Subject: Changes to the Renewable Energy Fund

Dear Ms. Howland,

RE: Changes to the Renewable Energy Fund

Understanding that this is a very complex issue, my only comment is that we need to maintain the momentum we have started for renewable energy sources with this funding. We need to assess the critical path towards making the most realistic alternatives viable, that is, whichever method of energy (PV, thermal, etc) needs the most help via rebates.

The ultimate goal is to make these alternative the "norm" rather than the alternative. Make them less costly than petroleum based sources. Keep pushing for more funding and target it strategically where we need it.

Regards,
Nick
