Director Howland,

NO FRACKING!!! Fracking is terrible for the environment, and fossil fuels need to be abolished. With this new government's take over of the EPA, why not frack?? Well here is why:

Jobs??? Sure fracking will provide more jobs but why not use a renewable energy source such as the sun, or wind, or water, or anything besides fracking which not only kills the environment but ALSO KILLS THE ENVIRONMENT..... **KILLS THE ENVIRONMENT.....** IS THAT SOMETHING YOU WANT TO DO TO THIS COMMUNITY?

We are relying on you to help our community progress into the future, not to continue doing what has been done for years and years and killed landscapes and killed our climates oh ya AND KILLS THE ENVIRONMENT.

What happens if the pipeline ruptures?? IT KILLS THE ENVIRONMENT, spreading toxins into our drinking water and killing off wildlife. We are privileged to live on this earth, CAN THE PEOPLE IN POWER PLEASE START RESPECTIN THIS EARTH AND NOT CONTINUE TO TAKE INCENTIVES TO KEEP KILLING THE ENVIRONMENT.

Oil is terribly inefficient, and it KILLS THE ENVIRONMENT. Instead of being just another fracker who couldn't give a frack about the environment, invest in our future and start using renewable means of energy. This is absurd that pipelines are still being built, be an innovator who gives a frack and stop fracking.

***DONT KEEP KILLING OUR ENVIRONMENT,
PLEASE DO NOT BUILD THIS PIPELINE!***

Thanks,
Clint Hobbs
