

---

Madam Director,

I am Representative Jeff Greeson of Grafton County District 16 writing to you on behalf of my constituents to request that the Public Utilities Commission withhold the implementation of the proposed increase of the systems benefits charge.

Now is not the time to impose this extreme burden on the citizens of the state. People's and businesses' finances have been devastated this year, and a tax increase at this time, especially of such a magnitude, is going to cause great irreparable harm.

It is easy to make plans and prepare to implement them when the economy is going strong, but good leaders are always cognizant of the current situation and are also prepared to hold off implementing even good ideas when it is better to hold off.

Thank you very much. You may contact me at this email (until I get my legislative email up and running). Or you may call me at (603) 346-1041

Jeff Greeson  
State Representative, Grafton-16
