*RE: REC 15-107, Steels Pond Hydro Inc. Increase in capacity from 300 kW to 600 kW.*

Dear Ms. Howland,

This letter is to inform you that Steels Pond Hydro has commissioned the first of the two, 300-kW turbine generators. These two 300 kW units were supported with a grant from the Renewable Energy Fund. Thank you, we never could have achieved this so quickly without your help.

This brings our installed capacity up to 600 kW. We anticipate having the fifth and final unit-also 300 kW, on line before spring runoff, for a total capacity of 900 KW.

I contacted James Webb at ISO, and Steels Pond's capacity is now 600 kW.

If you have any questions, please don't hesitate to contact me.

Thank you,

Lori Barg  
President  
Steels Pond Hydro Inc.
