SUMMARY OF 2019 PROGRAM ACTIVITY

This report presents the results of Liberty Utilities (Granite State Electric) Corp.'s d/b/a Liberty Utilities ("Liberty Utilities" or "Company") residential and commercial & industrial energy efficiency programs for calendar year 2019.

Table 1a, Table 1b and Table 1c show the 2019 year-end performance for the commercial & industrial and residential programs and the annual goals and spending targets. Overall, the Company achieved 110% and 99% of its goals for annual and lifetime energy savings respectively. The Company achieved 117% and 119% of its goals for winter and summer demand savings. The Company achieved 111% of its planned participation while spending 92% of its planned budget in 2019. In addition, 87% of the annual, and 77% of the lifetime, total energy savings generated were for electricity.

Table 2a, Table 2b and Table 2c document the value created by the 2019 energy efficiency programs. Overall, efforts in 2019 created over \$14.4 million of value through achieved energy, demand and other resource savings.

Table 3a documents the Company's earned 2019 year-end performance incentive of \$201,137. As specified by the Commission, the performance incentive for 2019 has been documented using assumptions that are consistent with assumptions used to develop program-year goals. Table 3a summarizes the performance incentive calculation by component (commercial & industrial and residential). As specified by the Commission, results for all programs have been included in the performance incentive calculation.

Table 3b provides the actual Total Resource Cost (TRC) benefit/cost ratio for each program, by sector (commercial & industrial and residential), and for the entire portfolio of energy efficiency programs implemented in 2019. The overall benefit/cost ratio for energy efficiency efforts in 2019 for residential was 2.68 and for commercial & industrial was 1.88.

Table 3c documents the Company's savings by sector and program. Overall, the Company achieved 116,700 megawatt hours of lifetime energy savings.

Table 4 documents the Company's expenses by Program. Overall, the Company had a total of \$3,721,019 of expenses in 2019, including \$43,182 in ISO-NE FCM expenses.

Table 5 provides the 2019 year-end energy efficiency fund balance. The table reflects revenues collected in support of energy efficiency efforts, 2019 spending levels, and the 2019 incentive. Table 5 summarizes the 2019 year-end energy efficiency fund balances for both the residential and commercial & industrial sectors.

Table 6 documents the Company's earned 2019 year-end RGGI RFP – Retail & Large Business Energy Reduction Partners Program performance incentive of \$0.

Table 7a documents the Company's forecasted annualized kWh savings by month, commercial & industrial kW savings by month, and the total lost base revenue calculation.

Table 7b, Table 7c and Table 7d document the actual annualized kWh savings by month, the actual commercial & industrial kW savings by month, and the associated lost base revenue calculation. There was a total program actual annualized savings by month of 10,146,797 kWh, a total C&I actual savings by month of 534 kW, and a total lost base revenue of \$124,632 for 2019.

Table 8 details the calculation of average distribution rates, excluding customer, meter and luminaire charges calculation.
