SUBJECT: DE 13-242, Independent Monitor Certification Request from Cady Electric, LLC's on Behalf of Jeremiah Cady Pursuant to Puc 2502.09

Staff Recommends Approval

TO: Chairman Amy L. Ignatius
Commissioner Robert R. Scott
Commissioner Michael Harrington
Debra A. Howland, Executive Director and Secretary

CC: Jack K. Ruderman, Director, Sustainable Energy Division 
Suzanne Amidon, Staff Attorney

Summary

On August 19, 2013, the Commission received an application from Cady Electric, LLC (Cady Electric) requesting independent monitor status for Jeremiah Cady pursuant to the New Hampshire Code of Administrative Rules Puc 2505.09. As an independent monitor, Mr. Cady would provide monitoring services for New Hampshire-based, customer-sited sources qualifying for renewable energy certificates (RECs). Staff recommends the Commission grant this request.

Analysis

Puc 2505.09 (c) states that an independent monitor shall be a licensed electrician or engineer in New Hampshire; a certified building analyst professional (as certified by the Building Performance Institute, Inc., [BPI] of Malta, New York); a certified energy manager; a Residential Energy Services Network (RESNET) home energy rater; or, a certified independent monitor under another state's renewable portfolio standard program. According to the application submitted by Cady Electric, Mr. Cady qualifies as an independent monitor pursuant to Puc 2505.09 (c) because he is a licensed electrician in New Hampshire¹.

Puc 2505.09 (h) requires an independent monitor to conduct the following tasks:

¹ A copy of Mr. Cady's New Hampshire Master Electrician's License was provided as part of the application and verified on nh.gov online licensing.

1. Perform initial inspection of the source's meter for accuracy and capability to measure the power produced (unless owned by a distribution utility that has already inspected it);
2. Measure the source's annual electricity production or displacement;
3. Report the annual production or displacement of electricity by January 31st for the preceding calendar year; and,
4. Inspect customer-sited sources to demonstrate they are installed and operating in conformance with applicable safety, zoning and building codes and that the interconnection meets Puc 900 requirements. (See Puc 2507.04(h)).

Puc 2505.09 forbids Mr. Cady from being a member of the immediate family of the owner of the source he wishes to monitor. Mr. Cady will also be restricted from selling or installing the equipment used by the source. The RPS rules also prohibit Mr. Cady from receiving compensation that is a function of the number of RECs issued to any source. Mr. Cady's application indicates that he does not plan to install the electrical renewable energy systems or solar water heating systems that he plans to monitor. Mr. Cady does not own the systems that he plans to monitor, and he is not an immediate family member of the owner of any systems he intends to monitor. Table 1 below outlines Mr. Cady's proposed rates².

Table 1: Rates for Renewable Energy Source Eligibility for Independent Monitoring		
Description	Unit	Rate
Research background information, site investigation, measurements, sketches, photographs and preparing report on findings.	Per hour	\$50.00
Mileage	Per mile	\$0.50
Distribute report to relevant parties (includes printing costs and postage.	Per page	\$0.50

Recommendation

Staff has reviewed Cady Electric's application for Mr. Cady to qualify as an independent monitor and can attest that the applicant has provided the information necessary to demonstrate that he meets the requirements set forth in Puc 2505.09. Therefore, Staff recommends that the Commission approve Mr. Cady's request for independent monitor status provided that he meets the affiliation restrictions listed in Puc 2505.09 (f), has a compensation fee independent of the number of RECs produced, and performs the duties listed in Puc 2505.09 (h).

² Mr. Cady's rates were received via email August 27, 2013.
