DE 17-136 EERS Performance Incentive Working Group AGENDA May 23, 2018, 1:30 pm – 4:30 Hearing Room A

AGENDA

- 1. Introductions
- 2. Presentation and Discussion: MA's PI Model and Potential Applications in NH Utilities
- 3. Current PI Formula and VEIC's "Best Practices" for Performance Incentive Design (Emily Levin's presentation of 7/11/17):
 - What type of savings to measure?
 - ✓ Lifetime Savings or Annual Savings
 - ✓ kWh or Dollars
 - ✓ Net Savings or Gross Savings
 - Modification of minimum percentage thresholds (currently 55% and 65%).
 - Include B/C as a minimum threshold instead of a metric.
 - Consider tiered incentives (e.g. 2% at 75% of goal, 3% at 85% of goal, etc.).
 - Consider adoption of multivariate metrics with different weightings (see VT's QPI model).
