Dear Director Howland:

I am a resident of Lebanon and am very concerned that petitions for a gas franchise by both Liberty Utilities and Valley Green are under consideration by the PUC. There is clearly no demand for this damaging fossil fuel resource in the Upper Valley. Rather, both Lebanon and Hanover are working to accomplish widespread use of renewable energy resources.

Approving the petitions by Liberty Utilities and Valley Green would be a clear step in the wrong direction (backward). Please do not approve these petitions!

Sincerely,

Kathleen Beckett
