Re: RSA 125-O:5, 2017 Compliance Report

Dear Directors Howland and Wright,

In accordance with RSA 125-O:5, Public Service Company of New Hampshire d/b/a Eversource Energy (“Eversource” or the “Company”) is required to submit a report to the Commission and the Department of Environmental Services in any year that the company utilizes system benefits charge funds set aside under the provisions of RSA 125-O:5 for energy efficiency projects at facilities owned and operated by the Company. Please let this letter serve as an informational report regarding the balance of funds remaining at year-end 2017.

As approved by the Commission in its secretarial letter dated November 4, 2010 in Docket No. DE 09-170, if unencumbered energy efficiency funds remain at the end of a program year, the two percent set aside calculation found in RSA 125-O:5 is to be based on the lesser of: 1) up to two percent of the actual energy efficiency program system benefits charge funds collected in the prior program year based on Eversource’s actual delivered kilowatt-hour sales; or 2) the amount needed to result in a \$600,000 year-end balance cap. Since there are no unencumbered funds remaining at the end of 2017, no additional 2017 funds were set aside for energy efficiency projects at Eversource’s facilities.

In 2017, the Company did begin an energy efficiency project at its Automotive Maintenance Center Garage located at 80 West Pennacook Street in Manchester. The project focuses on lighting retrofits and occupancy sensors in the garage bays and work areas. The project will provide better quality work lighting in the garage bays. Coupling the LED lighting with occupancy sensors is particularly important for energy savings, as all of the bays are not typically occupied at the same time. The project is expected to provide more than one million lifetime kWh savings and to cost \$41,073. This project will be finalized and paid for in 2018. The final cost and project information will appear in Eversource’s 2018 RSA 125-O:5 Compliance Report.

Debra A. Howland  
Executive Director, NH Public Utilities Commission
