Greetings members of the Public Utilities Commission,

I am a resident of Dover, NH Ward 1, and I urge you to disregard the letter from the Republicans of the State House and continue with the next three-years of the statewide energy efficiency plan as scheduled.

Given that this plan will create jobs alone seems like a large enough incentive, as once the pandemic is under control, many who have lost jobs will be looking for new work.

We are already behind where we need to be in terms of taking steps to stop the rapid warming of the planet. Today is December 1st and it's expected to be 60 degrees in Dover. The economic outlook of New Hampshire will get much worse if we don't take steps to mitigate climate change. How will our skiing related businesses in the north country make it?

As a paying customer, I would be more than happy to pay an extra \$2-9 a year to ensure that we still have a livable planet for my nieces and nephews and a vibrant ski industry so I can hit the slopes again when the pandemic is over.

Thank you for considering,
Nicole Hentz
Resident of Dover, NH Ward 1
