RE: Saddleback Ridge Wind Project – Notification of Commercial Operation for 34.2 MW Project  
ISO New England Asset ID 38173  
Class I REC #15-003

Dear Ms. Howland,

Please be advised that the Saddleback Ridge Wind Project (asset ID 38173, NH PUC Class I REC #15-003, and GIS facility code MSS38173) has achieved commercial operation of the full 34.2 MW project as of September 16, 2015. Attached is a letter from the local utility, Central Maine Power Company, confirming this information.

Phase I of the project (3 turbines for a total of 8.55 MW) went commercial on December 19, 2014. Construction of Phase II of the project (9 more turbines for a total of 25.65 MW) began in mid-2015, and test power from was first generated by the Phase II turbines on August 23, 2015. As of September 16, all 12 turbines in the project are operational, for a total operating project nameplate capacity of 34.2 MW.

There have been no changes to the permits, interconnection agreements, wind turbine technology, ISO-NE asset ID, MSS or GIS numbers for the project. The project was simply constructed in two phases.

We are respectfully requesting approval of the full 34.2 MW project for Class I RECs in New Hampshire. We are concurrently requesting the same of Rhode Island, which approved Phase I of the project (8.55 MW) but wanted confirmation when the full project was completed. Massachusetts and Connecticut approved the full project for Class I RECs.

Should you have any questions or need any additional information please do not hesitate to contact me or Michelle Coscia from Energy New England at (508) 698-1222.

Best regards,
