Subject: Re: your input is welcome

Here are my recommendations for a C&I grant program.

1. Max grant capped at \$30k and up to 30% of project cost.
2. Minimum projects size \$50k
3. Efficiency shall be documented to be over 80% at full output
4. Emmissions shall be documented during test period.
5. Buffer tank use shall receive up to \$5k extra
6. All installations shall comply with NFP and local code
7. Installations shall be by a mf certified installer
8. Submittals for the program should include sales proposal, equipment submittals, inspection documentation, photographs, emmissions docs and feasibility report.
