RE: DG 18-092

Liberty Utilities Petition for a License to Construct and Maintain a Natural Gas Pipeline beneath the Ashuelot River in Keene

I am surprised that this proposal has not been open to more public scrutiny. I hope the PUC will protect NH citizens and carefully question the necessity and method of this project, and accept the petition of Terry Clark to intervene. We should do the minimum to keep existing fossil fuel infrastructure safe but not sink new investment in fossil fuels, including "natural" gas (i.e., methane that is fracked, leaks, and is more polluting than propane), while we invest in the future through clean energy.

Thank you for considering my comment. Please protect New Hampshire citizens and our grandchildren.
