Notices

seeks two step increases for significant capital additions placed in service in 2008. The first step increase, which would be based on plant that had become used and useful as of May 1, 2008, would generate an additional \$1,095,263 in annual gross operating revenue and would result in a 5.05 percent increase for general metered customers. The second step increase is based on plant that will have become used and useful as of November 1, 2008. This step increase would generate an additional \$1,196,149 in annual gross operating revenue and would constitute a 5.51 percent increase in rates for general metered customers.

The combined proposed rate request and step increases would result in an overall increase in rates of 25.27 percent for general metered customers. This will result in an average annual residential water bill for a single family home of approximately \$565.30 based on an average usage of 9.53 hundred cubic feet per month. This will represent an increase of \$8.88 per month for residential customers over current rates.

PWW's petition for temporary rates requests an increase in operating revenues of \$2,446,978, or an overall increase of 11.27 percent. The effective increase on general metered customers would be 11.07 percent. PWW requests temporary rates take effect on August 1, 2008, or the date customers are first noticed, whichever comes first. In support of the temporary rate increase PWW states in pre-filed testimony that, as of December 31, 2007, PWW's overall rate of return was 6.64 percent or 125 basis points below the last allowed return of 7.89 percent. PWW further states that its rate of return eroded further to 6.47 percent as of April 30, 2008. The proposed temporary rate increase would add approximately \$3.50 to the average single family residential customer's bill and would be reconciled with any permanent rates approved by the Commission in this proceeding.

The filing raises, inter alia, issues related to: whether the proposed temporary and permanent rates are lawful, just and reasonable as required by RSA 378; whether test year expenses and pro forma adjustments are reasonable; whether the calculation of rate base represents prudent investment in property that is used and useful; the determination of a reasonable rate of return, including an appropriate capital structure; whether the level of revenues used for calculating the revenue requirement is reasonable; and whether the proposed rate design is fair and reasonable.
