BEFORE THE  
PUBLIC UTILITIES COMMISSION**

Docket No. DG 14-180

Liberty Utilities (EnergyNorth Natural Gas) Corp. d/b/a Liberty Utilities  
Distribution Service Rate Case

**JOINT DIRECT TESTIMONY**

**OF**

**STEVEN E. MULLEN**

**AND**

**HOWARD S. GORMAN**

August 1, 2014

Regarding Temporary Rates

THIS PAGE INTENTIONALLY LEFT BLANK

## **LIST OF ATTACHMENTS**

Attachment SEM/HSG-TEMP-1:	Schedule T – Temporary Rate Increase
Attachment SEM/HSG-TEMP-2:	Rate Design and Bill Impacts – Temporary Rates
Attachment SEM/HSG-TEMP-3:	Clean Tariff Pages – Temporary Rates
Attachment SEM/HSG-TEMP-4:	Redlined Tariff Pages – Temporary Rates

THIS PAGE INTENTIONALLY LEFT BLANK

1     **Q.     Please state your names and business addresses.**

2     A.     My name is Steven E. Mullen. My business address is 15 Buttrick Road,  
3             Londonderry, NH 03053.

4

5     A.     My name is Howard S. Gorman. My business address is 45 Hill Park Avenue,  
6             Great Neck, NY 11021.

7

8     **Q.     By whom are you employed and in what capacity?**

9     A.     (SM) I am employed by Liberty Energy Utilities (New Hampshire) Corp. as  
10            Manager, Rates and Regulatory.

11

12    A.     (HG) I am the President of HSG Group, Inc.

13

14    **Q.     On whose behalf are you testifying today?**

15    A.     We are testifying on behalf of Liberty Utilities (EnergyNorth Natural Gas) Corp.  
16            d/b/a Liberty Utilities (“EnergyNorth” or the “Company”).

17

18    **Q.     Are you the same Steven E. Mullen and Howard S. Gorman who submitted**  
19            **other direct testimony in this case?**

20    A.     Yes. Our educational backgrounds and qualifications are set forth in the prefiled  
21            direct testimony that we submitted in support of EnergyNorth’s permanent rate

1 filing.

2

3 **Q. What is the purpose of your testimony?**

4 A. Our testimony explains the level of temporary rates sought by the Company, the  
5 reasons for the request and the impact on customers' bills. The Company's current  
6 rates are insufficient to allow it to earn a reasonable return on rate base. For the test  
7 year ended March 31, 2014, the Company's earned return on rate base for the  
8 distribution portion of its business was 4.49% (Schedule T, line 23). This is less  
9 than the return on rate base of 7.31%, computed using the Company's last  
10 authorized return on equity of 9.67%, established by the Commission in Order No.  
11 25,202, and its current cost of debt and capital structure (Schedule T, lines 118-  
12 121).

13

14 **Q. Are you sponsoring any attachments and schedules?**

15 A. We are sponsoring the following attachments and schedules:

- 16 • Attachment SEM/HSG-TEMP-1, which includes the following schedule:
- 17 ○ Schedule T - Temporary Rates Revenue Requirement and Revenue
- 18 Deficiency (All schedule references in this temporary rates testimony
- 19 are to Schedule T);
- 20 • Attachment SEM/HSG-TEMP-2, which provides rate design and bill impact
- 21 analysis for temporary rates;

- 1           • Attachment SEM/HSG-TEMP-3, clean revised tariff pages reflecting the
- 2           proposed temporary rates; and
- 3           • Attachment SEM/HSG-TEMP-4, redlined revised tariff pages reflecting the
- 4           proposed temporary rates.

5

6   **Q.    What is the primary reason that the Company's earnings have been below the**  
7   **allowed rate of return?**

8   A.    The primary reason relates to capital investments made by the Company since the  
9   last rate case. A large portion of those investments were for infrastructure  
10  replacement and, by their nature, did not produce additional revenue. A discussion  
11  of the capital investments made over the last few years is included in the testimony  
12  of Christian Brouillard.

13

14   **Q.    What is the level of the temporary rate increase that the Company is**  
15   **requesting?**

16   A.    The Company is requesting temporary rates that would generate additional annual  
17  gross distribution revenue of \$8,379,060 (line 2), which represents a 14.7%  
18  increase in distribution revenue and a 5.3% increase in total revenue. The Company  
19  is requesting that temporary rates take effect as of September 1, 2014 on a service-  
20  rendered basis, and that they be applied by increasing all rates under the existing  
21  rate design by a uniform percentage. The Company recognizes that a temporary

1 rate request generally does not provide a sufficient opportunity for the Commission  
2 and other parties to review proposed revenue allocation or rate design changes, and  
3 therefore the Company is not proposing any such changes in connection with the  
4 temporary rates.

5  
6 **Q. Why is the Company requesting a temporary rate increase?**

7 A. The Company is seeking a temporary rate increase because its return on distribution  
8 in the historic test year ended March 31, 2014, as adjusted on Schedule T, was  
9 4.49%, which is significantly less than the return on rate base of 7.31% (computed  
10 as described above). Without a temporary rate increase, the Company will not have  
11 the opportunity to earn a reasonable return until a permanent rate order becomes  
12 effective.

13  
14 The Company has requested a permanent increase of \$13,442,972; the temporary  
15 increase is 62.3% of that amount. Temporary rates are proposed to be in effect  
16 until the establishment of permanent rate pursuant to the Commission's final order  
17 in this case and should provide the Company with the opportunity to earn at least a  
18 portion of the return ultimately found by the Commission to be just and reasonable.

19  
20 A temporary increase will mitigate the effect of regulatory lag, while providing the  
21 Commission and parties to the proceeding sufficient opportunity to consider in full

1 the Company's permanent rate request. Implementation of temporary rates at the  
2 level requested by the Company will also create a more gradual, smoother  
3 transition to the permanent rates ultimately approved by the Commission in this  
4 case.

5  
6 **Q. How was the temporary increase of \$8,379,060 calculated?**

7 A. The temporary increase requested is the amount required to produce the 7.31%  
8 return on rate base (computed as described above).

9  
10 **Q. Have you made any adjustments in arriving at the recommended temporary**  
11 **rate increase?**

12 A. Yes. We have adjusted for several items which are corrections and/or  
13 normalizations to the historic test year data shown in the left-hand column on  
14 Schedule T.

- 15 1. Remove revenue related to Cost of Gas and the Local Distribution  
16 Adjustment Charge (LDAC) (line 2). This adjustment required first  
17 separating total revenue into distribution revenue (line 30) and Cost of Gas /  
18 LDAC revenue (line 34), then removing the Cost of Gas / LDAC revenue  
19 (line 38). The pro forma distribution revenue (line 2) agrees with the  
20 separately computed amount presented in Attachment RATES-1, page 2,  
21 line 15 to Mr. Hall's and Mr. Simpson's testimony.

- 1           2. Remove the associated expenses associated with Cost of Gas and LDAC  
2           revenue from the Historic Test Year accounts (line 7, computation on line  
3           44).
- 4           3. Adjust depreciation expense and rate base to reflect a settlement agreement  
5           in a prior rate case, Docket No. DG 08-009. As part of that settlement, there  
6           was agreement to amortize a depreciation reserve surplus of \$12,401,522 at  
7           an annual rate of \$933,588. As it was a surplus, the \$933,588 is an annual  
8           reduction to depreciation expense. The Company discovered that the  
9           monthly amortization was not recorded subsequent to the acquisition of  
10          EnergyNorth in July 2012. As a result, we have adjusted test year  
11          depreciation expense by (\$933,588) (line 12, computation on line 52) and  
12          increased rate base by \$1,633,779 to correct accumulated depreciation (line  
13          75, computation on line 59). This item is also presented in the attachments  
14          to our permanent rates testimony on Schedules RR-5-2 and RR-3-11.
- 15          4. Record amortization of a pension and benefits valuation allowance that  
16          arose with the acquisition of EnergyNorth. As provided for in the  
17          settlement agreement in that proceeding, Docket No. DG 11-040, the  
18          Company was allowed to record a regulatory asset to reflect the fair value of  
19          its pension and benefits obligations, as required by generally accepted  
20          accounting principles (GAAP). Consistent with GAAP, the regulatory asset  
21          is being amortized over the employees' average remaining service lives, or

1           10.8 years. The regulatory asset was established at a balance of  
2           \$21,625,753, resulting in annual amortization expense of \$2,002,385 that  
3           should have been recorded since the acquisition. However, the amortization  
4           expense was not previously recorded. Therefore, we have adjusted the test  
5           year to include the annual amortization expense (line 11, computation on  
6           line 49). This item is also presented in the attachments to our permanent  
7           rates testimony on Schedule RR-3-03.

8           5. Adjust amortization of Costs to Achieve (“CTA”) associated with  
9           EnergyNorth’s prior acquisition by National Grid through National Grid’s  
10          merger with KeySpan Corporation. Pursuant to Commission Order No.  
11          24,777 in Docket No. DG 06-107, EnergyNorth is permitted to amortize and  
12          to include in the revenue requirement its prudently incurred costs to achieve  
13          certain savings. The initial approved amortization amount was \$409,203  
14          per year, resulting in monthly amortization of \$34,100. Order No. 25,370 in  
15          Docket No. DG 11-040, regarding the acquisition of EnergyNorth by  
16          Liberty Energy NH, did not change the prior Order with regard to this  
17          amortization. This adjustment corrects the amortization expense recorded in  
18          the historic test year (line 13, computation on line 65). This item is also  
19          presented in the attachments to our permanent rates testimony on Schedule  
20          RR-3-07.

21          6. Adjust property tax expense, which was overstated in the historic test year

1           due to the inclusion of some prior period amounts. An adjustment was  
2           made to reflect the correct expense in the Pro Forma Test Year (line 14,  
3           computation on line 70). This item is also presented in the attachments to  
4           our permanent rates testimony on Schedule RR-3-14.

5           7. The final adjustment is to compute income tax expense for the adjusted  
6           information, based on statutory rates and synchronized interest expense (line  
7           15, computation on line 107).

8  
9   **Q.   Are those proposed adjustments consistent with the statute governing**  
10 **temporary rates?**

11 A.   Yes. As provided in RSA 378:27, temporary rates should be based on "...the  
12 reports of the utility filed with the commission, unless there appears to be  
13 reasonable ground for questioning the figures in such reports." As these  
14 adjustments are corrections to the test year to recognize previously approved items  
15 that were omitted from the Company's books, they are appropriate for inclusion in  
16 the calculation of temporary rates.

17  
18 **Q.   What percentage increase in customers' bills does the Company's temporary**  
19 **rate request represent?**

20 A.   The annual bill impacts (as a percentage of the total bill) to various classes of  
21 customers are as follows:

- 1           • For a residential heating customer (Rate R-3) using 797 therms per year, the  
2           increase is \$64.28, or 5.16%;
- 3           • For a low annual use, high winter use commercial/industrial customer (Rate  
4           G-41) using 2,073 therms per year, the increase is \$154.78, or 4.75%;
- 5           • For a medium annual use, high winter use commercial/industrial customer  
6           (Rate G-42) using 15,270 therms per year, the increase is \$820.80, or  
7           3.84%; and
- 8           • For a medium annual use, low winter use commercial/industrial customer  
9           (Rate G-52) using 16,365 therms per year, the increase is \$568.22, or 3.04%

10       Additional information showing bill impacts by rate class is provided in  
11       Attachment SEM/HSG-TEMP-2. The rates derived on SEM/HSG-TEMP-2, were  
12       used to prepare the tariff pages included as Attachments SEM/HSG-TEMP-3 and  
13       SEM/HSG-TEMP-4.

14  
15   **Q.   Do the proposed temporary rates provide not more than a reasonable return**  
16   **on the cost of the property used and useful for the public service less accrued**  
17   **depreciation, as shown by the reports of the Company filed with the**  
18   **Commission?**

19   **A.**   Yes. With the proposed temporary rates, the Company will earn no more than a  
20       reasonable return on its investment calculated based on the books and records on  
21       file with the Commission. As demonstrated in Attachment SEM/HSG-TEMP-1,

1       Schedule T, the Company's requested level of temporary rates yields a rate of return  
2       equal to 7.31%, which is based on the return on equity granted in the Company's  
3       last rate case and is less than the 7.63% overall rate of return being requested for  
4       permanent rates.

5

6       **Q.     Are customers protected from being overcharged by temporary rates if the**  
7       **final rate case decision is less than the level of temporary rates?**

8       A.     Yes, customers are protected because of the reconciling nature of temporary rates  
9       once permanent rates are established by the Commission.

10

11       **Q.     Does this conclude your testimony regarding temporary rates?**

12       A.     Yes.
