Re: DE 09-176, DE 09-182 and DE 09-187, New Hampshire Electric Cooperative, Inc.
Certification Applications for Class II Eligibility Pursuant to RSA 362-F on
behalf of homeowners Jeffrey Bussgang, Paul Yelle, and Richard Stuart

Dear Mr. McNeil:

On September 21, 2009, you submitted applications on behalf of homeowners Jeffrey Bussgang, Paul Yelle, and Richard Stuart requesting certification of three customer-sited rooftop solar photovoltaic facilities as eligible to produce Class II renewable energy certificates (RECs) pursuant to RSA 362-F, New Hampshire's Electric Renewable Portfolio Standard law. Staff has reviewed the applications and recommended approval noting that the applications were complete on September 21, 2009.

Class II eligibility requires that a facility began operation after January 1, 2006 and that it produces electricity from solar technologies. The applications indicate that the facilities are customer-sited solar photovoltaic rooftop arrays located in New Hampshire and began operation in the spring of 2009. The details for each facility are listed in the following table.

Commission Assigned Docket #	Facility Owner	Facility Location	Operation Date	Total kW listed in application (DC Arrays)	NH Certification Code
DE 09-176	Jeffrey Bussgang	8 Shorewood Dr., Moultonborough, NH	May 19, 2009	4.41	NH-II-09-043
DE 09-182	Paul Yelle	133 Hogback Rd., Campton, NH	May 28, 2009	2.00	NH-II-09-044
DE 09-187	Richard Stuart	677 Squam Lake Rd., Sandwich, NH	June 5, 2009	2.40	NH-II-09-045

October 29, 2009
Page two

Since the facilities are customer-sited sources, their output is not recorded in the NEPOOL Market Settlement System and, as a result, their output must be monitored and verified by an independent monitor. The applications state that NHEC will monitor the facilities' output as required by N.H. Code Admin. Rule Puc 2505.08.

Based on Staff's recommendation, the Commission has determined that NHEC has provided all the necessary information to demonstrate that the facilities are eligible for certification as Class II facilities. Therefore, the Commission hereby certifies that the Jeffrey Bussgang, Paul Yelle, and Richard Stuart facilities are Class II renewable energy sources effective September 21, 2009 and are eligible to be issued New Hampshire Class II renewable energy certificates.

The New Hampshire Renewable Portfolio Standard certification codes for the NHEC solar photovoltaic facilities are listed in the previous table.

Sincerely,

Debra A. Howland
Executive Director
