**Subject:** Pennichuck Water Works rate increases

Order No. 25,107  
DW10-091

This is ridiculous to pay 20.01% more. They are saying that because their return on investment decrease so we have to pay for it.  
Just because they are poor managers of their resources we should not be required to pay more.

The CPI is close to 3% so how can a family afford to pay 20% more.  
This request needs to be denied and have PWW demonstrate what they are doing to manage cost, not just putting in expensive  
Equipment and then looking to the public to fund.

Vote to stop this outrageous tariff increase.
