Re: DE 09-181 and DE 09-183, New Hampshire Electric Cooperative, Inc.
Certification Applications for Class II Eligibility Pursuant to RSA 362-F on
behalf of homeowners Kevin Creel and Chris Read

Dear Mr. Palma:

On September 21, 2009, you submitted applications on behalf of homeowners Kevin Creel and Chris Read requesting certification of two customer-sited wind power facilities as eligible to produce Class I renewable energy certificates (RECs) pursuant to RSA 362-F, New Hampshire's Electric Renewable Portfolio Standard law. Staff has reviewed the applications and recommended approval noting that the applications were complete on September 21, 2009.

Class I eligibility requires a facility to have begun the production of electricity after January 1, 2006 and to use certain sources to produce electricity, one of which is wind energy. The applications indicate that the facilities are customer-sited wind power facilities located in New Hampshire and began operation in 2008 and 2009. The details for each facility are listed in the following table.

Commission Assigned Docket #	Facility Owner	Facility Location	Operation Date	Total kW listed in application	NH Certification Code
DE 09-181	Kevin Creel	237 Mountain Rd., Lempster, NH	August 12, 2009	2.4	NH-I-09-046
DE 09-183	Chris Read	169 Dale Rd., Center Sandwich, NH	December 11, 2008	2.6	NH-I-09-047

Since the facilities are customer-sited sources, their output is not recorded in the NEPOOL Market Settlement System and, as a result, their output must be monitored and

verified by an independent monitor. The applications state that NHEC will monitor the facilities' output as required by N.H. Code Admin. Rule Puc 2505.08.

Based on Staff's recommendation, the Commission has determined that NHEC has provided all the necessary information to demonstrate that the facilities are eligible for certification as Class I facilities. Therefore, the Commission hereby certifies that the Kevin Creel and Chris Read facilities are Class I renewable energy sources effective September 21, 2009 and are eligible to be issued New Hampshire Class I renewable energy certificates.

The New Hampshire Renewable Portfolio Standard certification codes for the NHEC wind power facilities are listed in the previous table.

Sincerely,

Debra A. Howland
Executive Director
