**Subject:** Liberty Utilities Back Tracking(stabbing) move

Please intervene in this matter. We in good faith signed up for the Fix Price option and now they want to renege and reopen to increase the price. Why should we, the public, have to pay for their error? If it were the other way would you see the same results on their part? Now, the somewhat justification, is that if they do not get an increase the non fix rate people will have to pay more. This also is wrong because they went, and are going, to the Utility Commission to get these higher rates. This commission should not grant it. ALSO, and very important, is the fact that some state and national governmental bodies say that assistance, and even more money is on the way. Yes, but it is only for so called low income people.. Listen, we are not low income, but we live on social security with no other income except a part time job. We live SS payment to SS payment.

We need help to – do not ignore middle Americans. Thank you.
