---

Dear Karen,

I am writing to PUC as a young, NH resident who is concerned about our future on this Earth. I am in favor of the proposed energy efficiency standards that are supposed to take effect in 2021. We need to protect our climate and the public health of all NH residents. Implementing more stringent energy efficiency standards will increase green jobs for workers in NH and transition our economy to one that is more equitable and sustainable. Let's be progressive in our thoughts and actions as we look towards a better future,

Best,

Katie Aman
