

Educational and Professional Background

Al-Azad Iqbal

I am employed by the New Hampshire Public Utilities Commission (PUC) as a Utility Analyst in the Gas & Water Division. I have held this position from 2007 to the present. My business address is 21 S. Fruit Street, Suite 10, Concord New Hampshire, 03301.

I received my Bachelor degree in Architecture (B. Arch) from Bangladesh University of Engineering and Technology. I received my Master's (MS) in Environmental Management from the Asian Institute of Technology in Bangkok, Thailand. I received a second Master's in City and Regional Planning (MCRP) from Ohio State University in Columbus, Ohio where I was also a Doctoral Candidate and completed all the necessary course work for that degree but for the dissertation. After joining the PUC in 2007, I participated in several utility-related training courses including marginal cost training by National Economic Research Associates (NERA) Economic Consulting, advanced regulatory studies at the Institute of Public Utilities, Michigan State University; and depreciation training through the Society of Depreciation Professionals (SDP). I am also an active member of SDP.

Prior to joining the PUC, I was involved in teaching and research activities in different academic and research organizations. Most of my research work was related to the quantitative analysis of regional and environmental issues.
