Dear Sirs:

Please find enclosed copies of letters sent to FERC and Governor Hassan concerning Kinder Morgan's proposed Northeast Energy Direct gas pipeline for your consideration.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael Maki". The signature is fluid and cursive, with the first name "Michael" and last name "Maki" clearly distinguishable.

Concord, NH 03301
July 30, 2015

Dear Governor Hassan,

I am a landowner whose farm, which has been in our family since 1906, lies in the direct path of the Northeast Energy Direct Project (NED) as currently proposed by Tennessee Gas Pipeline Company, L.L.C. Division of Kinder Morgan.

Even though it is generally accepted that New England needs more energy, the NED pipeline would deliver far more natural gas than the region needs or could use. Other projects already approved can meet New England's current and projected shortfall and are much less disruptive than NED. One can only conclude that the natural gas supplied by NED will be sold for export with little or no gas supplied to or needed in New England. Certainly there would be no benefit to New Hampshire. If this project is allowed to proceed the result will be the taking of more private property by eminent domain for corporate profit. The landowners are left with unusable land that they still own and pay taxes on, receiving a onetime token payment to host the pipeline and live with the consequences while Kinder Morgan generates a cash stream for themselves year after year.

Please stand with me and oppose the NED project.

Thank you for your consideration.

Sincerely,

Re: Northeast Energy Direct Project Docket #PF14-22

Dear Ms. Bose,

Furnace Brook in New Ipswich, NH is a tributary of the Souhegan River. It in turn is fed by several small streams all of which are seasonal except one. There is a spring on my property (Map6 Lot21) on Kidder Mountain adjacent to the power line that never dries insuring that Furnace Brook always has water. Should construction of the pipeline disturb that flow it is inevitable that Furnace Brook would be dry at certain times changing the current ecology of that waterway.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael Maki", written in a cursive style.

Re: Northeast Energy Direct Project Docket #PF14-22

Dear Ms. Bose,

I am writing to register my opposition to the Northeast Energy Direct Project (NED) as currently proposed by Tennessee Gas Pipeline Company, L.L.C. Division of Kinder Morgan, and to urge the Federal Regulatory Energy Commission to deny permits for the project to proceed.

Even though it is generally accepted that New England needs more energy, the NED pipeline would deliver far more natural gas than the region needs or could use. Other projects already approved can meet New England's current and projected shortfall and are much less disruptive than NED. One can only conclude that the natural gas supplied by NED will be sold for export with little or no gas supplied to or needed in New England. If this project is allowed to proceed the result will be the taking of more private property by eminent domain for corporate profit. The landowners are left with unusable land that they still own and pay taxes on, receiving a onetime token payment to host the pipeline and live with the consequences while Kinder Morgan generates a cash stream for themselves year after year.

Please reject the NED project.

Thank you for your consideration.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael Maki", written over a horizontal line.
