of the impact of that change with this rate case, and then fully
21		implementing it with PEU's next rate case.

Q. Before we discuss why PEU is asking for this phased-in approach, please describe how the five-year averaging works under the modified rate methodology.

The purpose of the five-year averaging is to develop pro forma test year data regarding A. 3 revenues and expenses which is less likely to reflect unusual or abnormal events, such as 4 a uniquely dry or wet summer. Under the DW 16-806 modified rate methodology, the 5 "test year" revenues use the trailing five-year average consumption at the most recently 6 approved volumetric rates and fixed charges. The five-year trailing average consumption 7 determination shall be based on the four calendar years immediately preceding the 8 designated test year for which the rate case is filed as well as the test year itself. 9 Additionally, all direct test year expenses which are affected by differences in 10 consumption, including but not limited to purchased water expense, electricity expense, 11 and chemical treatment expense, also include pro forma adjustments to reflect the pro 12 forma difference in consumption between the five-year average and the test year. 13 Although the modified methodology includes this five-year average test period for 14 computing its revenue deficiency, the Settlement Agreement specifically states that 15 neither Staff nor the OCA are precluded from making an alternative recommendation in 16 place of the five-year average with respect to the determination of revenue deficiency. 17 Please describe how you are asking the five-year average be implemented for PEU. **Q**. 18 As I noted earlier, we are proposing to phase in the five-year averaging over two rate A. 19 cases. We plan to calculate the full effect of the five-year average for the 2016 test year 20 under this rate case, and include 50% of the impact of that pro forma calculation into this 21

filing. At our next rate case, we will compute the five-year average for that test year, and

1		include 100% of its impact in that next filing. Even though the Company desires to get
2		onto the five-year average method as soon as possible, the impact on customers to phase
3		it in 100% in this rate case represented approximately an additional 2.5% increase in
4		current rates. As we felt this to be overly onerous, we have elected this two-phase
5		approach, with the understanding that this would represent nearly \$180,000 in reduced
6		revenue request in this filing. Part of the rationale in being able to take this approach
7		results from the cash generated from revenues in 2016, due to elevated consumption
8		levels from the drought conditions. Additionally, we offer this approach with the
9		understanding that it may cause the Company to utilize the RSF funds established in this
10		case, at a little greater level between this rate case and the next filed rate case, should
11		revenue levels dip significantly in the years between cases.
12 13	V.	OVERVIEW OF REQUESTS FOR RATE RELIEF AND MODIFICATIONS TO PEU'S RATEMAKING STRUCTURE
	V. Q.	
13		PEU'S RATEMAKING STRUCTURE

13 14 15 16 17 18 19	Q.	PEU'S RATEMAKING STRUCTUREMr. Goodhue, before describing the details of the proposed request for permanentrate relief, could you provide an overview of the nature of the proposal?The proposed rate relief proposal consists of two principal components. First, as set forthin our full rate filing materials which are described in more detail by Mr. Ware in histestimony, PEU is requesting an increase in annual revenues of approximately\$1,380,060, or 20.08%. Second, to account for asset additions made in 2017, PEU will
13 14 15 16 17 18 19 20	Q.	 PEU'S RATEMAKING STRUCTURE Mr. Goodhue, before describing the details of the proposed request for permanent rate relief, could you provide an overview of the nature of the proposal? The proposed rate relief proposal consists of two principal components. First, as set forth in our full rate filing materials which are described in more detail by Mr. Ware in his testimony, PEU is requesting an increase in annual revenues of approximately \$1,380,060, or 20.08%. Second, to account for asset additions made in 2017, PEU will be seeking a step increase of approximately \$80,199, or 1.16%. The requested increases

		methodology as was applied to PWW in Docket No. DW 16-806. Adopting the DW 16-
2		806 modified ratemaking methodology would allow PEU to provide adequate cash flow
3		to cover its overall cost of operations, including prudent operating expenses and debt
4		service costs, and provide its debt lenders with reasonable expectations of future rates
5		that are directly related in a common sense way to PEU's long-term, post-acquisition
6		capital requirements which rely on almost entirely on debt. To restate this, essentially
7		these modifications expressly acknowledge that PEU's reliance on debt financing
8		requires a ratemaking method that is based on a fixed multiple of the annual debt service
9		on existing debt, with the balance of the allowed revenue requirement tied to coverage of
10		prudent, normal and ongoing operating expenses.
11	Q.	In this request for rate increases, are there specific requests that PEU is making to
12		reduce the overall increase in rates to its consumers?
13	А.	Yes. We worked very hard to reduce the overall impact of this rate case on PEU's
13 14	А.	
	А.	Yes. We worked very hard to reduce the overall impact of this rate case on PEU's

14 15 16	Α.	Yes. We worked very hard to reduce the overall impact of this rate case on PEU's consumers. In addition to implementing the DW 16-806 methodology which should have long-term beneficial impacts, we are asking the Commission to eliminate the 4 ccf minimum applicable only to PEU's North Country systems (Birch Hill in North Conway,
14 15 16 17	Α.	Yes. We worked very hard to reduce the overall impact of this rate case on PEU's consumers. In addition to implementing the DW 16-806 methodology which should have long-term beneficial impacts, we are asking the Commission to eliminate the 4 ccf minimum applicable only to PEU's North Country systems (Birch Hill in North Conway, Sunrise Lake Estates in Middleton and Locke Lake Colony in Barnstead). In Docket
14 15 16 17 18	Α.	Yes. We worked very hard to reduce the overall impact of this rate case on PEU's consumers. In addition to implementing the DW 16-806 methodology which should have long-term beneficial impacts, we are asking the Commission to eliminate the 4 ccf minimum applicable only to PEU's North Country systems (Birch Hill in North Conway, Sunrise Lake Estates in Middleton and Locke Lake Colony in Barnstead). In Docket Nos. DW 08-052 and DW 09-051 (consolidated by Order No. 24,975 (June 5, 2009)), the
14 15 16 17 18 19	Α.	Yes. We worked very hard to reduce the overall impact of this rate case on PEU's consumers. In addition to implementing the DW 16-806 methodology which should have long-term beneficial impacts, we are asking the Commission to eliminate the 4 ccf minimum applicable only to PEU's North Country systems (Birch Hill in North Conway, Sunrise Lake Estates in Middleton and Locke Lake Colony in Barnstead). In Docket Nos. DW 08-052 and DW 09-051 (consolidated by Order No. 24,975 (June 5, 2009)), the North Country systems were transferred from PAC to PEU. The 4 ccf minimum was

1		expenses, absent the 4 ccf minimum monthly billed amounts. See Order No. 24,975 at p.
2		18-19. Since the 2009 Order, however, the ratio of seasonal and year-round residents has
3		shifted considerably, such that PEU now believes it can cover operating expenses based
4		on actual usage without applying a 4 ccf minimum. Although PEU will likely experience
5		a short term loss in revenue, we believe those losses can be absorbed. Additionally,
6		eliminating the 4 ccf minimum has two additional impacts that are important to observe:
7		(1) a good portion of the residents in those systems that were seasonal residents in the
8		past, are now full year retired residents using far less than 4 ccf per month for actual
9		consumptive purposes, and (2) the Company has had to implement certain outside
10		watering restrictions for the residents in the Locke Lake system on a recurring annual
11		basis (and for residents in all three systems in the fall of 2016), due to supply concerns
12		which were exacerbated during the extended drought from mid-2015 through early 2017.
13		As such, the 4 ccf minimum is contrary to normal use levels for full year residents in
14		those systems, as they are now comprised, and it is also at odds with the water
15		conservation and stewardship measures that the Company regularly maintains for those
16		systems.
17	Q.	What other requests is PEU making in this rate case to reduce the overall increase
18		in rates to its consumers?
19	А.	In the same 2009 Order No. 24,975, the Commission approved a capital recovery
20		surcharge to recover all capital costs, including the purchase price, for the North Country
21		systems. The surcharge was based on system-specific capital improvement costs and was
22		to be recovered over thirty-years. PEU plans to reduce the surcharge that currently

1		applies to Birch Hill and Locke Lake by refinancing existing inter-company loans, which
2		are directly tied to these surcharges, whereby the terms of those loans will be extended at
3		current estimated cost of borrowed fund rates. This revised surcharge will not apply to
4		Sunrise Lake Estates, as it would cause the surcharge on those customers to increase,
5		contrary to the overall intent in this action. PEU is unable to achieve a complete
6		elimination of the surcharge at this time because of the resulting negative impact it would
7		have on PEU's other consumers. However, the reduction in surcharge for the Locke
8		Lake and Birch Hill customers will be substantial, bringing the surcharge for Locke Lake
9		customers down from \$16.36 per month to \$12.81 per month, and for Birch Hill
10		customers down from \$46.05 per month to \$12.81 per month, representing a decrease of
11		22% and 72%, respectively. See Tab 12, Sch 5.
12	Q.	Are there any other requests being made in this rate case that you believe will
12 13	Q.	Are there any other requests being made in this rate case that you believe will reduce the impact on PEU's customers?
	Q. A.	
13		reduce the impact on PEU's customers?
13 14		reduce the impact on PEU's customers? Yes. As was I described above, PEU is asking the Commission to phase in the 5-year
13 14 15		reduce the impact on PEU's customers? Yes. As was I described above, PEU is asking the Commission to phase in the 5-year trailing average approach to establishing test period information. By implementing it in
13 14 15 16	А.	reduce the impact on PEU's customers? Yes. As was I described above, PEU is asking the Commission to phase in the 5-year trailing average approach to establishing test period information. By implementing it in two phases, we were able to reduce the rate increase request by approximately 2.5%.

13 14 15 16 17 18 19	A. Q.	reduce the impact on PEU's customers? Yes. As was I described above, PEU is asking the Commission to phase in the 5-year trailing average approach to establishing test period information. By implementing it in two phases, we were able to reduce the rate increase request by approximately 2.5%. Mr. Goodhue, in practical terms, what would be the impact on the average residential monthly bill if all aspects of PEU's proposed rate relief were approved by the Commission?

1		addition to the impact on an average customer bill, it is important to note the specific
2		impact on customers in the North Country systems, due to the elimination of the 4ccf
3		minimum and the alteration of the surcharges. Currently, the average North Country
4		system customer only uses 3.5 ccf per month, and as such, the impact on their bills from
5		the elimination of the 4 ccf minimum would be a reduction in their monthly bill of \$3.12
6		(at the current volumetric rate of \$6.24/ccf), coupled with a reduction of \$33.24 per
7		month reduction in Birch Hill surcharge and/or \$3.55 per month reduction in the Locke
8		Lake surcharge.
9 10	VI.	SUMMARY OF PROPOSED RATE RELIEF AND IDENTIFICATION OF PROPOSED MODIFICATIONS TO PEU'S RATEMAKING STRUCTURE
11	Q.	Mr. Goodhue, would you please briefly describe the rate relief requested in this
12		proceeding by PEU?
13	А.	As is summarized above, with the filing of its full rate case documents as required by the
14		Commission's administrative rules, PEU is requesting the Commission to approve,
15		pursuant to its general permanent rate-setting authority, a rate increase of 20.08%,
16		bringing its allowed revenues to a projected level of \$8,432,991, as detailed in PEU's rate
17		case filing at Tabs 12 and 13.
18	Q.	Would you briefly describe the basis for this requested rate relief?
19	А.	The fundamental basis for this request is that it represents the revenues required to cover
20		PEU's current operating expenses and to meet the demonstrated costs of servicing PEU's
21		direct debt obligations plus its share of the CBFRR. PEU has prepared its ratemaking
22		schedules to demonstrate this fundamental basis.
23	Q.	Is PEU also requesting a step increase in this proceeding?

1	А.	Yes. To account for \$1,014,497 of projected asset additions made in 2017, PEU will be
2		seeking a step increase of approximately \$80,199, or 1.16%. The requested increases
3		will result in a combined total rate increase of approximately 21.24%.
4	Q.	Is the rate increase the only relief that PEU is seeking in this proceeding?
5	А.	No. As described above, PEU is also requesting that the Commission approve, pursuant
6		to its general ratemaking authority, such modifications to the ratemaking methodology
7		for PEU that it has approved for PWW in DW 16-806. PEU has filed its Petition for
8		Further Modifications to Ratemaking Structure to affect this request in a formal manner.
9		As described below, in order to provide a clear factual basis for the Commission's review
10		of the proposed modifications, PEU has prepared its ratemaking schedules to reflect not
11		only the operation of the current ratemaking method as established by the Commission in
12		DW 11-026, but also operation of the modifications requested by PEU in its Petition
13		under the methodology approved in DW 16-806. The rate increase being requested by
14		PEU in this case is based on the DW 16-806 modified methods reflected in the
15		ratemaking schedules.
16	Q.	Why is PEU filing a rate case at this time?
17	A.	PEU is filing a rate case at this time for a number of reasons. First, PEU has invested
18		approximately \$7.5 million in capital improvements and infrastructure replacements since
19		the beginning of 2013, for which debt was raised in 2014, 2015 and 2016, and the current
20		rates do not include the necessary dollars in the existing revenue requirement to fund the
21		repayment of those debt instruments, for both principal and interest. Second, operating

expenses of the Company have increased at or above the rate of inflation, as well as 22

1		significant increases in property taxes consistently above inflationary levels, since the last
2		filed permanent rate filing. In the case of property taxes, the Company does proactively
3		process abatements for valuations that are deemed to be in excess of allowed or
4		reasonable levels, given the current RSA allowing for the taxation of Utility Property as
5		Real Property at both the State and Local level. As of the date of filing this case, the
6		successful abatement of taxes for two communities served by PEU are included in the
7		increases being requested, as a reduction to the increases filed for (as compared to the
8		increases cited in PEU's Notice of Intent filed on August 16, 2017). Additionally, PEU
9		has one local tax valuation that is in the process of being litigated, and if successful, the
10		positive results that might be brought to bear from that proceeding will be reflected in the
11		final rate increase requested at the conclusion of this case. Overall, the rate case being
12		pursued at this time is necessary to provide for the ongoing cash flow needs to fund
13		ongoing operating expenses and fund the repayment of debt obligations, as available to
14		PEU in support of its ongoing obligations to its ratepayers.
15	Q.	Please discuss the format of the ratemaking schedules filed by PEU upon which the
16		requested rate relief is based.
17	А.	PEU's requested rate relief is based on the modified ratemaking structure set forth in its
18		filed ratemaking schedules. As further described in the testimony of Mr. Ware, these
19		schedules embody financial information and resulting rates attributable to three distinct
20		scenarios: (1) application of the modified ratemaking structure approved by this
21		Commission in DW 11-026; (2) application of this modified ratemaking structure
22		including the modifications described in DW 16-806; and (3) application of ratemaking

1		models assuming that PEU were still an investor-owned utility. PEU's requested rate
2		relief is based upon the DW 16-806 modified ratemaking structure.
3	Q.	Mr. Goodhue, how do the rates resulting from applying the DW 16-806
4		modifications to PEU's ratemaking structure compare to the rates that would result
5		from application of the existing modified ratemaking structure approved by the
6		Commission in DW 11-026?
7	А.	As indicated in Mr. Ware's testimony and on Exhibit DLW-1, Tab 12 (Customer Impact),
8		the projected aggregate revenues estimated to be allowed under the current modified
9		ratemaking methodology (DW 11-026) would be \$7,630,612, a percentage increase over
10		the test period revenues of 11.01%. In contrast, as shown on the same Exhibit, the
11		projected aggregate revenues estimated to be allowed when the DW 16-806
12		modifications are applied (including proposed step increases attributable to 2017
13		additions) would be \$8,334,275, a percentage increase over the test period revenues of
14		21.24%.
15	Q.	If the current DW 11-026 methodology would result in a 13.18% increase, why are
16		you asking the Commission to modify the methodology which results in a 21.50%
17		increase?
18	А.	As I described in my testimony above, PEU currently has lender covenants in place that it
19		cannot meet and fully cover its cash flow obligations. This is because of the fact that
20		PEU's depreciation lives are well in excess of its debt instrument lives, giving rise to the
21		fact that the cash flow generated from depreciation does not fully meet the principal
22		repayments on issued debt. Additionally, the new methodology is needed to: (1) insure

1		adequate EBITDA coverage for PEU, as it relates to covenant requirements, (2) provide
2		adequate cash flows from revenues to pay debt service, CBFRR and operating expenses,
3		and (3) provide adequate support funds in the form of the RSF accounts, to provide for
4		cash funding during times of revenue shortfalls and expense growth above inflationary
5		levels between rate case filings. If PEU continues to operate under the current DW 11-
6		026 methodology, the Company will become financially insolvent.
7	Q.	How do the rates resulting from applying these proposed modifications to PEU's
8		ratemaking structure compare to the rates that would have resulted assuming that
9		PEU had remained an investor-owned utility, as it was pre-acquisition?
10	A.	As indicated on Tab 12, Exhibit DLW-1 (Customer Impact), based on the assumptions
11		stated in that exhibit, the projected aggregate revenues estimated to be required for a pre-
12		acquisition investor-owned utility would be \$8,397,210, a percentage increase over the
13		test period revenues of 22.16%.
14	Q.	Mr. Goodhue, can you provide a projection of how PEU's rates would increase
15		under the proposed modified ratemaking methodology in the future?
16	А.	The Company anticipates rates would increase at approximately the rate of inflation
17		going forward. This is based upon the following assumptions: (1) the CBFRR revenues
18		of the Company will remain at a fixed level until 2042, (2) normal operating expenses
19		will increase at approximately the rate of inflation, (3) property taxes may continue to
20		increase at rates of 5-8% per annum, and (4) the Company will be investing \$1-1.5M
21		annually on Capital and Infrastructure Improvements, at borrowed interest rates of
22		between 2.5-4.5%. These increases would be implemented on an annual basis through

1		the QCPAC surcharge for the debt service times 1.1, plus property taxes, on annual
2		Capex spending, and then "trued up" for increases in operating expenses with rate cases
3		filed about every 3 years, to reset permanent rates, and to refill or refund monies from the
4		RSF accounts.
5	Q.	How would these projected resulting rates compare to the rates that would likely
6		have resulted under private ownership?
7	A.	These rates would continue to be lower than rates under private ownership as a subsidiary
8		of a publicly-traded investor owned utility. This is based upon the fact that the
9		Company's cost of debt is only 2.5-4.5% currently, whereas under that ownership
10		structure, PEU earned a ROE of approximately 16% pre-tax, on approximately 50% of its
11		investments in infrastructure.
12	Q.	Has PEU prepared a cost of service study in connection with this filing?
13		
10	A.	No. PEU is not seeking any change in rate design in this proceeding. There have not
14	A.	No. PEU is not seeking any change in rate design in this proceeding. There have not been any significant changes in the composition of PEU's customer base, and therefore
	А.	
14	А. Q.	been any significant changes in the composition of PEU's customer base, and therefore
14 15		been any significant changes in the composition of PEU's customer base, and therefore PEU does not believe that a Cost of Service Study is required.
14 15 16	Q.	been any significant changes in the composition of PEU's customer base, and therefore PEU does not believe that a Cost of Service Study is required. Has PEU provided PEU's payroll figures?
14 15 16 17	Q.	 been any significant changes in the composition of PEU's customer base, and therefore PEU does not believe that a Cost of Service Study is required. Has PEU provided PEU's payroll figures? PEU does not have its own employees. Instead it pays PWW a management fee under

Has PEU provided PEU's payroll figures? PEU does not have its own employees. Instead it pays PWW a management fee under which PWW provides employee services to PEU. The management fee is shown in Tab
14 15 16 17 18 19	Q. A.	 been any significant changes in the composition of PEU's customer base, and therefore PEU does not believe that a Cost of Service Study is required. Has PEU provided PEU's payroll figures? PEU does not have its own employees. Instead it pays PWW a management fee under which PWW provides employee services to PEU. The management fee is shown in Tab 12 at Sch 1 Attach C, Page 2.

1	A .	The principal approval required to effect the requested permanent rate relief and proposed
2		modifications is the approval of this Commission under RSA 378:8 and :28. The
3		requested rate relief and proposed modifications have already been approved by PEU's
4		and Pennichuck's Board of Directors.
5	VIII.	JUST AND REASONABLE FINDING AND CONCLUSION
6	Q.	Mr. Goodhue, do you believe that PEU's proposed rate relief and application of the
7		modifications to the ratemaking structure described in DW 16-806 will result in just
8		and reasonable rates?
9	А.	Yes. I believe the requested rates and the proposed modifications are just and reasonable
10		for several reasons.
11		First, the requested rates, including the effects of the proposed modifications to PEU's
12		ratemaking structure, are generally consistent with the long-term projections presented in
13		DW 11-026, which assumed an average annual increase in rates of approximately 3% and
14		with the fundamental premises underlying the Commission's approval of the City of
15		Nashua's acquisition of Pennichuck and its utilities. While the rate increase requested in
16		this proceeding, which reflects the cumulative revenue and operating requirements of
17		four years with no permanent rate relief, is significant, when the cumulative increase is
18		examined as an average annual increase, it is generally consistent with the original
19		assumptions of the acquisition docket, giving consideration to the fact that property taxes
20		have increased at a rate above levels contemplated at that time.
21		Second, the requested rates continue to be lower than the levels that are reasonably
22		projected to result from continued private investor ownership under the pre-acquisition

1	structure. This benefit to ratepayers, which was one of the principal reasons for the
2	approval of the City's acquisition, is due in large part to the fact that PEU has been
3	migrating to a utility that will finance all of its material capital needs by the issuance of
4	debt, which results in a materially lower weighted cost of capital than a private investor-
5	owned utility with a more traditional debt and equity capitalization.
6	Third, the requested rates are necessary to maintain PEU's ability to continue to provide
7	safe and high quality water service, by financing continued reasonable and prudent
8	operations and by having access to borrowed funds necessary to finance required capital
9	assets and infrastructure.
10	Fourth, the requested modifications to PEU's current ratemaking structure are the result
11	of a careful examination of the experience obtained through the prior two major debt
12	financings completed for its sister subsidiary, PWW, as well as covenant compliancy
13	issues experienced by both PEU and its parent Pennichuck Corporation. This experience
14	has allowed PWW to develop the specific modifications proposed in DW 16-806 and
15	further to have confidence that these modifications will enhance PWW, PEU and PAC
16	the ability to access debt markets and/or term loans in the future at affordable interest
17	rates and at reasonable covenants. In some ways, this experience was an important
18	prerequisite to developing the specific proposed enhancements, which is why PWW
19	pursued the modified rate structure first in DW 16-806, with the full expectation that this
20	methodology would then be applied to both PEU and PAC in their next rate case filings.
21	Fifth, based on the ratemaking schedules filed by PEU as part of this rate case, the
22	requested rates will demonstrably enable PEU to generate sufficient cash flows to support

- its ongoing operational and capital needs, as well as service its existing outstanding debt
 obligations.
- Q. Mr. Goodhue, do you believe that the requested rate relief and adoption of the proposed modifications are required to ensure that PEU continues to be able to provide safe and high quality water service to its customers?
- Yes. PEU's current ratemaking structure only provides a fixed coverage component in A. 6 the revenue requirement for the repayment of principal and interest to the City of Nashua 7 under the CBFRR. Without an equity return allowable to the Company, PEU does not 8 have a rate structure that insures adequate cash flow coverage to cover all of its 9 remaining operating expenses and the repayment of principal and interest on the balance 10 of its debt obligations. This is further exacerbated by the fact that the cash flow 11 generated from depreciation under the return on rate base is funded by assets with an 12 average composite life of approximately 42 years, with some assets at 80 year lives. This 13 cash flow is what is intended to provide the cash flow to repay the principal on debt used 14 to fund the investment in rate base. However, the maximum life of debt available to PEU 15 is 25 years, with a large portion of its debt instruments requiring repayment in 20 years. 16 As such, the cash flow from depreciation is not nearly sufficient to cover the principal 17 repayment cash flow requirements. Additionally, without the free cash flow generated by 18 a return on equity, when PEU experiences reductions in revenue related to a wet year and 19 a related reduction in outside irrigation, revenues are not sufficient to meet the fixed 20 operating expenses of the Company. The cost of debt service for PEU, even at favorable 21 interest rates to the long term benefit of ratepayers, coupled with the increase of operating 22

1		expenses due to normal inflationary pressures, as well as increases above inflationary
2		levels for certain expense items (i.e., State and local property taxes), has created a
3		mismatch between the cash flow generated from a normal allowed rate of return and
4		depreciation expense on rate base, to the coverage of the cash flow requirements of
5		PEU's principal and interest payments and normal operating expenses. This inherent
6		mismatch which exists for PEU under the existing ratemaking structure (as a nearly
7		100% debt financed entity), coupled with the regulatory lag of obtaining rate relief 12-18
8		months after a given test year, has created and will continue to result in the revenues
9		allowed from traditional ratemaking being insufficient in generating the necessary
10		operating cash flows required to cover all of the Company's operating expense and debt
11		service needs, now and into the future. The requested rate relief and proposed
12		modifications to PEU's ratemaking structure are precisely targeted to correct these
13		deficiencies.
14	Q.	Mr. Goodhue, does this conclude your testimony?

15 A. Yes, it does.
