
Dear Ms. Debra Howland - Executive Director,

Our state's economic recovery from the pandemic downturn needs to avoid an increase in electricity and gas costs.

New Hampshire should not add costs to our Resident's electric bills until we have a better idea about how the pandemic downturn will affect us all.

Preserving jobs should come first, and protecting the pocketbooks of people who have lost a job due to no fault of their own.

As a resident of New Hampshire, I am asking that the Public Utilities Commission temporarily suspend the proposed increase in the taxes (systems benefits charge) that fund energy efficiency.

Thank you for your time and attention.

Merry Christmas and Happy New Year!

Carol
