In regard to the EVERSOURCE request for a rate increase please take into account the fact that they had deferred maintenance for many years while reaping the benefits and sticking the money in their pocket. I live in Windham, NH and for years we lost power damn near any time the wind blew over 40 miles an hour. I'm incensed that they think they should be rewarded for finally doing their job and maintaining their infrastructure. This situation existed for years and the fact that it was the result of poor maintenance is born out by the fact that the reliability has been so much better over the last couple of years. They should be penalized not rewarded!!!!
