National Grid NH's Responses to
Staff's Data Requests – Set #1

Date Received: March 19, 2010
Request No.: Staff 1-7

Date of Response: March 26, 2010
Witness: Stephen McCauley

REQUEST: Re. McCauley testimony, p. 8: What have the collateral costs/savings been for each month beginning with May 2008 to present, and what would have been the resulting credits/charges to each of the corresponding cost of gas periods? Have collateral costs/savings been included in this filing?

RESPONSE: The table below lists the monthly credit or charge associated with all open financial hedge positions as of that month. A positive value would have been a credit to the customers and a negative value would have been a charge to the customers. Each monthly credit/charge would have been applied to the Peak COG deferred gas cost account. There are no collateral costs or savings included in this filing.
