**Petition of Power New England LLC  
Docket No. DE 12-295**

Dear Ms. Howland;

This is a brief reply on behalf of Power New England LLC (PNE) to PSNH's Supplemental Motion to Dismiss filed on February 19, 2013 in the above-captioned proceeding.

PNE views its suspension from the markets as just that – a suspension. Numerous market participants undergo similar events/ experiences in their dealings with ISO NE. PNE is working through numerous, contemporaneous issues right now, including the re-assimilation of the 8500 customers it was providing electric service to – into a mutually successful relationship with a CEP in order to provide continuity to their PNE experience, and challenges it faces due to adversarial actions taken against it by the host utility, PSNH which include, among other measures, withholding all payments to PNE that have been collected by PSNH as of February 19, 2013. These withholdings include customer payments to PSNH for the benefit of PNE for electricity sold by PNE as far back as November and December.

PNE was the first supplier to offer electric sales service alternatives to the residential tariff class and its experience created a flood of additional CEPS, thus launching the world we live in now. In sum, PNE led the way to this vibrant, flourishing marketplace which is proving beneficial to thousands of PSNH ratepayers who now have compelling economic choices for their electricity vendor that didn't exist 18 months ago.

PNE intends to cure its suspension from the ISO markets in the near future. The issues presented to the Commission by PNE and the other suppliers in this proceeding to date should not be forsaken by the Commission.

Sincerely,

A handwritten signature in blue ink, appearing to be "Mark K. Brown", written over a horizontal line.
