Subject: Increase of Natural Gas Rates

To whom it may concern.

I have just received a notice stating that Liberty Utilities requested an increase for delivery service of 9.6%

During this time of uncertainty I feel that this burden of such a high increase is detrimental to the NH economy.

This increase notice does not state why it is needed. It just states Liberty Utilities will receive \$16 Million.

I hope that you will consider not granting this increase. We as consumers and voters will take notice with your decision.

Sincerely,

Mark P Manning
