Grantham, NH 03753

Dear Brian,

Enclosed is the cost of the piping upgrade and flow meter for the Holding Pond Pump station. As you know we are required to have an accurate flow meter for DES reporting requirements. The existing flow meter could not be installed in accordance with manufacturer's specifications to allow for accurate flow readings. In addition the meter is over 30 year's needs replacement. We needed more chemical addition and sampling points also.

The new meter needs much less length of straight pipe run to be accurate and removed the need to replace the entire piping configuration. This and the above are the reasons for this capital upgrade. Feel free to share this information with the PUC should you decide to use the capital reserve fund for this cost.

Sincerely,

Joseph P. Damour, President
