**** AGENDA ****

1. Welcome and Introductions
2. Approval of December EESE Board Meeting Minutes
3. Presentation: Nathan Peabody – M.S. Environmental Economics, University of N.H.
Economic and environmental life cycle assessment of light duty electric vehicle fleets in New England
Four light duty fleet vehicle technologies are compared while accounting for New England specific variables such as climate, ISO-NE grid inputs, and NHDES fleet characteristics. An economic life cycle assessment and an environmental life cycle framework are used to estimate GHG emissions associated with each vehicle type while accounting for EV battery production and “extended tailpipe” emissions. Together these two life cycle approaches will provide fleet managers a more detailed understanding of total costs and environmental impacts of each vehicle type within New England.
4. Chair and Vice Chair elections – Madeleine Mineau has been nominated as Chair and Matthew Mailloux has been nominated as Vice-Chair.
