

QUESTIONS AND ANSWERS

RFP #2017-002

NEW HAMPSHIRE PUBLIC UTILITIES COMMISSION

REQUEST FOR PROPOSALS

C&I Solar Projects Inspection

	<b>Questions</b>	<b>Answers</b>
1.	Does the Commission have list of potential projects requiring inspection? If yes, can the Commission please provide, as part of the solicitation process, the technology type (solar PV or solar thermal), location (city/town), and approximate nameplate capacity for each project?	1. The Commission does not have a pre-determined specific set of potential projects selected for inspection and/or verification by the Consultant. The Commission expects that the primary focus of the inspections will be larger Solar PV systems (greater than 100 kW AC and less than or equal to 500 kW AC) installed within the last two years in Central and Southern New Hampshire.
