

Dear Sirs:

I am contacting you in regard to the unrealistic increase proposed for Litchfield's water rates. In comparison to surrounding towns and cities, the new rates are 2.9% to 5.7% times higher. I find that unjustifiable.

You should be aware that Litchfield has several 55+ condominium developments. Many of those residents are retired, living on a fixed income. Additionally, Litchfield has no public sewer system. If the water rates include a factor for flowing into public sewage, that should be eliminated.

I hope that you'll seriously consider leaving our rates as they currently stand.

Thank you for your consideration,

James Culver
