Schedule 1	CTC from New England Power Company to Granite State Electric Company Including Fixed Component and Variable Component
Schedule 2	CTC Reconciliation Adjustment and Reconciliation Account
Nuclear PBR	Workpapers for Actual Months
Attachment 1	Simplified format for CTC Reconciliation Report Schedules

I. INTRODUCTION

This report is made pursuant to the Settlements of New England Power Company's ("NEP") all-requirements contracts with Granite State Electric Company ("Granite State"). Effective October 2005, Granite State and NEP began doing business as National Grid, and effective July 2012, Granite State began doing business as Liberty Utilities. For ease of reference, however, in this report the companies will continue to be referred to as Granite State and NEP. The Settlements were approved by the Federal Energy Regulatory Commission ("FERC") in Docket Nos. ER98-2023-000 and (as amended) ER98-3925-000, and by the New Hampshire Public Utilities Commission in N.H.P.U.C. Docket No. DR 98-012 ("Settlement"). The report is designed to reconcile costs and revenues under the Settlements for 2017. The Contract Termination Charge ("CTC") formula set forth in the Settlements provides for a reconciliation to be performed annually. Capitalized terms not otherwise defined in this report are intended to have the same meaning set forth in the CTC formula. This report is subject to the dispute resolution process set forth in Section 3.5 of the Settlement. A copy of both the wholesale and retail settlement documents was compiled and provided with NEP's 1998 CTC reconciliation report ("Compiled Settlement"). Section 3.5 of the Settlement is shown at pages 43-44 of the Compiled Settlement.

NEP, Granite State and the New Hampshire Public Utilities Commission entered into an agreement ("USGenNE CTC Settlement") on December 5, 2005, related to issues surrounding the resolution of the USGenNE bankruptcy proceeding. The USGenNE CTC Settlement

provided that Granite State's allocated share of the allowed claim proceeds received by NEP be used to pay down all of the remaining NEP power purchase contract buyout payments allocable to New Hampshire and to provide a residual value credit, with return, through the year 2010. The settlement also provided for updates to decommissioning expense and purchased power costs that are included in the base CTC. FERC approval was received on February 28, 2006.

In accordance with the Settlements, the estimated CTC related costs that are reconciled annually are primarily the costs comprising the Variable Component. These estimated costs are reconciled to actual costs through the Reconciliation Adjustment (Schedule 2, page 1b) and accumulated in the Reconciliation Account (Schedule 2, page 2). In addition, revenues collected through the CTC are reconciled to actual revenues based upon differences in megawatt hour ("MWh") deliveries on Schedule 2, page 1a.

For ease of reference, the schedules used in this report have been maintained in the same format as in NEP's prior CTC reconciliation reports. Beginning with the 2000 CTC reconciliation reports, schedules that were previously expressed in millions are now shown in thousands. For NEP's 2017 CTC Reconciliation Report, the months from October 2016 through September 2017 show actual costs and revenues, and the months of October, November, and December 2017 are estimates. These estimated amounts will be reconciled to actuals in NEP's 2018 CTC Reconciliation Report to be made next year.

II. SUMMARY OF RESULTS

As shown on Schedule 1, page 1, NEP's CTC to Granite State for calendar year 2018 will be (0.04) cents per kilowatt hour ("kWh"). The CTC rate of (0.04) cents per kWh is estimated to produce approximately \$458,000 of CTC credits based on forecasted deliveries of 1,035,759 MWh. The 2018 rate represents a decrease of 0.08 cents per kWh from the CTC rate presently in effect and a decrease of 0.06 cents per kWh, or approximately \$620,000 from the estimated 2018 CTC rate of 0.02 cents per kWh, included in NEP's prior year CTC Reconciliation Report.

III. RECONCILIATION ANALYSIS

A. Fixed Cost Adjustments

There are no adjustments to the Fixed Component; therefore, the representative pages included in this reconciliation report have been labeled "No Adjustments". However, in accordance with Section 1.1.4 of the CTC formula, net proceeds from sales of property, whose costs were included in the CTC, have been included in the Reconciliation Account when applicable (Compiled Settlement, page 150, footnote 6). Details summarizing these net proceeds, if any, are provided in Paragraph B.4 of this report.

B. <u>Variable Component Adjustments</u>

The Variable Component of the formula is adjusted to reconcile for differences between estimated and actual variable costs from October 2016 through September 2017, along with estimated amounts for October through December 2017. The Variable Component is set forth in Section 1.2 of the CTC formula. Specific adjustments are discussed below.

1. Revenues

The reconciliation of estimated to actual Granite State MWh deliveries from October 2016 through December 2016 and from January 2017 through September 2017 is shown on Schedule 2, page 1a. In the last three months of 2016, actual deliveries were less than the estimate by approximately 31,364 MWh. For the period of January through September 2017, actual MWh deliveries were below the estimated MWh deliveries by approximately 87,527 MWh. These variances in MWh deliveries produce a revenue shortfall aggregating approximately \$81,000 for the period being reconciled in this report, as shown on Schedule 2, page 1a.

2. Variable Costs

The estimated Variable Component costs for the period October 2016 through December 2017 are shown in Column (7) on Schedule 2, page 1b of this

report, agree with the amounts included on Schedule 1, page 15, and amount to \$26 million at the NEP level before the allocation to Granite State. The actual and estimated variable costs for the period October 2016 through December 2017 are shown in this report in Column (21) of Schedule 2, page 1b and amount to \$5.2 million. When these actual amounts are compared to the estimated amounts, the over or under-recoveries are produced and NEP's and Granite State's shares are shown on Schedule 2, page 1b in Column (22) and (23), respectively. The variances by individual cost element are summarized below:

a. Nuclear Decommissioning and Other Post Shut-Down Costs

The actual Nuclear Decommissioning and Other Post Shut-Down
Costs shown in Column (8) of Schedule 2, Page 1b, amount to
approximately (\$14.6) million in aggregate for the period being reconciled
in this report. There are no cost estimates for the Connecticut Yankee,
Maine Yankee, and Yankee Atomic Power nuclear units in calendar year
2011 and onwards. The costs shown are the actual costs, net of proceeds, if
any, returned during the year for litigation awards received by the Yankees
from the US Department of Energy (DOE). The litigation was for the
DOE's failure to remove the Yankees' respective spent nuclear fuel stores
and nuclear waste as required by the Nuclear Waste Policy Act of 1982
and contracts between the Yankees and the DOE.

In late January 2013 the U.S. Treasury Department paid a total of \$159.6 million to the Yankees for Phase I of the litigation, covering the period 1998 through 2001 for Connecticut Yankee and Yankee Atomic, and 1998 through 2002 for Maine Yankee. In November, 2013, the Yankees were awarded \$235.4 million for Phase II, covering the period between Phase I and 2008. In April 2016, the Yankees were awarded \$76.8 million for Phase III, covering the period 2009 to 2012. The Yankees filed Phase IV in May 2017 covering 2013 to 2016.

The Yankees have returned to NEP and other participating purchasers, that portion of proceeds that are deemed excess proceeds.

NEP has returned its share of excess proceeds to its CTC customers in the year that it received such proceeds from the Yankees. NEP received excess proceeds of \$20.8 million and \$47.5 million for Phase I and Phase II of the litigation which it credited to CTC customers between 2013 and 2015. There were no excess proceeds received by NEP during the period October 1, 2015 to September 30, 2016. NEP received \$14.8 million of Phase III proceeds in December 2016, which it will return to customers through this year's CTC reconciliation.

Granite State's share is 3.00% of the NEP amounts.

b. <u>Power Contracts</u>

As a result of the US GenNE bankruptcy, economic responsibility for seven remaining power purchase contracts returned to NEP effective April 2005. The last of these contracts expired in September 2017. Actual Power Contract Obligations shown in Column (9) of Schedule 2, page 1b, include the actual purchase power contract costs for the remaining power purchase contract, as well as Hydro Quebec. Column (10) represents the actual market value of NEP's power entitlements from this contract as well as NEP's capacity entitlements under the Hydro Quebec Interconnection Agreement.

In aggregate, the power contract costs were approximately \$6.2 million less than the estimated power contract costs. The variance is due to overall lower than estimated revenue and lower than estimated costs for the remaining units as well as NEP's capacity entitlements under the Hydro Quebec Interconnection Agreement.

c. <u>Credits for Unit Sales</u>

All Unit Sales Contracts that were originally included in Section 1.2.2 (b) (iii) of the CTC formula (Compiled Settlement, page 158) have

been terminated. Thus, there are no credits for unit sales in this subsection of the Variable Component.

d. Above Market Fuel Transportation Costs

Fuel transportation costs were assumed by USGenNE at the closing of NEP's divestiture and all such amounts were restated at zero as part of NEP's post-divestiture CTC formula. See Schedule 1(a), page 16 of 16 on page 182 of the Compiled Settlement. Consequently, there are no adjustments in this category.

e. Transmission in Support of Remote Generating Units

Estimates for transmission support were set to zero beginning in 2002 and will be collected as incurred. No costs were incurred during the reconciliation period.

f. Payments in Lieu of Property Taxes

Payments under NEP's property tax settlements were assumed by USGenNE. NEP has not been assessed payments in lieu of property taxes by any non-settling towns. Therefore, there are no adjustments in this category.

g. <u>Damages, Costs, or Net Recoveries from Claims</u>

There were no damages, costs, or net recoveries from claims for the period being reconciled in this report.

h. Nuclear PBR

The Nuclear PBR was initially estimated as zero in the original CTC settlement (Compiled Settlement, page 182). Per the Settlement (Compiled Settlement, pages 161-162), 80 percent of any costs or income related to the Nuclear PBR are recovered from or returned to customers, as shown in Column (19) of Schedule 2, Page 1b. April 2017 contains \$85,480 (at the 80% level) in business continuity (NEIL) credits for insurance policies held on NEP properties.

i. Environmental Response Costs

NEP remains liable for the estimated future clean up of four sites, one located in Beverly, Massachusetts, one located in Somerset,

Massachusetts, a federal Superfund site located in Plaistow, New

Hampshire, and environmental costs associated with the Company's former investment in the Salem (MA) Harbor Power Station which is scheduled to be dismantled. Environmental Response Costs are collected

from customers as incurred and are recoverable through the CTC pursuant to section 1.2.2 (i) of the CTC formula. NEP incurred \$83,561 in Environmental Response Costs associated with the sites during the period being reconciled in this report as shown on Schedule 2, page 1b, Column (20). Additional costs will be included as incurred.

3. Reconciliation Adjustment

The sum of all differences between NEP's Estimated Base

Variable Component and its actual variable cost is shown in Column (22)

on Schedule 2, page 1b, and totals (\$20.8) million. Granite State's 3.0

percent share of the total variance is shown in Column (23) which, when

combined with the revenue shortfall shown in Column (6) of Schedule 2,

page 1a, produces a Granite State Reconciliation Adjustment, including

estimates for October, November and December 2017, of \$543,000 for the

period being reconciled in this report. This net credit is shown in Column

(24) on Schedule 2, page 1b.

These monthly over and under-recoveries are then carried forward to the Reconciliation Account shown in Column (3) on Schedule 2, page 2. To that amount are added the reconciliation adjustments associated with the Section 1.1.4 of the CTC formula. Details of these Section 1.1.4

adjustments are provided below and are shown on page 3 (NEP total) and on page 4 (Granite State's share) of Schedule 2. The net shortfall or excess is then shown in Column (5) of Schedule 2, page 2. A return is then calculated annually on the accumulated balance for the prior year as shown in Column (6). The annual return is spread evenly over the twelve months.

4. <u>Section 1.1.4 Adjustments</u>

As provided for in Section 1.1.4 of the Settlement (pages 146-153 of the Compiled Settlement), the following adjustments are included in the Reconciliation Account on Schedule 2, page 3:

a. Vermont Yankee

The Vermont Yankee offering set the terms of the sale as a sale of assets only, with the Vermont Yankee Nuclear Power Corporation ("VYNPC") surviving to administer the existing, albeit amended, wholesale purchased power contracts. VYNPC entered into a power purchase agreement with the new owner of the plant and sold the power to the original equity owners under the existing Vermont Yankee contracts. The power component assignment to a third party did not include the ongoing overhead and administrative costs of VYNPC. These ongoing

administrative services produced credits aggregating approximately \$96,158 for the reconciliation period and Granite State's share of these costs is included as divestiture related items on Schedule 2, page 2, Column (4).

5. Calculation of the 2018 CTC Rate

This 2017 CTC Reconciliation Report produces a 2018 CTC rate for Granite State of (0.04) cents per kWh as shown on Schedule 1, page 1. This is a decrease of 0.06 cents per kWh, or approximately \$620,000, from the estimated 2018 CTC of 0.02 cents per kWh included in NEP's 2016 CTC Reconciliation Report, and represents a decrease of 0.08 cents per kWh from the rate of 0.04 cents per kWh presently in effect.

IV. SIMPLIFIED FORMAT FOR CTC SCHEDULES

At the request of certain parties, the Company has again prepared a set of simplified CTC schedules intended to ease the CTC review process while at the same time providing more information than currently contained in the existing CTC schedules. These simplified schedules are included in this report as Attachment 1. These schedules have been designed to provide detailed actual costs, as well as comparisons to original estimates, while illustrating a more concise approach to the calculation mechanism supporting the 2018 CTC rate.

Notes:

- (a) Includes prepaid taxes in accordance with tax treaty.
- (b) Excludes balances for final fuel core and materials and supplies.
- (c) Depreciation includes dismantlement expense of \$5 M and \$3 M for Brayton Point and Salem Harbor, respectively, through the year 2004.
- (d) Includes \$3.3 M of annual amortization of prepaid taxes which ends 2002.
- (e) Depreciation based upon years remaining under license. Vermont Yankee license expires 2012.
- (f) Millstone 3 base amortization was adjusted for acceleration per W-95S in 1996 and 1997. Accelerated amortization for 1998. is as noted in the table and an additional \$1.2 M of amortization should be added each year thereafter until fully depreciated.
- * September 1, 1998 balances are based upon the June 30, 1998 balances amortized in accordance with the Pre-Divestiture Schedule 1.

Column Notes:

- (1) Estimates for 2002 and beyond were adjusted to zero to reflect the sale of Millstone 3 in 2001.
- (2) Estimates for 2003 and beyond were adjusted to zero to reflect the sale of Seabrook 1 in 2002.
- (4) Estimates for 2003 and beyond were adjusted to zero to reflect the sale of Vermont Yankee in 2002.
- Columns (3), (5), and (6) reflect permanent shutdown of Connecticut Yankee, Maine Yankee, and Yankee Atomic units and thus include both post-shutdown and decommissioning costs.

^{*} Estimates were revised for 2006 and beyond in the Company's 2005 CTC filing.

Column Notes

(2)-(16) Actual Divestiture related adjustments.

(17) Sum of columns (2) through (16).

⁽¹⁰⁾ Includes Granite State Electric's 3.0% share of operating expense charges.

Column Notes:

- (2) Represents the remaining return requirement on the net deferred tax asset related to generation investments. This return is offset by the residual value credit included in column (4).
- (3) Represents the final reconciliation amount amortized straight line over 11.3 years plus annual return at a rate of 6.75%.
- (4) Also includes residual value credit associated with incremental proceeds received pursuant to the USGenNE CTC Settlement.

Notes:

(1) Estimated Columns (2), (5), and (8) reflect FERC approved settlement agreements for each site at the time of the USGenNE bankruptcy settlement, as stated in Docket No. ER06-555-000. Schedule 1 Page 7.

(2) Actual Columns (3), (6), and (9) reflect actual and accrued monthly invoices.

(3) Column (11) includes Vermont Yankee DOE site decontamination and decommissioning fees.

Column Notes:

⁽³⁾ Amounts represent insurance credits and payments to the Mass Emergency Management Agency.

⁽⁴⁾ Represents actual environmental remediation costs incurred by NEP.

⁽⁵⁾ See Schedule 6, page 2 of 2.
