**Subject:** Please Stop Granite Bridge

Utilities Commission,

Dear Public Utilities Commissioners,

My opposition to the Granite Bridge pipeline proposal is based on the lack of forward thinking about NH's energy needs. This pipeline won't be finished and in use for several years. Forward thinking sees, and acts on, the need for more alternative energy rather than fossil fuel energy.

An additional objection is that this fuel will not go to the communities where the proposed pipeline will be built, yet they take all the risks of having a pressurized gas pipeline in their towns.

Please make the right decision and stop Granite Bridge.
