I. BACKGROUND

In June 2002, the New Hampshire electric utilities jointly developed and implemented a set of “core” energy efficiency programs (Core programs) that use the same eligibility requirements, and design, among other things, to ensure consistency among the utilities. The electric utilities include Liberty Utilities (Granite State Electric) Corp. d/b/a Liberty Utilities, New Hampshire Electric Cooperative, Inc. (NHEC), Public Service Company of New Hampshire d/b/a Eversource Energy, and Until Energy Systems, Inc. In December 2002, the two natural gas utilities (i.e., EnergyNorth Natural Gas, Inc. d/b/a Liberty Utilities and Northern Utilities, Inc.) developed and implemented a set of energy efficiency programs. The electric utilities and natural gas utilities are collectively referred to herein as the Utilities. The Commission Staff and the Utilities work collaboratively to prioritize the Monitoring and Evaluation (M&E) needs of New Hampshire. One of those areas identified as a priority was to establish a multi-year evaluation plan that addresses the needs of New Hampshire as well as the measurement and verification requirements of the ISO-NE Forward Capacity Market.

On November 1, 2000, the Commission issued Order No. 23,574 in DR 96-150: Order Establishing Guidelines for Post-Competition Energy Efficiency Programs. That Order directed the NH utilities to implement a “thoughtful and thorough monitoring and evaluation program, noting that “an assessment of energy efficiency programs and measures should analyze the effects of the programs and measures on removing and reducing market barriers or transforming the market for those products. Impact and process evaluations are important, as well.”

On December 31, 2002, the Commission issued Order No. 24,109 in DG 02-106. This order approved energy efficiency programs for EnergyNorth and Northern Utilities.

In Order No. 24,599, issued on March 17, 2006, the Commission approved an agreement for Commission Staff to take direct responsibility for the monitoring and evaluation of the Core energy efficiency programs on a collaborative basis with utilities and other interested parties. As a result, Commission Staff had primary responsibility for overseeing M&E of the Core programs, until development of the Energy Efficiency Resource Standard (EERS) and the EM&V Working Group.

As part of the evaluation of Core electric and natural gas energy efficiency programs, over the course of 2008, the Commission and Utilities engaged a consultant, GDS Associates Inc., to undertake a major energy efficiency potential study. Among other things, that study analyzed current saturation rates of energy-using equipment and penetrations of energy efficiency equipment and practices in each end-use category, evaluated the extent to which past and current energy efficiency programs have achieved energy savings to date, including various sensitivity analyses, and recommended modifications to program and measure offerings that could increase the likelihood of achieving the identified potential. This report can be found at:

www.puc.nh.gov/Electric/GDS%20Report/GDS%20Final%20Report.htm.

On February 1, 2013, the Commission issued Order No. 25,462 requiring the continuation of quarterly reports. These reports can be found at:

<http://www.puc.nh.gov/Electric/coreenergyefficiencyprograms.htm>

Traditional process, impact evaluation, and market assessment activities represent approximately five percent of the overall Core program budget.

The Commission and the Utilities are partners in the Northeast Energy Efficiency Partnerships' (NEEP) activities including the Regional EM&V Forum. The natural gas utilities explore opportunities to decrease the cost of planned evaluation efforts by performing research in collaboration with industry partners such as NEEP and GasNetworks™.

In 2016, the Commission established an EERS for New Hampshire Utilities. The Commission has long required the utilities to help their customers save money by using less electricity and gas. The State's 10-year energy strategy, developed under RSA 4-E:1 and crafted with the input of consumer groups, environmental advocacy organizations, utilities, and others, also calls for maximizing cost-effective energy efficiency investments. The Core energy efficiency programs and the EERS have given the utilities 18 years of experience with developing and implementing cost-effective programs.

As part of establishing EERS, the Commission approved a Settlement Agreement incorporating EM&V activities. Rigorous and transparent EM&V is essential to a successful EERS, to ensure that the energy efficiency programs actually achieve planned savings in a cost-effective manner. The Settlement Agreement envisions that the consultant(s) will share information and provide advice to other stakeholders, including the EERE Board, and this collaboration will enhance the development of EM&V framework for EERS programs going forward. Further, the

development and continuing updating of a Technical Resource Manual, as proposed by the Settlement Agreement, will enhance EM&V transparency, consistency and accuracy.

Budgets for EM&V activities are approved by the Commission in the context of the EERS filings, approved in December.

Following the submission by utilities of their 2018-2020 Energy Efficiency Plan ([Three Year Plan](#)) on September 1, 2017, and the review of that plan by Staff and the Parties, a Settlement Agreement was filed by the parties which called for the approval of the Three Year Plan with some modifications. The agreement incorporated the Three Year Plan's EM&V recommendations, which included establishment of an EM&V Working Group to manage and oversee evaluations, and the development of a Strategic Evaluation Plan based on a Six Year Evaluation Plan prepared for the Commission in 2014.³ The Commission held a hearing on the Settlement Agreement on December 13, 2017, and the Commission approved the Settlement Agreement by Order [26,095](#) issued on January 2, 2018.

In the December 2019 [Settlement Agreement](#) approved by the Commission in [Order No. 26,323](#), parties agreed that the EM&V consultant was valuable and that the Commission would solicit similar assistance beyond 2020 during the next three-year plan.

II. SCOPE OF SERVICES AND DELIVERABLES

The December 2019 Settlement Agreement approved the continuation of consultant assistance as provided for in the April 2016 Settlement Agreement. The consultant(s) will be engaged by, and report to, the Commission to assist Commission Staff, the Utilities, and the Settling Parties, the EESE Board or successor, and others determined by the Commission who will be participating in EM&V activities.

The general scope and purpose of services to be provided by the consultant(s) are as follows:

Step 2: An Evaluation Team consisting of Staff members shall preliminarily score conforming proposals and conduct interviews, if requested, as described below. The Evaluation Team shall score all proposals using pre-published scoring criteria set forth in this RFP and develop a score for each proposal from 0-100 points.

Step 3: Based on the proposals, the scores developed by the Evaluation Team at Step 2, and following interviews and/or written questions, if applicable, and review of references, the Evaluation Team shall generate final consensus scores for each proposal, rank all proposals, and submit its recommendation to the Commissioners. Selection is subject to review and approval by the Commission.

Step 4: The Commission shall negotiate, if necessary, and develop a contract and related documents consistent with the RFP, then submit the completed contract(s) to Governor and Executive Council for approval.

Notwithstanding any other provision of this RFP, this RFP does not commit the Commission to make an award of a contract. The Commission reserves the right, at its sole discretion, to reject any or all proposals, or any portions thereof, for any reason, at any time, including, but not limited to, canceling the RFP, and to solicit new proposals under a new acquisition process. If, for any reason, negotiations with the top scorer(s) do not result in a contract(s), the Commission may go to the next highest scorer(s) and seek to negotiate with that proposer(s).

Proposals shall be deemed incomplete and ineligible if information that is essential to the scoring evaluation is not included in the proposal. Proposals that fail to meet the following application requirements will be deemed ineligible:

- Filing of a timely proposal, with the correct number of paper and electronic copies, and all mandatory elements;
- Identification of key personnel, and potential contractors or subcontractors, if applicable, or a detailed process and timeline to identify and engage any such contractors or subcontractors;

All proposals deemed ineligible shall receive notification of this determination.

Broadly, the Commission will evaluate all proposals received and deemed eligible based upon completeness, clarity, quality of the proposal, how well the proposal meets the approved Scope and Timeline requirements, reasonableness of cost, the qualifications and relevant experience of the consulting team, and the likelihood of the consulting completion within the contract period. All proposals deemed eligible for consideration will be evaluated based upon the specific criteria identified.

If determined to be appropriate by the Commission, proposers may be invited to oral interviews. The Commission retains the sole discretion to determine whether to conduct oral interviews, with which proposers, and the number of interviews. Proposers are advised that interviews may be conducted with fewer than all proposers. No proposer with a preliminary score of 70 or less will be interviewed.

The purpose of oral interviews is to clarify and expound upon information provided in the written proposals. Proposers are prohibited from altering the basic substance of their proposal during the oral interviews. Proposers may be asked to provide written clarifications of elements in their proposals, regardless of whether an oral interview will be conducted.

Information gained from oral interviews will be used to refine scores assigned after the Step 2 review of the Proposal.

B. Scoring Criteria

The Commission shall consider all of the following criteria, and assign a corresponding point score, where a maximum score for all criteria shall be 100 points. If any part of its proposal contains information that a proposer asserts is exempt from public disclosure, **the proposer must specifically identify all relevant text**

in a letter to the Commission, and must mark or stamp each page of the materials claimed to be exempt from disclosure as “confidential,” and provide support for such assertion(s) as part of proposer’s response to this RFP. The proposer shall explain, in writing, what measures it has taken to keep such information confidential, and the personal privacy or competitive business interests that would be harmed if such information were to be publically disclosed. The explanation shall also identify by page number and proposal section number the specific information the proposer claims to be exempt from public disclosure pursuant to RSA 91-A:5. It is helpful if the text claimed to be confidential is also highlighted, underlined, or otherwise identified in the actual proposal itself. Marking the entire proposal or entire sections of the proposal (e.g., costs) as “confidential” will neither be accepted nor honored.

The Commission shall maintain the confidentiality of information contained in proposals, insofar as doing so is consistent with RSA Chapter 91-A. Any information a proposer identifies as exempt from disclosure shall be kept confidential until the Commission has determined, as necessary, whether such information is exempt from public disclosure pursuant to RSA 91-A.

In the event that the Commission receives a request to view portions of a proposal that the proposer has properly and clearly marked “confidential,” the Commission shall notify the proposer and specify the date the Commission intends to release the requested information, redacting any information the Commission independently concludes is exempt, consistent with applicable laws and regulations. Any effort to prohibit or enjoin the release of the information the Commission identifies for release shall be the proposer’s responsibility at the proposer’s sole expense. If the proposer fails to obtain a court order enjoining the disclosure, the Commission may release the information on the date the Commission specified in its notice to the proposer(s), or in its notice to any other relevant parties, without any liability to the proposer(s).

6. By submitting a proposal, a proposer agrees that in no event shall the Commission be either responsible for or held liable for any costs incurred by the proposer in preparation of or in connection with the proposal, or for work performed prior to the effective date of any resulting contract.

8. The Commission reserves the right to amend or cancel this RFP at any time. Proposers should check <https://www.puc.nh.gov/Home/requestforproposal.htm> for any addenda to this RFP before submitting their proposals, and for answers to any questions other parties may have submitted.

9. The selected consultant shall be required to submit a Taxpayer Identification Number (TIN), Employer Identification Number (EIN), or Social Security Number (SSN), and to register as a vendor with the State of New Hampshire.
10. The terms and conditions set forth in the State’s Form P-37 (version 12/11/2019) “Agreement, General Provisions” (General Provisions) for contracts, attached hereto as Appendix B, shall apply to the contract to be entered into with the winning proposer(s). In addition, each contract shall be supplemented by three exhibits: Exhibit A will include any special provisions, including any modifications to the General Provisions regarding insurance coverage and other matters; Exhibit B will set forth in detail the Scope of Services and reporting requirements; and Exhibit C will set forth in detail the price limitation, the source of payment (special utility assessment), and any preconditions to payment.
11. Once a contract becomes effective, any subsequent material changes or modifications to the contract terms must be submitted for review and prior approval by the Chairwoman and, if applicable, the Governor and Executive Council.
12. This RFP is not an offer. Neither the Commission nor this RFP shall create any commitment on the part of the State or confer any rights on the part of the proposer unless and until a binding written contract is executed between the Commission and the proposer, and if applicable, approved by the Governor and Executive Council.
13. Property of the State: All materials and data submitted or received in response to this RFP will become the property of the State and will not be returned to the proposer(s). 14. Non-Collusion: The proposer’s signature on a proposal submitted in response to this RFP guarantees that the prices, terms and conditions, and work quoted have been established without collusion with other proposers and without effort to preclude the Commission from obtaining the best possible competitive proposal. Proposers who wish to submit joint proposals with other consultants must clearly identify that the proposal is a “joint proposal” and must identify all proposers in the first instance.
15. Challenges on Form or Process of the RFP

Any challenge regarding the validity or legality of the form and procedures of this RFP, including, but not limited to, the evaluation and scoring of proposals, shall be brought to the attention of the Commission at least ten (10) business days prior to the proposal submission deadline, by sending written notice to the RFP Point of Contact, Ms. Juli Pelletier, the Commission’s Business Office Director. By

submitting a proposal, the proposer is deemed to have waived any challenges to the Commission's authority to conduct this procurement and the form and procedures of this RFP.
